WORLD'S LARGEST SEED HOUSE
SELLING DIRECT TO FARMERS

BERRY SEED COMPANY

Established 1895 **CLARINDA, IOWA** 40th Year

J. F. SINN
President Berry
Seed Co.

A farmer by birth and early training. Connected with our Company for over 29 years.

Recognized as one of the foremost men in the seed business. He makes it his business to see that you get more seed value for your money.

He is always at your service, and glad to help.

SAVE MONEY on QUALITY SEEDS EVERY POUND GUARANTEED TO GROW

DEAR FRIEND:

The year of 1935 holds much promise for Agriculture. Progress was made in 1934 despite the terrible drouth, crop failures and other adversities. Farm prices are advancing and reaching more prosperous levels. The farmer is bound to succeed and again increase his buying power until he will be the envy of his city cousin.

Seeds, the foundation of all crops, are being sought after by everyone who is interested in Agriculture. Every Agriculture authority appreciates that the drouth has cut the production of practically all seed crops to the lowest minimum in 40 years. Again the potential demand for seeds is possibly the greatest ever experienced. New seedings have failed and many old meadows have been destroyed by the drouth. The crop reduction program calls for more Grass Seedings to be made. The government's activity in CCC camps, soil erosion projects, and many others require immense quantities of Grass Seed.

Now since the seed production of Clover, Alsike, Sweet Clover is about half a crop—Timothy 20%, and Alfalfa about 60%—it would seem that this shortage is going to become acute long before seeding time. When this abnormal demand for seed is felt and becomes a reality, as it will later, you will see some real fireworks in the seed markets. There are no reserve stocks to check advances. We look for extremely high prices on nearly every item.

I want to give you this picture of the seed situation so you may be actuated to buy early. I cannot do you a greater favor than to advise buying now. Buy while we have our complete stocks available and at the ridiculously low prices we have quoted in our Catalog. You will be getting a real bargain and guaranteed quality. We urge buying our World Brand, the highest quality. We have made all prices so low that no one will hesitate buying on account of the price. Buy early and plenty of what is needed, as this book gives you a real opportunity to save money.

We are headquarters not only on Farm Seeds, but have a complete supply of Flower, Garden and Nursery Stock. You will find this catalog chuck full of real seed values. Save money this year by letting Berry have your order. We are here ready to serve and have the largest stock of seed in the United States available for the farmer and again at the lowest prices, quality considered. Everything received must please you and prove a bargain or you can return and have your money back.

I want to prevail upon you to send us your order promptly. I know I can save you money. I can save you most if you act at once. I have been on the job for nearly 30 years and never could I do my friends more good than now. If I can help you, write me. Samples and advice are always yours for the asking. I will be expecting to hear from you with an order.

Your friend,

Greens Fork, Ind.
Dear Sirs: Have bought several thousand dollars worth of seed from you. Have always found them prompt and reliable and have saved myself and neighbors several hundred dollars, always obtained seed of high germination.
D. W. HARRIS

Springville, Iowa
Gentlemen: The Marvelous Mixture of grass seed that I have been buying from you for several years is the best. I have been getting good returns for my money, and can heartily recommend to others desiring good seed.
Yours truly,
C. F. BUTLER

Mount Clare, W. Va.
Dear Sirs: I have been using your farm and garden seeds for some years and find them real money savers. Your descriptions and recommendations are accurate and reliable. Your courtesy and efficient service lead me to recommend you to all who wish to get the best seeds at a minimum cost. For purity and vitality your seeds are unsurpassed.
Truly yours, G. W. CONLEY

New Berlin, Ill.
Gentlemen: I have been buying seeds from Berry's for 24 years. I have lately club ordered my seeds, inducing my farmer friends to order with me. I have bought over \$18,800 of seeds from you in one year. Not one farmer returned a bushel. Always better than expected. I always save from \$4.00 to \$7.00 per bushel by ordering from you. I find your World Brand the very best buy.
J. W. GERHARDT

Hummelstown, Pa.
Dear Sirs: I have found your seeds OK and you have saved me lots of money. Your Lot Honest John Alfalfa has given me wonderful results. I sent you a photo showing the fine big growth. I am well satisfied with all dealings I have had with you.
Yours truly,
DANIEL BEHRENS

BANKS that VOUCH for US

Here is a list of the banks with whom we do business. Anyone of these will tell you that we are reliable. Your own banker can refer to his credit rating books and he will tell you the same thing.

Continental Illinois Bank and Trust Company, Chicago, Ill.
Terminal National Bank, First National Bank, Drovers National Bank, Chicago, Ill.
Bank of Manhattan Trust Company, New York, N. Y.
Iowa—Des Moines National Bank, Des Moines, Ia.
Omaha National Bank, Omaha, Neb.
Citizens State Bank, Page County State Bank, Clarinda, Iowa

LOWEST PRICES

from WORLD'S LARGEST SEED HOUSE SELLING DIRECT to YOU!

Our Clarinda plant and main offices are shown above and our Chicago plant on the left. These large buildings, equipped with modern machinery, make possible our excellent service, high quality and low prices.

TESTED QUALITY

Mr. L. C. Jorgenson is one of the country's best seed analysts. He secured his training from U. S. Government at Washington, D. C.

Prompt Shipment—Quick Arrival

Our entire policy of business is to take care of every customer's order so he or she will be satisfied in every way. Both our Clarinda and Chicago plants are organized and equipped to get shipments out promptly. Freight service is improved and shipments roll to destination in short order.

We guarantee that all shipments will arrive safely and in good condition. If there is any sign of loss or damage just have your agent mark it on the freight bill, send the bill to us and we will promptly adjust the matter. Address all letters, orders and correspondence to Clarinda. We have no office at Chicago.

Service on Seeding Problems

Perhaps you may be undecided as to what you should sow. You may desire further information on some crops. Possibly you have a farming problem that is hard to solve. If so, write to us. We may be able to help you. Our secretary, Mr. Joe Faassen, has made quite a study of farm crops. He is always glad to help whenever he can. His services are at your disposal. Feel free to write at any time.

Recleaned Seed

It will pay you to fully understand that our scientifically recleaned and specially processed seed is distinctly a superior product. When some dealers talk about recleaned seed they mean it has been run over a fanning mill with a couple of screens in it. That will help, of course, but much greater care and attention must be given to the average seed to make it desirable to sow.

In our cleaning plants we have some machines that are used just to get one particular kind of weed seed. Our equipment is modern, efficient, and we can do cleaning and special processing that is absolutely impossible for the average concern. You could afford to pay us a premium for such seed and still have much more economical and satisfactory seed. We do not charge you a premium, however, but give you scientifically recleaned seed at prices that are lower than many are asking for inferior quality. Judge seed by quality. Quality makes the value and our low prices make unbeatable bargains.

GUARANTEE

We guarantee everything in this catalog to be as represented. We guarantee that our prices are lowest, considering quality. If upon receipt of your order you are not entirely satisfied you can return it and your money, plus transportation charges, will be promptly refunded. Or you can keep it 60 days and have the seed tested in order to satisfy yourself that the quality is good and that you have saved money and secured a big bargain. Then if you are not pleased you can return it, and have all money refunded. You must be satisfied and we guarantee to save you money.

We also guarantee to replace, free of charge, any garden or flower seed that fails to grow on account of poor germination. Our nursery stock is guaranteed to arrive in good live planting condition or it will be replaced free of charge.

Our guarantee protects the buyer and is lived up to, so it means just what it says.

BERRY SEED CO.,
Clarinda, Iowa.

We Test to Know

The seed business is our only business, not a side line. We must ship good seed to our customers or our business will fail. We can't afford to guess at the quality of our seeds. We must KNOW.

Therefore, every lot of seed is tested with painstaking accuracy. The analysis shows us exactly what the seed is. The purity of the seed is known to one hundredth of one per cent. The germination is also found. The seed must be satisfactory or it isn't shipped.

We refuse to buy lots of seed because of some undesirable impurity or weak germination. Whoever sows such seed will regret it. You are always safe on our seeds and no matter what grade you buy you are guaranteed an excellent bargain. Every shipment we make has a tag on it showing purity and germination tests. You know what you've got because our tag gives you the facts.

40 Years of KNOWING SEEDS

SAFEGUARDS BERRY CUSTOMERS

KNOWING ORIGIN

KNOWING QUALITY

Our 40 years of experience have taught us to know what sections produce seed with noxious weeds. They are to be avoided, yet seed produced in such sections is sold to someone. We know when climatic conditions are most favorable for the development of hardiness, which is such an important characteristic in many seeds. The information that we have about quality, sections, etc., helps us to secure better

seed for you. If you could spend just a few hours in seeing how we operate our modern seed business, you would know that we are rendering a real service to our customers.

Our buyers are schooled by experience to judge quality quite accurately. Yet even they find it difficult to estimate the loss of weight in cleaning seed. That will run from 5% to over 50%. Only the most accurate testing shows the actual quality. If experienced buyers find this difficult how much more so it must be for farmers who buy seed once or twice a year. We know weed seeds and detect them

readily while the occasional buyer will overlook most of them. The buying of country run or improperly cleaned seed is the riskiest purchase any farmer can make.

KNOWING PRODUCTION

KNOWING CLEANING

It is necessary to know how seed crops are developing and turning out all over the nation. That enables us to make a forecast of probable market changes. For example, this year we knew that the Red Clover seed crop was short and Alsike much shorter still. Sweet clover was somewhat below last year when there was a very short crop. Timothy is almost a total failure. Sudan and forage crops such

as Millet and Cane are all short. Our early purchases will enable our customers to buy at decided savings. Higher prices are inevitable and we urge you to cover your needs early.

It is necessary to have a big investment in buildings and machinery in order to make quality seed even out of good country run seed. We have modern equipment but more than that is necessary. You must know how to operate this machinery. What screens are to be used. At what speed should the machine be run. How should the air blast be regulated. How fast can the seed be fed to the machine, etc. It takes more than a machine to make

good seed.

The above are just a few of the facts to show that our seed service means something to you and why it safeguards your buying.

BERRY'S

WORLD BRAND EXCELS

TESTED GRADES

We prepare most of our Grass and Clover seeds in different grades. The difference is largely a matter of color and size of berries. This enables us in our

better grades to give you a much finer quality than the seedman who mixes all lots together and offers only one or two grades.

Our World Brand is our extra fancy quality. Into it goes only the finest colored and largest berried seed. The purity and germination tests are the highest. It always represents the finest and is beautiful seed. The farmers who demand only the best are perfectly satisfied with this grade. They find nothing better, yet our prices save them money.

There is true economy in such stock. It produces strong, vigorous plants. Requires a minimum amount of seed. Gives assurance of clean fields and is surest to make a stand.

In grasses, grains and forage crops where only one grade is offered it is all World Brand. We have customers who for a quarter of a century found this grade their best friend. They do not ask for samples for experience has taught them that they will receive the best when they order Berry's World Brand.

By buying Berry's Tested grades or special lots you simplify seed buying because you can always tell what character of stock you will receive on your order.

FIT YOUR NEEDS AND MAKE BUYING EASY

DEALER'S FANCY

A high grade. Not quite so extra fine appearing as our World Brand, yet equal to what is quite generally sold as the best. It has nice color and size and good purity and germination. This grade is made to please those who wish a good dependable quality at a considerable saving in price.

PLANET BRAND

This extra choice grade gives very good service. The color is not quite so bright and the berries a bit smaller. It gives good stands at low cost. The saving in purchase price fully compensates the somewhat less handsome looks.

STAR BRAND

This is our cheapest grade. Not always available in all lines. Made up of smaller berried seed. Not always so high in germination per 100 seeds, but there are so many more seeds in a pound that it produces good stands. The price is always low and it satisfies.

SPECIAL LOTS

Sometimes we secure some lots which do not fit into our regular grades or which are purchased at special prices that permit an extra bargain to be offered. Such lots are listed by special names, such as Bed Rock Grimm Alfalfa.

DIRECT BUYING

The Sensible
Thing to Do

You Save Money on all Seeds

We eliminate extra profits. Our seed comes largely direct from the producing sections to our plant. From one section comes Red Clover, another Alfalfa, another Sudan, Sweet Clover, Timothy, Rape, etc. We reclean and assemble these stocks so that you can get at one place all the different kinds of seed you may need. All of this seed is scientifically cleaned, graded and tested. You get it in the way you want it and at a decided saving in price.

We have saved the American farmer thousands of dollars on our guaranteed quality seeds. We can save you good money this year. Join that mighty caravan of farmers that is turning this year to the World's Largest Seed House—selling farm seeds direct to farmers. Quality counts.

CUTS OFF
THE
MIDDLEMAN

AND
SAVES YOU
20% To 30%

KEEP THIS EXTRA
PROFIT for YOURSELF

HIGHER PRICES SURE to COME

We urge all of our friends to purchase their farm seeds early this year. There is a shortage in supplies of many lines of seed. The general trend of markets is toward higher levels.

Our stocks of seed at the time this catalog goes to press are quite large. We will be able to take care of early orders at prices given in this book. These quotations are made so low that we know the seed will move rapidly.

We see no opportunity of replacing the seed at the prices of last fall. Therefore it is necessary to quote prices subject to change after our original stocks are sold out.

There will be no changes unless conditions make it absolutely necessary and then our prices will be guaranteed to save you money on the basis of existing markets.

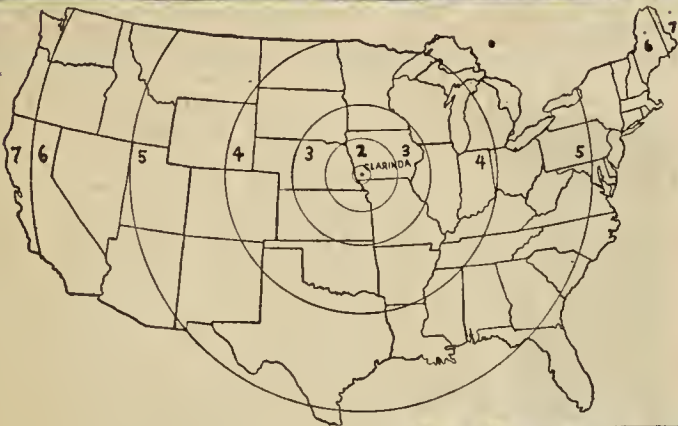

To assure yourself of the biggest savings, order just as soon as you can. Please do not think this is high pressure sales talk. We are simply trying to help you make an extra saving.

OUR PRICES THE NATION'S LOWEST

By lowest prices we mean, lowest considering quality. It is easy for anyone to make a low price. That in itself means very little. Some low priced seed might be expensive as a gift. Quality is the only true basis of value. On a quality basis you will find our prices lowest. Compare and see for yourself. Some people judge quality by price. They reason that the higher the price the better the quality. Such reasoning is just as faulty as to consider that a low price always means a bargain. We want to supply you with the kind of seed that will make you want to come back again.

Freight Rates Reduced $\frac{1}{3}$

The railroads are still on a lower rate basis to get back the business that has been going to trucks. In Iowa Grass seeds which formerly went as third class now go as fourth which means a reduction of as much as $33\frac{1}{3}\%$. This drastic cut is to the direct benefit of farmers and increases your savings in buying seeds direct. Our low prices far offset freight charges. We guarantee safe arrival as well as satisfactory quality.

Parcel Post Rates

Any package up to 70 lbs. in weight and not exceeding 100 inches in length and girth combined can be sent by parcel post. If you want anything shipped by parcel post that is not quoted postpaid be sure to remit to cover postage. First find the zone you are in and then figure the amount of postage from the following table:

	1st Lb. Costs	All Additional Pounds
Zone 1	8c	1c
Zone 2	8c	1c
Zone 3	9c	2c
Zone 4	10c	3½c
Zone 5	11c	5½c
Zone 6	12c	7c

For example, a 10-lb. package to the 3rd zone costs 9c for the first pound and 2c a pound for the next nine pounds. $9 + 18 = 27c$ total. For short distances or for small packages parcel post is cheaper. Otherwise express. Freight, of course, is cheapest excepting on packages of 35 lbs. or less.

HOW TO ORDER

It is easy to order by mail. Use our regular order blank form if you have one. If not, you can use any kind of paper or we will send you order blanks.

Give full name and complete address. Tell where you want the seed shipped to and whether to ship by freight, express or parcel post (see to left for postage rates). If your freight station is different from post office be sure to say so. In case there is no agent at your freight station, then include freight charges in your remittance or let us ship to the nearest station where there is an agent.

Figure up the cost of your order according to latest catalog or price list. If you want farm seeds shipped from Chicago remit Chicago prices as shown in catalog or price list.

Send your remittance with your order. You can send this in the form of a Postal or Express Money order, Bank draft or your own personal check on any going bank where you have funds to cover. Do not send stamps or coin when convenient to remit otherwise. We advise registering letters containing currency.

Address all mail and orders to Clarinda. We have no office at Chicago. Write to Clarinda only. If you are in a big hurry for your seeds mark your order Rush.

BERRY'S

GARDEN SEEDS

Famous for their Tested Quality

How often gardeners are disappointed by poor stands and inferior quality vegetables. In most cases this can be avoided by sowing seed of "tested-quality." That need not cost you any more and it is infinitely more satisfactory.

Thirty-nine years of experience have taught us much about seeds. We know what sections are best adapted to growing different seeds. We have learned which growers are most reliable. Our testing methods have improved. Accurate knowledge has replaced guess work. That is why we can guarantee our garden and flower seeds to grow.

All this means better gardens for you. The extra expense of securing and preparing seed comes back in extra business. Our prices are no higher. In fact, they are lower. Thousands of satisfied customers come back year after year. They bring their friends along. Increased volume for us means greater value for you. Send us your order this year. You will find Berry's "tested seeds" most economical because they are so highly satisfactory.

GUARANTEE

We use such care in the selection and testing of our garden and flower seeds that we guarantee them to grow. If you fail to get a satisfactory stand and you believe this is due to the quality of the seed, we will replace such garden or flower seeds free of charge. Nothing could be more fair. We give you a greater measure of protection than any seed dealer we know of. This guarantee alone makes it worth your while to mail your order to Berry.

Quantity Prices

Any gardener needing large quantities of seed should write for special prices. Send a list showing just what varieties you wish and how much of each you plan to buy.

CRISP, TENDER BEANS

WAX VARIETIES—YELLOW POD

123 Webber Wax or Cracker Jack. An early Market garden sort. Plant medium, erect, compact and quite productive. Pods medium broad, thick-flat, curved, bright yellow. Brittle and stringless when young.

124 Round Pod Kidney Wax. Plant large, erect, medium green and very productive. Pods medium yellow, absolutely stringless and fiberless. Seeds white, kidney shaped with black eye.

126 New Brittle Wax. An outstanding sort for home use and for the canning trade. Dwarf habit, stringless pods.

127 Improved Black Wax. Vigorous and strongly productive. Pods deep golden yellow, tender, absolutely stringless. A favorite.

128 Davis White Wax. Pods long, thick, flat, light yellow, crisp for baking.

129 Wardwells Kidney Wax. Desirable for home and market garden use. Earliest and most prolific. Pods golden yellow, brittle, stringless.

130 Berry's Golden Wax. Fine cooking bean, always pleases. Plant small, erect, very productive. Pods cream yellow, stringless. Postpaid price on each of the above 7 varieties: Oz. pkt., 5c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.25. Not Prepaid: 10 lbs., \$2.00.

131 Mammoth White Pod. This new Wax pod variety has gained an enviable reputation. It is very productive, absolutely stringless, tender and delicious to eat. Most profitable wax bean for market or home use. Postpaid price: Oz. pkt., 5c; ½ lb., 25c; 1 lb., 40c; 3 lbs., \$1.00; 5 lbs., \$1.50. Not prepaid: 10 lbs., \$2.25.

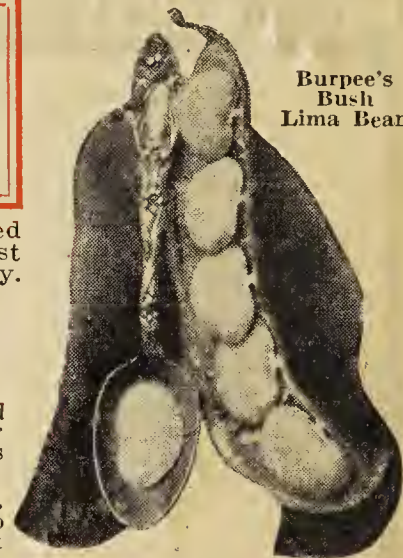

GREEN PODDED BUSH BEANS

132 New Bountiful. An important early variety for market gardeners and shippers. Very meaty and tender, stringless and fine flavor. Ready to pick in six weeks.

133 Giant Stringless Green Pod. One of the favorite stringless green podded sorts. Pods round, meaty, stringless and brittle. Heavy producer.

134 Burpee's Stringless Green Pod. The most popular green podded bean. Pods round, fleshy, perfectly stringless, and of excellent quality.

135 Berry's Special or 1000-1. Pods long and round, medium green color, flesh crisp and tender and of good quality. Medium early.

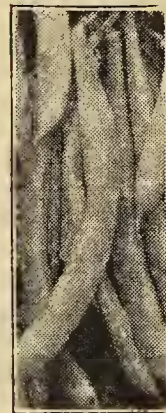

Burpee's
Bush
Lima Bean

136 Red Valentine. An old dependable variety for home gardens. Popular as a snap bean.

125 Tennessee Green Pod. One of the earliest snap beans. Pods long, flat, dark green. Plant hardy and productive.

122 Full Measure. A well known variety for market and canning purposes. Pods are round, straight, very fleshy, being stringless and tender. Seeds are of reddish brown. Postpaid price on each of the above 7 varieties: Oz. pkt., 5c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.25. Not prepaid: 10 lbs., \$2.00.

Kentucky
Wonder

POLE BEANS

140 Early Golden Cluster. A vigorous grower, large golden pods of good quality.

141 Kentucky Wonder. The best known and most popular pole bean. Fleshy green pods, best flavor of any. Pods hang in clusters.

142 Lazy Wife. Medium late, strongly productive. Pods broad and fleshy, stringless, with a buttery flavor. Easily grown.

143 Dutch Case Knife. A popular old variety, suitable for home use. Fine for green shelling. Early and prolific.

144 Cuthshort or Corn Hill. An old time cornfield bean. Good for snap beans. Late.

146 Kentucky Wonder Wax. The best pole bean for northern planting. Pods golden yellow, with delicious flavor.

149 Missouri Wonder or Noxall. The earliest green podded pole or corn hill bean. Pods are long, round and tender, maturing in 65 days. Excellent for planting in corn. Postpaid price on each of the above 7 varieties: Oz. pkt., 5c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.25. Not prepaid: 10 lbs., \$2.00.

WINTER OR BAKE BEANS

150 Red Kidney. Dark red. The old fashioned baking bean. Produces large flat green pods, well filled with large, red kidney-shaped beans, rich in flavor. Matures in 60 days.

147 White Wonder. The greatest pea or corn field bean, heavily productive. Best for commercial use.

148 Pinto, or Dry Land Bean. Used same as Navy Bean. A favorite western bean. Very prolific. Suitable for dry climate. Postpaid Price on each of the above three varieties: Oz. pkt., 5c; ½ lb., 20c; 1 lb., 25c; 3 lbs., 65c; 5 lbs., \$1.00. Not prepaid: 10 lbs., \$1.50.

BEAN INOCULATION. Garden size, 15c; ½ bu., 35c; 1 bu., 50c.

ASPARAGUS

Asparagus

SEE PAGE 59 FOR ASPARAGUS ROOTS

CULTURE—Sow early in spring. Thin seedlings to 14 inches apart. Quicker results can be secured from roots. Soil should be worked deeply. Remove top soil and spade a heavy coat of manure to a depth of 16 to 18 inches. Replace top soil and add more manure. Crowns of roots should be covered 4 to 5 inches. Winter mulching with straw or light manure is good practice. Do not cut roots first year.

101 **Washington Rust Proof.** The newest and best variety of all; rust resistant, heavy yielding. Easiest to grow. Postpaid: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

102 **Columbian Mammoth White.** A distinct and valuable variety! Robust and vigorous grower. Very productive. Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.

BEETS

Tender and Richly Flavored

CULTURE—Sow as soon as danger of frost is past in drills 16 inches apart. Cover about 1 inch. Two or three plantings supplies young tender beets all season. Thin plants in rows 3 to 4 inches apart. Our seed is all new high quality stock.

151 **Crimson Globe.** An exceedingly fine table beet; flesh purplish red with moderate zonings.

157 **Detroit Dark Red.** The outstanding variety, fine quality, tender and sweet. Globe shaped, small top, dark red color.

167 **Early Wonder.** Globe shaped, uniform size. Flesh very dark rich red, and tender. Valuable as market gardener early variety. Postpaid Price on each of the above three varieties: Pkt., 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 95c; 5 lbs., \$4.25.

152 **Long Blood Red.** Roots 10 to 15 inches long, dark purplish red, smooth, of good quality and suited for winter storage.

158 **Swiss Chard.** Superior for greens. Upstanding, rapid grower. Postpaid Price on each of the above two varieties: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 85c; 5 lbs., \$3.75.

Crimson
Globe
Beet

153 **Improved Extra Early Eclipse.** An early variety for home and market garden. Globe shaped, medium dark red color. A fine pickler, sweet, crisp.

154 **Improved Extra Early Blood Turnip.** Medium early. Roots top-shaped, flesh blood red.

155 **Crosby's Egyptian.** An extra early variety preferred by market gardeners, splendid for bunching. Tender and sweet, top shaped.

156 **Edmund's Extra Early.** Recommended highly for fine quality, earliness. Postpaid Price on each of the above 4 varieties: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 85c; 5 lbs., \$3.75.

STOCK BEETS

Mammoth Long Red

Fine for cattle, horses, sheep and poultry. Increase milk flow and saves hay.

159 **Mammoth Long Red.** One of the most popular mangels. Enormous, weighing 25 pounds. High yielder. Color light red, flesh white with rose tinge.

160 **Golden Tankard.** Very large size and easily lifted. Skin deep orange, flesh yellow with white zones.

161 **Danish Sludstrup.** A good cropper and high feeding value. Long, reddish yellow.

162 **Golden Globe.** A round variety. Grows large, easily pulled, good keeper. Postpaid Price on each of above 4 varieties: Oz., 5c; ¼ lb., 20c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.00.

SUGAR BEETS

163 **French Sugar.** A heavy yielding variety largely used for stock feeding.

164 **Vilmorin Sugar.** A popular variety to grow for stock.

165 **Klein Wanzelben.** Most popular variety for sugar manufacture because of high sugar content; also valuable for stock feeding. Flesh solid white.

166 **Giant Half Sugar.** Heavy yielder, valuable for feeding. Flesh white, with good sugar content. Grows half out of the ground, making it easy to harvest. Postpaid Price on each of above 4 varieties: Oz., 5c; ¼ lb., 20c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.00.

CELERY

CULTURE—Sow seed in a hot bed or cold frame. Prepare seed bed very carefully. Do not cover seed over ½ inch. Water carefully. Do not let bed get dry. After plants are up be careful it does not get too wet. Transplant at least once, twice is better. Celery requires deep rich soil with plenty of manure or fertilizer.

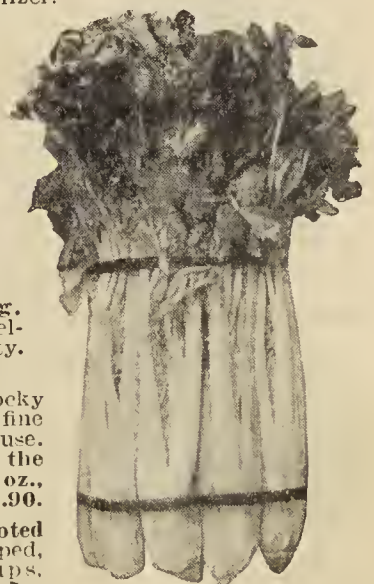

251 **White Plume.** Earliest of all. Easily blanched to pure white; solid, crisp and of good quality.

253 **Giant Pascal.** A late variety for winter use. Produces large, thick, crisp, stringless stalks, with a delicious nut-like flavor. Handsome color. Postpaid Price on each of the above 2 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$1.90.

252 **Golden Self Blanching.** Blanches readily to golden yellow. Crisp, excellent quality. Larger than White Plume.

254 **Golden Heart.** Short, stocky growth. Large heart, crisp, fine flavor, excellent for table use. Postpaid Price on each of the above 2 varieties: Pkt., 5c; oz., 35c; ¼ lb., \$1.25; 1 lb., \$3.90.

255 **Celeriac or Turnip-rooted Celery.** Roots nearly globe-shaped, are used for flavoring soups, stews, etc. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., 90c.

CABBAGE SEED and PLANTS

AMERICAN AND DANISH GROWN CABBAGE SEED

CULTURE—Cabbage prefers cool moist climates and fairly heavy well drained loam soil. Seed for plants should be sown about the middle of February, depending on location. An ounce of seed will make around 2,000 plants. Plants for fall use may be started by sowing the seed outdoors in the latter part of May.

By planting a number of different varieties you can have cabbage at its best all season and for winter use as well.

See Page 63 for Insecticides for Cabbage Worms

EARLY VARIETIES

where non-resistant varieties fail completely. A strain of Copenhagen Market, but matures about ten days later. Postpaid: Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.75.

175 Chinese PeTsai. Early and sure heading. Crisp and tender. Valuable for salad. Also called Celery Cabbage. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$1.90.

176 Early Jersey Wakefield. Small, compact, conical heads. Can be set close together in the row. Our Wakefield is a select strain. Used largely by market gardeners.

185 Norseman. A new type, very early, entirely different, extra large heads. Good shipper.

Postpaid price on each of the above 2 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.

177 Henderson's Early Summer. A quick heading variety, somewhat flattened. About ten days later than Wakefield. Outer leaves have a bluish grey tinge.

178 Extra Early Express. Extra early sort, oval head, very large for an early cabbage. A fast grower. Very productive.

180 Glory of Enkhuizen. A variety from Holland. Used largely for kraut. Globe shaped, heads solid, excellent quality. Weight 6-9 pounds. Good keeper when planted for late fall or winter use.

181 Early Flat Dutch. An early strain popular with market and home gardeners. Heads almost round, good solid quality.

183 Early Allhead. Medium early. No variety better for an all-purpose variety. Earliest of large cabbage. It's a dandy.

184 All Seasons. Sure heading, very solid, for all purpose use, popular for kraut making. Withstands sun and dry weather.

Postpaid price on each of the above 6 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.

Early Flat Dutch

179 Golden Acre. A new variety, sure header; heads round and very solid, few outer leaves. Used by truckers for the earliest markets. Postpaid: Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.25.

182 Copenhagen Market. Finest round-headed early cabbage. Heads uniform, solid, excellent quality. Few outer leaves. Short stem. Desirable likewise for early kraut. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.75.

Jersey Wakefield

LATE VARIETIES

186 Premium Late Flat Dutch. Excellent for home and market garden use. Very solid, large, flat heads, 6 to 7 inches deep. High quality. Deserves its wide popularity.

187 Drumhead Savoy. Popular for its tasty flavor. Sweeter than ordinary cabbage. Has crinkled leaves. Round ball-like heads are very heavy. An excellent keeper.

192 Volga. Matures early, heads large and solid, disease and rot resistant. Stands long without bursting. A standard variety for market gardeners and shipping.

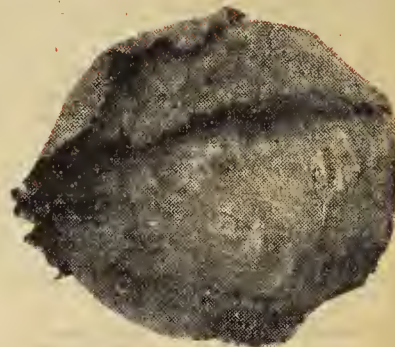

193 Autumn King. The kraut favorite, producing enormous heads of good quality, dark green shade, few outer leaves, very compact.

Postpaid price on each of the above 4 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.

190 Wisconsin Hollander. Most remarkable cabbage. Disease resistant. Heads very attractive, good size. Larger than Ballhead. A little later in maturing. Extra long keeper. Postpaid: Pkt., 5c; oz., 30c; ¼ lb., \$1.00; 1 lb., \$3.75.

191 Danish Ballhead. Danish grown. Extremely hard heads, 8 to 9 inches across. Extra long keeper. A superior variety, most widely used of late cabbages. Postpaid: Pkt., 5c; oz., 25c; ¼ lb., 75c; 1 lb., \$2.75.

194 Mammoth Redrock. The largest and best red cabbage. It is fine for slaw, pickling or boiled. A sure header, heads weighing 10 to 15 lbs. An excellent keeper. Postpaid: Pkt., 5c; oz., 20c; ¼ lb., 60c; 1 lb., \$2.00.

Danish Ballhead

CAULIFLOWER Choicest Imported Seed

Requires rich moist soil. Will not stand as much frost as cabbage. Leaves may be tied together after heads begin to develop to keep them white. This works well in a dry season.

220 Early Snowball. Most widely used early variety, especially valuable for market. Dwarf habit. A sure header, medium size. Delicious, white and tender.

221 Dry Weather or Danish Giant. Produces very hardy snow white heads of excellent quality. A little later than Snowball.

Postpaid price on each of the 2 varieties. Pkt., 10c; ¼ oz., 40c; oz., \$1.40; ¼ lb., \$4.00; ½ lb., \$7.00.

222 Berry's Late Giant. Best Late. Heads large and compact. Vigorous grower. Postpaid: Pkt., 15c; ¼ oz., 60c; oz., \$1.75; ¼ lb., \$5.25; ½ lb., \$9.50.

Danish Giant

CABBAGE PLANTS—Strong, Healthy, Hardy, Frost-Proof Stock

Our plants are field grown in the south. They are much hardier than plants produced indoors. They may therefore be set out earlier, thus giving real early cabbage that is so desirable to home and market gardeners. You will find a description of the different varieties given above. See below for postpaid prices. We will give you special money saving prices on larger quantities.

Prepaid prices on following varieties: No. 195 Wakefield; No. 196 Norseman; No. 198 Copenhagen Market; No. 199 Early Flat Dutch; No. 200 Golden Acre: 100 plants for 60c; 200 plants, \$1.00; 500 plants, \$2.00; 1,000 plants, \$3.25. Write for special prices on larger amounts. When ordering state clearly the varieties you want and the number of plants of each kind.

BETTER SEED MEANS BETTER GARDENS

GROW PLENTY OF CARROTS

Chantenay Carrot

CULTURE—Carrots contain valuable food elements. They do their best in rich, well worked mellow soil. A seeding the middle of June will provide fine winter stock.

TABLE CARROTS

201 Oxheart or Guerande. Roots bright orange, thick, blunt ended, of heart shape. Fine quality, easily pulled.

202 Early Scarlet Horn. One of the best for table use and liked by gardeners for early market. Crisp and sweet.

203 Berry's Golden Ball. Earliest variety. Grown for forcing purposes. Globular-shaped root, bright orange color. Postpaid Price on each of the above 3 varieties: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10; 5 lbs., \$4.50.

204 Danvers Half Long. The standard variety for home and market gardeners and for shipping. Rich dark color, tender, and of good quality.

205 Chantenay. The gardener's favorite. Quality unsurpassed. Medium early. Roots deep orange, smooth, tapered, stump-rooted. Smooth skin, tender and sweet.

210 Imperator. An outstanding type for market garden use, and for shipping. Deep rich orange in color, and tapered to blunt end.

211 Nantes, Improved Coreless. Tops very small. Flesh reddish orange, very crisp and tender. Excellent for market garden use.

212 New Coreless. Tops are small, roots bright orange, fine flavored, tender, sweet. Uniform size, blunt ended, practically coreless. Postpaid Price on each of the above 5 varieties: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; 1 lb., \$1.25; 5 lbs., \$5.50.

STOCK CARROTS

Fine for horses, cattle, and especially milk cows. Heavy producers.

206 Long Orange. A popular variety, suitable for stock or table use. Heavy cropper. Roots red-orange, tapered to a point.

207 White Belgian. Grows long green tops well above the ground. Flesh white with tinge of cream color.

208 Mastodon. Heaviest cropper, white, crisp, solid, very sweet in flavor. Roots frequently measure 15 to 20 inches in circumference.

209 Victoria. This is a large variety and heavy yielder. A most nutritious yellow variety.

Postpaid Price on each of the above 4 varieties: Oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 75c; 5 lbs., \$3.00.

EGGPLANT

CULTURE—Start plants in house or hot bed. Transplant after all frost danger is past. Set plants 18 to 24 inches apart in rows 3 feet apart.

310 Improved New York Purple. Our strain of this leading market variety is unsurpassed. Skin glossy black purple, flesh white.

311 Florida High Bush. A new variety, good size. Upstanding in growth, resistant to drought and blight.

312 Black Beauty. Valuable to home gardeners and truckers for market. Ten days earlier than New York. Entirely spineless, sets fruit freely. Fruits are smooth, holding well after picking.

Postpaid Price on each of the above 3 varieties: Pkt., 5c; oz., 35c; ¼ lb., \$1.20; ½ lb., \$2.20; 1 lb., \$4.00.

New York Purple

CUCUMBER

CULTURE—Rich soil gives best results. Well rotted manure under hills or rows stimulates production. Sow after all danger of frost is past. Starting plants in boxes or bands in hot bed advances maturity about three weeks. Cultivate shallow but often. New fruits will not form while older ones are ripening.

225 Berry's Champion Pickler. The best of all. Fine, uniform, straight, smooth and symmetrical. Excellent for slicing or pickling. Postpaid: Pkt., 10c; oz., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

226 New Klondike. A medium early variety, sure cropper. Used for shipping.

228 Chicago Pickle. Most widely used of pickling varieties. Uniform and attractive, excellent quality. Very prolific.

229 Early Frame. A popular variety, excellent for pickling or slicing. Fruits bright medium green, 6 to 7 inches long, 2 ½ inches thick, uniform.

230 Early Green Cluster. Very prolific, early variety for small pickles, with fruits bunched.

231 White Spine Evergreen. Excellent market garden and home variety. Beautiful in shape, fruit dark green, crisp and tender.

233 Boston Pickler. Very early and prolific. Fine for table. Uniform size, slightly tapered. Dark green.

234 Improved White Spine. Excellent for home garden, and widely used for shipping. Vigorous and productive, fruit uniform, very showy.

237 Stays Green. An early, medium sized, prolific variety. Very dark green. Holds color and firmness well in shipping.

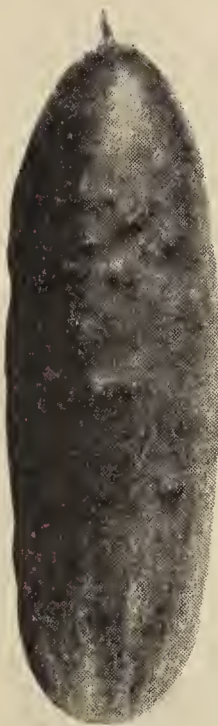

Postpaid Price on each of above 8 varieties: Pkt., 10c; oz., 15c; ¼ lb., 55c; ½ lb., \$1.00; 1 lb., \$1.90.

227 Davis Perfect. A new mid-season type, excelling in quality and productivity. Fruits dark green, flesh crisp and of good quality.

232 Cool and Crisp. Extra early variety, medium sized fruits, crisp and tender, fine mild flavor.

236 Improved Long Green. Standard late variety. Splendid for slicing, excellent quality. Fruits dark green, flesh white, firm and crisp.

Postpaid Price on each of the above 3 varieties: Pkt., 10c; oz., 20c; ¼ lb., 75c; ½ lb., \$1.35; 1 lb., \$2.50.

Improved Long Green

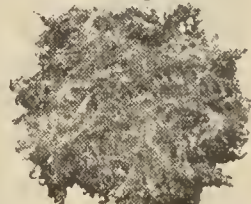

ENDIVE

CULTURE—Sow thinly in drills. When well established thin to eight inches apart. When leaves are 6 to 8 inches long draw them together and tie so the heart will blanch. Do this only when plants are perfectly dry.

315 New Moss Curled. Very fine variety, with fine curled leaves. One of the best. Desirable for salads.

316 White Curled. This variety needs no bleaching. Golden yellow, creamy white at heart. Handsome in appearance, fine flavor.

317 Batavian Broad Leaved. Heads large with broad, thick leaves. Used for flavoring soups, stews, etc. When tied up, bleaches creamy white. Postpaid Price on each of above 3 varieties: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00.

Endive Moss Curled

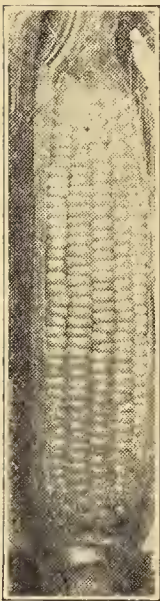

SWEET CORN AND LETTUCE

BETTER SWEET CORN

Culture—Rich land makes the sweetest corn. A succession of plants give corn all summer. Plant different kinds for variety. Select seed stock improves quality and yield. Cook as soon as possible after picking.

276 Early Sensational. Most wonderful variety. Extra sweet, juicy and tender. Creamy white, earliest and most prolific. Often bears two to three ears to a stalk. We believe it has the finest flavor of any variety.

Sweet Corn
Early
Sensational

289 Berry's Double Crossed Hybrid Bantam. Eight to ten days earlier than any other corn. Very prolific. Kernels golden yellow, of excellent flavor.

Postpaid Price on each of above 2 varieties: Two-oz. Pkt., 10c; ½ lb., 30c; 1 lb., 50c; 3 lbs., \$1.35; 5 lbs., \$2.00. Not Prepaid: 10 lbs., \$3.50.

277 Golden Bantam. Best known and most popular yellow variety. Bright, golden yellow, exquisite color, very sweet and tender.

278 Delues Golden Giant. Excels in size, quality and rich sugary flavor. A mid-season variety. Golden yellow; twice as large as Bantam.

279 Early White Cory. Best extra early white cob variety. Good sized. Kernels white, sweet, and of good flavor.

280 Peep-o-day. Remarkable for its earliness, tenderness and extreme sweetness. A very heavy yielder.

281 Early Sunshine. An early yellow variety particularly desirable for market garden use. Kernels golden yellow, sweet and of good flavor.

282 Howling Mob. Early and productive. Large, thick ears. Kernels clear white, plump, and of fair quality.

283 Early Minnesota. A very dependable productive variety, popular for home and market garden. Kernels white, sweet and tender.

Early White
Cory

286 Kendall's Giant. A second early variety, ears attractive and of tremendous size. Kernels pure white, sweet and tender.

288 Mammoth Late. A very late variety, producing large ears, sweet and tender, of delicious flavor.

Postpaid Price on each of above 9 varieties: Two-oz. Pkt., 5c; ½ lb., 25c; 1 lb., 40c; 3 lbs., \$1.05; 5 lbs., \$1.50. Not Prepaid: 10 lbs., \$2.50.

284 Country Gentleman. A superior late prolific variety of excellent quality, used for canning, valuable for home and market gardens. Narrow, irregular grains.

287 Stowell's Evergreen. The best known standard main crop sweet corn. Excels all others. Extensively used by canners. Kernels clear white, deep, medium width, sweet and tender.

Postpaid Price on each of above 2 varieties: Two-oz. Pkt., 10c; ½ lb., 30c; 1 lb., 45c; 3 lbs., \$1.20; 5 lbs., \$1.75. Not Prepaid: 10 lbs., \$3.00.

Golden
Bantam

CHOICE LETTUCE

Does best in rich loam with plenty of organic matter. Grows best in spring and fall. Give partial shade for mid-summer growing. A succession of sowing two weeks apart is advisable. For head lettuce sow in hot bed and transplant as early as possible.

Early Curled Simpson

326 Black Seeded Simpson. A popular early loose-leaved variety, large leaves, best for forcing, crisp and tender.

327 Early Curled Simpson. One of the most widely used for home gardens. Very early, non-heading, excellent flavor.

328 Grand Rapids. Excellent for early planting outside and for forcing. Superior quality, beautiful appearance, leaves light green, heavily fringed.

329 Early Prizehead. An early non-heading variety. Remains tender and crisp. Leaves medium green, light brown edges.

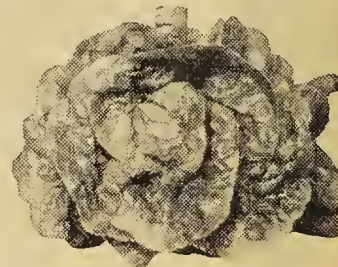

330 May King. An extremely early, fast growing type. Heads small and compact, with a fine rich, buttery flavor.

332 Improved Hanson. Unsurpassed for home and market garden use. Heads large and compact, tender and sweet.

333 Selected Big Boston. A very popular variety for forcing; splendid shipper. Very solid heads, extremely tender.

334 California Cream Butter. Desirable for market garden and shipping short distances. A cabbage lettuce, particularly rich and buttery to the taste.

336 Iceberg. A large late variety, with handsome curly leaves, light green in color. Heads compact, crisp and sweet.

California Cream Butter

Postpaid Price on each of above 9 varieties: Pkt., 5c; oz., 12c; ¼ lb., 35c; ½ lb., 65c; 1 lb., \$1.25.

331 Crisp as Ice. Attractive, bronze, glassy leaves, sure header. Popular for the home garden.

335 Berry's Bountiful. Grows beautiful compact heads. Exceedingly tender, creamy flavor. None excels.

337 New York Wonderful. The outstanding shipping variety. Leaves dull green, excellent quality, fine flavor.

Postpaid Price on each of above 3 varieties: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; 1 lb., \$1.35.

POP CORN

Culture—May be planted a week earlier than sweet corn because the seed is harder. Plant some for good eats and fun next fall and winter.

301 White Rice. Grains clear white, long and pointed at the top. Pops out large and tender.

303 Japanese Hull-less. Dwarf grower, small ears. Kernels hull-less, snowy white when popped, fine flavor.

Postpaid Price on each of above 2 varieties: Two-oz. Pkt., 5c; ½ lb., 20c; 1 lb., 30c; 3 lbs., 75c; 5 lbs., \$1.00. Not Prepaid: 10 lbs., \$1.75.

304 South American (Dynamite). A sensational new variety. Kernels yellow, pop to immense size. Stalks grow larger than field corn, with two to three ears on a stalk. Postpaid Price: Two-oz. Pkt., 5c; ½ lb., 20c; 1 lb., 35c; 3 lbs., 90c; 5 lbs., \$1.25. Not Prepaid: 10 lbs., \$2.00.

Popcorn

DELICIOUS MUSKMELONS

CULTURE—The culture of Muskmelons is like that of Watermelons given on next page. Place hills close together, 4 to 6 feet apart. Cover seeds a little deeper, about 1 inch. All melons should have frequent but shallow cultivation. A large crop can be grown from comparatively small plots if good seed and proper care is used.

Berry's Favorite Musk Melon

GREEN FLESHED

401 Extra Select Rocky Ford. Probably the most widely known cantaloupe. Green flesh of delicious flavor. Fruits weigh about 2½ lbs. Our seed extra selected.

408 Montreal Market. Fruits very large, thick, green meated, delicious and sweet.

412 Early Haekensack. A standard first early variety. Hardy and prolific. A netted melon, flesh green, thick, of fine quality.

Postpaid price on each of above 3 varieties: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00; 5 lbs., \$4.50.

403 Honey Dew. Grows to enormous size. Smooth white skin. Round in shape. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 45c; ½ lb., 75c; 1 lb., \$1.35; 5 lbs., \$5.00.

405 Small Green Nutmeg. Flesh thick of fine flavor. Fruits weigh 7 to 8 lb., globular. Popular with market gardeners. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 80c; 5 lbs., \$3.50.

407 Pollock No. 25. An excellent shipping variety of the Rocky Ford type. Flesh thick, deep salmon center with green tone near rind; sweet spicy flavor.

417 Gold Lined Rocky Ford. A most desirable variety, flesh beautiful green, very sweet.

Postpaid price on each of above 2 varieties: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 55c; 1 lb., \$1.00; 5 lbs., \$4.50.

SALMON FLESHED

402 Berry's Favorite. Distinct new variety with particular merit. Rich salmon colored flesh, very sweet, excellent in flavor. Small red seed cavity. Postpaid price: Pkt., 10c; oz., 15c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.75; 5 lbs., \$8.00.

404 Burrell's Gem. A good shipping melon. Rocky Ford type, with golden meat of excellent flavor. Weighs about 3 lbs.

SALMON FLESHED

Continued

406 Improved Large Yellow Cantaloupe. A finely improved variety. Weighs 15 to 20 lbs. Flesh thick, light tan in color.

409 Golden Prince. One of our newest selections; sweetest, richest flavored of all golden fleshed melons. Similar to Osage.

410 Shumway's Giant. Grows to monstrous size, creamy yellow. Very early.

413 Hoodoo (Hearts of Gold). Fruits practically round, weighing about 2 lbs. Tender, juicy, sweet and delicious. A good shipper.

415 Emerald Gem. One of the best early varieties. Fruits small to medium, globe shaped, slightly ribbed. Skin deep green, flesh salmon color. Not a good shipper.

416 Tip Top. Very productive, fine appearance, showy. Fruits pale green, turning to yellow at maturity, flesh bright salmon, sweet and delicious.

418 Osage. The finest flavored "Queen" of salmon-fleshed melons. Flesh exceptionally thick, tender and sweet. Fruits weigh around 6 lbs.

Postpaid price on each of above 8 varieties: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.00; 5 lbs., \$4.50.

411 Sugar Rock. Also called Honey Rock. A distinct new variety, very outstanding. Medium to large and a good shipper. Flesh thick, orange-salmon, with fine flavor. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 40c; ½ lb., 70c; 1 lb., \$1.25; 5 lbs., \$5.75.

414 Banana. Resembles a banana in shape, growing 18 to 30 inches long. Flesh salmon color, with banana-like flavor.

419 Lake Champlain. A melon valued for its extreme earliness and splendid for sections with short growing seasons. Medium size, moderately netted, practically round. Beautiful sweet, salmon-colored flesh.

420 Hale's Best. One of the earliest of the large melons. Fruits oval with medium heavy netting. Flesh deep salmon color, firm, fine-grained, richly flavored.

Postpaid price on each of above 3 varieties: Pkt., 5c; oz., 10c; ¼ lb., 35c; ½ lb., 55c; 1 lb., \$1.00; 5 lbs., \$4.50.

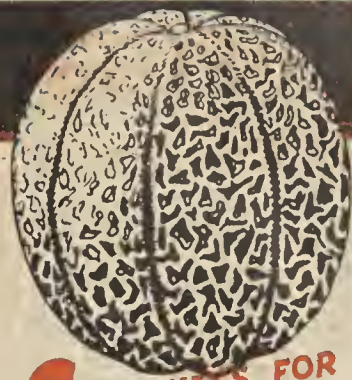

MUSTARD

710 Chinese Curled. The best known and most popular for greens. Large leaves. Ready for use in 6 weeks after sowing.

711 White. Best for salad or general use. Grows rapidly. Goes to seed quickly.

712 Brown. Stronger and more pungent than other varieties. Seeds used for ground mustard.

Postpaid price on each of above 3 varieties: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.

LUSCIOUS SUGARY WATER MELONS

**SELECT
NORTHERN
GROWN
SEED**

**6 PACKETS FOR
25¢**

We urge you to try
Berry's Mammoth Melting
Sugar for big extra quality
melons. See description
below.

CULTURE—Melons prefer a sandy or well drained loam soil. Mixing well rotted manure in the soil of each hill increases production. Have hills 6 to 8 feet apart. Plant 6 to 8 seeds per hill with tip downward. Cover $\frac{1}{2}$ inch. Do not plant until ground is thoroughly warm. Give a southern exposure if possible.

WHITE SEEDED—Continued

Postpaid price on each of previous 3 varieties: Pkt., 5c; oz., 15c; $\frac{1}{4}$ lb., 45c; $\frac{1}{2}$ lb., 75c; 1 lb., \$1.25; 5 lbs., \$5.00.

352 Halbert's Honey. Sweet as Kleckley's, more uniform. Rind very tender; exceptionally sweet, delicious flavor.

354 McIver's Sugar. One of the sweetest melons grown. Growing season.

355 Peerless or Ice Cream. Flesh bright scarlet, thin rind. One of the best early melons for the home garden.

356 New Irish Grey. Very productive. Excellent shipper. Fruits large, oblong, uniform; flesh bright red and very firm. Extra sweet to rind.

359 Monte Cristo. A northern strain of Kleckley's Sweet. Fine flavor.

360 Tom Watson. Most popular of all for shipping. Excellent quality. Very large, flesh bright red, of good flavor.

362 Light Icing. Improved fruit is very uniform, long, flesh deep red. Excellent for home markets.

363 Fordhook Early. Medium sized and one of the best extra early melons. Splendid quality. Good for cool growing sections.

367 Alabama Sweet. A great shipping melon of the long type. Flesh bright red, fine grained, sweet.

368 Berry's Improved Kleckley. Considered superior to others, nothing better. Flesh tender and extremely sweet. Desirable for home markets. Bluish green skin.

370 Georgia Rattlesnake. A rattling good, vigorous melon. Flesh sweet and of good quality.

372 Phinney's Early. Second early, medium size, flesh pinkish red, crisp and sweet.

369 Golden Honey. Excellent for home and market gardens. The finest yellow meated melon. Early. Fruits nearly round, crisp and delicious.

Postpaid price on each of above 13 varieties: Pkt., 5c; oz., 8c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.

377 Stone Mountain. A new round melon, skin smooth, of light green color. Weighs about 45 lbs. Flesh deep crimson, free from stringiness, fine grained, sweet. Good shipper. A very high quality melon. Postpaid Price: Pkt., 5c; oz., 10c; $\frac{1}{4}$ lb., 35c; $\frac{1}{2}$ lb., 60c; 1 lb., \$1.00; 5 lbs., \$4.50.

MISCELLANEOUS

374 Named Varieties Mixed. Twenty-five of the best varieties grown, carefully mixed. Postpaid price: Pkt., 4c; oz., 5c; $\frac{1}{4}$ lb., 20c; $\frac{1}{2}$ lb., 35c; 1 lb., 60c; 5 lbs., \$2.75.

375 Apple Pie. Similar to citron. Heavy yielder, easy to grow and a good winter keeper.

376 Red Seeded Citron. Grows uniformly round. Flesh white and solid. Used for preserves and pickles.

Postpaid price on each of above 2 varieties: Pkt., 5c; oz., 8c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.

BLACK SEEDED

353 Hungarian Honey. Round in shape, skin dark green, flesh bright red, and very sweet. Mid-season variety. Small dark brown seeds.

357 Harris Earliest. Extra early, fine for northern climate. Fruits medium sized, flesh pink-red of good flavor.

361 Black Seeded Angeleno. Known as Angel Kiss. Skin dark; excellent flavor.

365 Cole's Early. A sure cropper, thin rind, flesh deep red and sweet. Excellent for north.

366 Berry's Early Honey Drip. A round mid-season melon. Delicious flesh.

373 Cuban Queen. Very crisp and sugary, rind medium thick. An enormous yielder and a good shipper.

Postpaid price on each of above 6 varieties: Pkt., 5c; oz., 8c; $\frac{1}{4}$ lb., 25c; $\frac{1}{2}$ lb., 40c; 1 lb., 70c; 5 lbs., \$3.00.

WHITE SEEDED

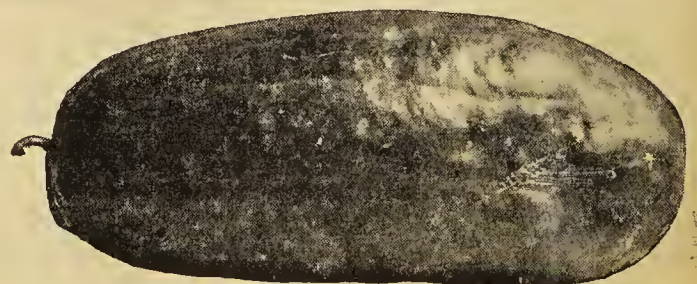

351 Berry's Mammoth Melting Sugar. Most valuable home or market melon. Ripens early. Luscious flavor, deliciously sweet. Extra large size. An ideal selection. Rates A No. 1.

364 Berry's Sugar Stick. A very fine melon, flesh deep rich red, very sweet and delicious. Rind very thin, but stands shipping.

378 Pride of Muscatine. A new Wilt-Resistant strain of Kleckley Sweet. Recommended in areas where wilt is prevalent. Rind is thick, dark green skin, and red flesh. Is a very good shipper. An excellent selection.

Stone Mountain

Berry's Mammoth Melting Sugar

SWEET SOLID ONIONS

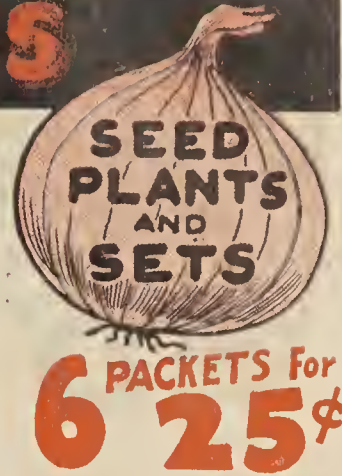

Sweet Spanish

CULTURE—Onions want a reasonably, but not excessively rich soil. It should be well drained and prepared with care. Sow the seed when danger of hard frost is past. Cover the seeds lightly. Thin when 3 to 4 inches tall so as to give bulbs time to develop. Give frequent but shallow cultivation. Onions are full grown when tops begin to die.

PURE NEW ONION SEED

Guaranteed seed, absolutely dependable, of the finest strains, best American stock.

425 Sweet Spanish. Largest and mildest of all onions. American strain producing large globe types. Golden yellow skin, flesh white.

428 Large Red Wethersfield. One of the best winter keepers. Early ripening, but grows throughout the season. Skin deep purplish red, flesh white flushed with pink.

430 Mammoth Silverking. One of the largest in cultivation, averaging from 15 to 22 inches in circumference. Uniform in size, matures early. Skin is silvery white, and flesh tender, mild and sweet.

434 Berry's Enormous White. Bulbs large, skin pure white. Can be raised from seed in one season.

427 Mammoth Prizetaker. One of the largest onions, sometimes weighing 6 lbs. Fine flavored; straw color.

Postpaid price on each of above 5 varieties: Pkt., 5c; oz., 25c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.90; 5 lbs., \$13.75.

431 Ohio Yellow Globe. One of the preferred yellow globe types for commercial use. Hard, solid flesh, excellent keeper.

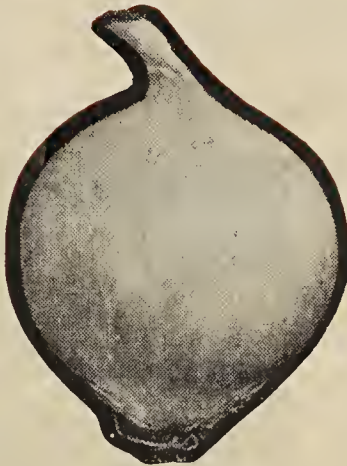

Southport Red Globe

436 Southport Yellow Globe. A distinct type, popular for commercial use. Flesh white and mild.

429 Berry's Gigantic Globe. Extremely large yellow globe. Good quality.

Postpaid price on each of above 3 varieties: Pkt., 5c; oz., 30c; ¼ lb., \$1.25; ½ lb., \$1.80; 1 lb., \$3.75; 5 lbs., \$17.50.

432 Southport Red Globe. The finest of the red onions, a perfect globe, handsome. Postpaid price: Pkt., 5c; oz., 25c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.90; 5 lbs., \$13.75.

Southport White Globe

433 Southport White Globe. Best white variety. Yields abundantly. Flesh fine grained, mild.

435 Yellow Globe Danvers. A good cropper, used largely for storage. Flesh fine white, mild.

Postpaid price on each of above 2 varieties: Pkt., 5c; oz., 30c; ¼ lb., \$1.00; ½ lb., \$1.90; 1 lb., \$3.50; 5 lbs., \$16.25.

437 Australian Brown. Medium sized, very solid and excellent for market. Very early.

438 White Queen. Pure white, small flat onion. Used for pickling. Sow early.

439 Mountain Danvers. Beautiful dark yellow. Excellent for storage. Medium early.

441 Mammoth Silverskin or White Portugal. A large onion, skin and flesh white, mild flavor. Excellent for sets, pickling, bunching, and storage.

443 Ebenezer. An excellent variety for producing sets of exceptional keeping quality. Enormous cropper.

426 Improved Large Red Wethersfield. Superior in size, color, quality and yield. A most dependable standard variety. Excellent keeper.

Postpaid price on each of above 6 varieties: Pkt., 5c; oz., 25c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.90; 5 lbs., \$13.75.

440 Crystal Wax. Improved type, waxy white, flat sweet onion.

442 Yellow Bermuda. Skin light straw color, flesh nearly white. Noted for excellent flavor. Will mature from seed.

Postpaid price on each of above 2 varieties: Pkt., 5c; oz., 20c; ¼ lb., 75c; ½ lb., \$1.45; 1 lb., \$2.75; 5 lbs., \$12.50.

Southport Yellow Globe

BERMUDA ONION PLANTS

Grown from genuine Bermuda stock. You will find these plants superior in quality to many on the market. It's worth the small difference in cost to secure quality that really satisfies.

450 Yellow and White. Postpaid price: 300 plants, 40c; 1,000, \$1.00. Not Prepaid price: 3,000, \$2.50; 6,000 (Crate), \$3.95. F.O.B. Shipping Point.

GARLIC SETS

448 Garlic Sets. A bulbous root of the onion type, easily grown, used for flavoring. When leaves turn yellow, dig and dry in shade.

Postpaid price: ¼ lb., 15c; ½ lb., 25c; 1 lb., 40c. Not Prepaid price: 10 lbs., \$2.50.

ONION SETS

There is a distinct shortage of onion sets this year. This was due to a wet spring, late sowing and unfavorable growing conditions. Under these circumstances many off grade sets will find their way to markets.

Our Onion Sets are of finest quality, small in size and in good condition. They are all guaranteed. We can take excellent care of your order and especially so on early orders. Prices subject to market change.

440 Yellow Sets

445 Red Sets

Postpaid price on each of above 2 varieties: 1 lb., 35c; 3 lbs., 95c. Not prepaid price: ¼ bu., \$1.60; ½ bu., \$2.50; 1 bu., \$4.50.

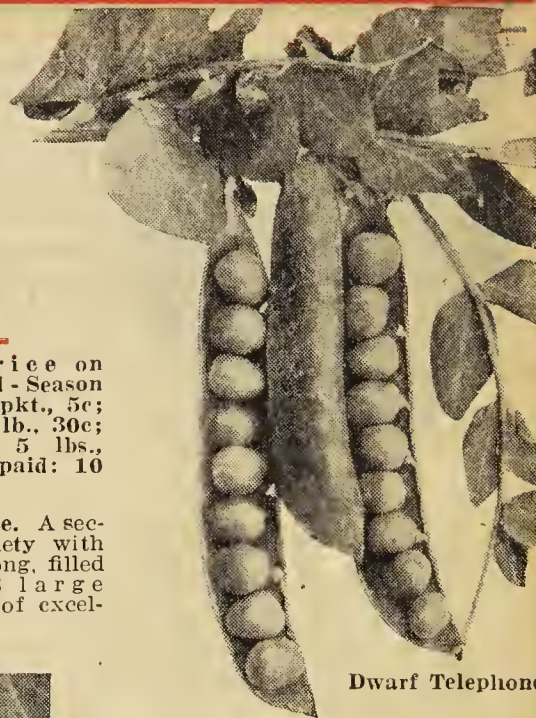

446 White. Postpaid price: 1 lb., 35c; 3 lbs., 95c. Not Prepaid price: ¼ bu., \$1.75; ½ bu., \$3.00; 1 bu., \$5.00.

White Icicle

RADISHES

CULTURE—Sow as soon as ground is moderately warm. They require a quick, rich soil. Slow growing radishes are too pungent. Make a succession of plants every two weeks till warm weather. Fall seedings may be made. Winter radishes may be stored. Allow them to remain in the ground as long as possible without danger of frost damage.

Crisp Snappy Relishes

526 Crimson Giant. The largest and best globe shaped. Superior quality.

528 Early Scarlet Turnip. Roots small round and red skin. Flesh very white, crisp and mild.

529 Early Round Dark Red. Market gardener favorite. Rapid grower. Sweet and tender.

530 Early White Turnip. Flesh crisp, pure white. Has a short top and is a quick grower.

531 Early Long Scarlet Short Top. An old standard variety. Quick of growth, long, slender roots, extra short tops, deep, rich scarlet color.

532 White Strasburg. Large, white, 5 inches long, crisp and tender. Good market variety.

533 French Breakfast. Extremely early. A medium sized radish, olive-shaped, scarlet with white tip, flesh white and crisp.

534 Cincinnati Market. The finest long, red radish. Crisp, mild and tender.

535 Early Scarlet Turnip, White Tipped. Roots nearly round, carmine red, white tipped. Flesh white, crisp and mild.

537 Long White Vienna. A very rapid grower. Roots 5 to 6 inches long, white and crisp.

538 Improved Scarlet Globe. Roots globular, bright scarlet, crisp, tender and of fine quality.

539 Rosy Gem. Globular with scarlet top, blending into white. Exceedingly tender and delicious.

540 Mixed. This mixture is of over 20 choice varieties, early, medium, late.

541 New Icicle. A very fine white radish, roots long, slender; flesh clear white, brittle, mild flavored.

542 Chinese Rose. A popular, very distinct winter sort. Bright rose-red in color; flesh white, very firm, and pungent.

Scarlet Globe

Radishes, Contd.

543 Long Black Spanish. A large black-skinned radish.

544 California Mammoth White. An excellent fall variety. Flesh white, crisp and not pungent.

545 Saxa. Principally a forcing sort. Tops very small, bright scarlet in color; flesh white, crisp and mild.

You will be delighted with its dark red glossy fruits. Its thick meat is deliciously flavored. Its early maturity gives you ripe tomatoes ahead of most others. Continues bearing for a long time. Fine well shaped big fruit. Postpaid price: Pkt., 10c; oz., 40c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

652 John Baer. An early sort excellent for gardeners serving local markets and for canning. Especially good for northern sections. Vines of medium height. Fruits medium sized, scarlet red, quite firm.

653 Earlibell. Fruit is a beautiful deep glossy red and remarkably large for extra early. Vines vigorous and productive. Very popular with our trade.

654 Early June. The earliest of the pink fruited varieties. Vines rather short but abundantly set with fruit. Fruits medium sized, smooth, purplish pink. Fine sub-acid flavor.

655 Earliana. Vine medium small. A first early sort desirable for market garden trade. Fruits deep scarlet, medium to large, exceptionally smooth. An excellent producer. Very widely grown.

656 Field's Early Redhead. Color deep blood red, globe shaped; skin smooth, seldom cracks open. Extra early and an excellent variety for home or market.

657 Early Michigan. One of the best second early sorts for general market. Vines vigorous and productive. Fruits medium to large, smooth, deep rich red, of excellent flavor.

Postpaid price on each of above 6 varieties: Pkt., 5c; oz., 30c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.75.

658 Livingston Beauty. One of the best pink fruited sorts. Medium late. Plants sturdy, good yielders. Fruits medium large, smooth, purplish-pink, of good quality.

Greater Baltimore

672 Greater Baltimore. Fruits are large, thick-flat, smooth and of a deep red color. Vines are large and medium heavy. Used extensively for canning and by market gardeners.

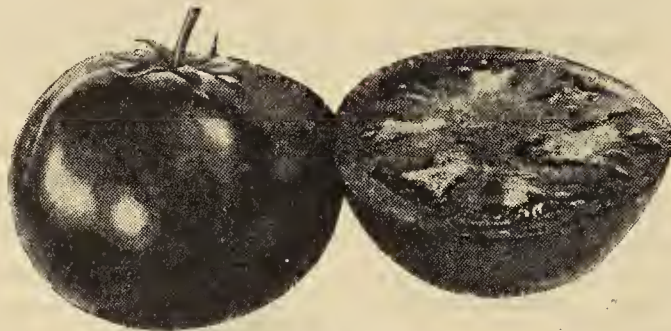

Postpaid price on each of above 4 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

670 Breakaday. A Wilt Resistant Variety. One of the earliest to ripen. Developed by U. S. Department of Agriculture. Moderate vine growth. Prolific yielder. Fruits orange-red, medium large, smooth, solid and heavy. Very few seeds. Be sure to raise some of these.

CULTURE—Start plants in warm place about eight weeks before field planting. If possible transplant to cold frame when 2 inches high. We recommend tying plants to stakes and pruning for earliest biggest and healthiest tomatoes. Use several varieties so as to have plenty of late and early tomatoes. This is one of the finest foods to grow. They are very rich in vitamins. Tomatoes do best in a rich well manured soil.

671 Oxheart. A newer and distinctly attractive variety. Very popular with home and market gardeners. Fruits extremely large, heart-shaped, pink; very solid, meaty, and of mild flavor. If you want to show your friends something about raising tomatoes, grow some Oxhearts.

Postpaid price on each of above 2 varieties: Pkt., 10c; oz., 50c; ¼ lb., \$1.75; ½ lb., \$3.25; 1 lb., \$6.00.

New Marglobe

662 Golden Queen. The leading large yellow variety for main crop planting. Fruits medium large, deep golden yellow, and smooth. Greatly relished because of their delicious mild flavor. Be sure to try some.

664 Berry's New Tree. Popular in the south. Grows on an upright stalk. Fruit solid, with very best flavor. Splendid home garden variety.

667 Yellow Plum. Oval plum-shaped fruit about 2 inches long. Used for pickling and preserves. Very productive.

668 Red Pear. Fruits pear-shaped, borne in clusters; valuable for preserving and salads. Sweet and delicious. A heavy producer.

Postpaid price on each of above 4 varieties: Pkt., 5c; oz., 30c; ¼ lb., 80c; ½ lb., \$1.50; 1 lb., \$2.75.

665 New Marglobe. Introduced by U. S. Department of Agriculture. It justly deserves its great popularity. Rust and wilt resistant and therefore highly desirable. Vines are vigorous and very productive. Fruits scarlet, medium large, smooth, solid, fine flavored. We recommend this highly.

666 Berry's Improved Ponderosa. Vines large and spreading. Fruits very large, purplish pink, solid, of inviting flavor. Exceptionally good for home use. If you want to grow some big extra heavy tomatoes, grow our Ponderosa.

Postpaid price on each of above 2 varieties: Pkt., 10c; oz., 40c; ¼ lb., \$1.50; ½ lb., \$2.75; 1 lb., \$5.00.

669 Ground Cherry or Husk Tomato. Fruits small, round, yellow, of delicate flavor. Used for preserves. Postpaid price. Pkt., 5c; oz., 35c; ¼ lb., \$1.00; ½ lb., \$1.90; 1 lb., \$3.50.

Berry's Early Wonder Tomato

LATE or MAIN CROPS

661 Matchless. A reliable mid-season variety, well adapted to canning. Plants strongly productive. Fruits large, quite smooth, cardinal red. This is a dandy.

663 New Stone. Popular with canners and market gardeners. Vines large, very productive. Fruits large, smooth, attractive scarlet-red, of fine flavor.

Postpaid price on each of above 2 varieties: Pkt., 5c; oz., 20c; ¼ lb., 60c; ½ lb., \$1.10; 1 lb., \$2.00.

Ponderosa

LIVE, VIGOROUS SEED in EVERY VARIETY

TURNIPS

CULTURE—Turnips do best during cool weather and on rich land. For an early crop sow as soon as ground can be prepared. Thin to 3 inches. Roots will be ready before hot weather. Fall seedings are made the latter part of July until the middle of August or after. Dig after several frosts. Remove tops before storing in pit or cellar.

601 Purple Top Strap Leaf. Medium early, very productive, popular for home and market garden use. Tops medium small, roots flat, 4 to 6 inches across. Purple-red at the top; flesh white, fine grained and tender.

602 New White Egg. Tops medium sized, upright, cut leaved.

Roots white, egg-shaped and smooth. The skin is thin. The fine grained flesh cook mealy and tender. Excellent quality.

603 Red Top Strap Leaf. Roots slightly flattened, upper part reddish, white below. Flesh mild and tender.

605 Large White Globe. A very desirable globe-shaped turnip. Young roots valuable for home garden and market trade.

607 Purple Top White Globe. An all-purpose variety. Tops dark green, large, erect, strap leaved. Roots globe shaped with purple top, flesh white, sweet, crisp and tender.

609 Cowhorn. Grown largely for stock feed, but also used for garden planting. Tops large, upstanding. Roots 12 to 15 inches long tapering, often crooked. Flesh tender and mild flavored.

Postpaid price on each of above 6 varieties: Pkt., 5c; oz., 10c; ¼ lb., 20c; ½ lb., 35c; 1 lb., 60c; 5 lbs., \$2.50.

604 Sweet German. The flesh is white, hardy, firm and is highly recommended for winter and spring use. Popular in New England states.

606 Extra Early Purple Top Milan. An extra early sort, tops small, strap leaved. Roots flat, with purple top, flesh clear white, fine grained, sweet and tender.

608 White Milan. Extremely early. Tops small. Roots medium small, flat, sweet and tender.

Postpaid price on each of above 3 varieties: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 75c; 5 lbs., \$3.00.

RUTABAGA

611 New Monarch or Elephant. Yields larger roots and more per acre than any other sort.

612 Improved Purple Top Yellow. A dependable variety. Roots large, round, yellow with purple top; flesh light yellow, firm, sweet and tender.

Postpaid price on each of above 2 varieties: Oz., 10c; ¼ lb., 20c; ½ lb., 30c; 1 lb., 50c; 5 lbs., \$2.25.

KOHL-RABI

A delicious vegetable, bulb shaped, which combines the flavor of cabbage and turnip.

695 Early White Vienna. Dwarf variety. Excellent for home and market garden use. Bulbs 2 to 3 inches in diameter, globular, very light green; flesh white, tender and crisp.

696 Early Purple Vienna. Desirable early dwarf variety. Bulbs globular, purple, with white, tender flesh.

Postpaid price on each of above 2 varieties: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; 1 lb., \$1.25.

TOBACCO

Sow seed as soon as frost is over, on land well pulverized. Can use wood ashes ahead of planting.

726 Connecticut Seed Leaf. Best adapted to middle and northern climates. Grown principally for the manufacture of cigars.

727 Havana. An early variety used largely for cigar wrappers, on account of the thinness and fine quality of the large leaves. Rich flavor.

728 White Burley. Broad attractive leaves. Easy to cure. Used for fillers and wrappers.

Postpaid price on each of above 3 varieties: Pkt., 5c; oz., 40c; ¼ lb., \$1.25; ½ lb., \$2.25; 1 lb., \$4.00.

MISCELLANEOUS

Brussels Sprouts

676 Brussels Sprouts. Of the cabbage family, highly desirable for home and market garden. Plants thickly set with firm cabbage-like balls, maturing successively. Postpaid price: Pkt., 5c; oz., 20c; ¼ lb., 50c; ½ lb., 90c; 1 lb., \$1.75.

680 Cress, Fine Curled. A hardy, quick growing plant, leaves finely cut. Its pleasing pungent flavor makes it excellent for garnishing. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 45c; 1 lb., 75c.

681 Cress, Water. Grows along streams and by ponds. Long stems, broad, thick leaves, with spicy flavor. Desirable for salads, and as a garnish. Postpaid price: Pkt., 5c; oz., 40c; ¼ lb., \$1.40; ½ lb., \$2.50; 1 lb., \$4.00.

690 Kale, Dwarf Green Curled Scotch. A member of the cabbage family, used for greens. Leaves large

and crimped. One of the most palatable of vegetables. Postpaid price: 5c; oz., 10c; ¼ lb., 30c; ½ lb., 50c; 1 lb., 90c.

701 Leek, London Flag. Belongs to the onion family; used for soups and stews. Postpaid price: Pkt., 5c; oz., 15c; ¼ lb., 35c; ½ lb., 60c; 1 lb., \$1.10.

715 Vegetable Orange, or Vine Peach. Fine for pickles, preserves, etc. Postpaid price: Pkt., 5c; oz., 15c; ¼ lb., 40c; ½ lb., 75c; 1 lb., \$1.25.

720 Okra Long Green Poddled. The best variety that you can plant. Plants dwarf and very productive. Valuable for soups and stews. Postpaid price: Pkt., 5c; oz., 10c; ¼ lb., 25c; ½ lb., 40c; 1 lb., 70c.

ORNAMENTAL GOURDS

1255 Hercules Club. About 3 feet long.

1256 Finest Mixed. All kinds and sizes.

1257 Japanese Nest Egg. White fruits, the size and shape of an egg.

1258 Dipper. The ripened fruits hold about 1 qt. each.

1259 Dishcloth. Inside lining sponge-like when ripe.

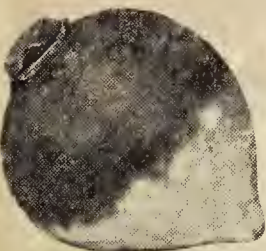

Postpaid price on each of above 5 varieties: Pkt., 5c; oz., 10c; ¼ lb., 40c.

1321 **Finest Mixed Petunias**. Annual. Choice

strains, including many large flowering varieties. Pkt., 5c.

1322 **Petunia, Balcony Blue**. Deep violet-blue. Showy. Excellent for porch boxes, beds, borders, around lily ponds, etc.

*1325 **Pansy, Paris Prize**. Annual. No other flowers seem so human as pansies. This mixture contains a good variety of colors.

*1326 **Pansy, Trimardeau Mixture**. Annual. Flowers are large and present a lovely range and variation of color.

*1327 **Pansy, Berry's Giant Mixed**. Giant size flowers, with colors of rich dark shades, very striking.

*1329 **Poppy, Oriental**. Perennial. One of the showiest, most brightly colored flowers grown. 2-3 ft.

Postpaid price on each of above 5 varieties: Pkt., 10c.

1330 **Poppy, Double Carnation Flowered**. Annual. Large flowers with fringed petals, many colors.

1331 **Poppy, Shirley**. Annual. Large, graceful, satiny flowers borne on tall stems.

1332 **Double Finest Mixed Poppy**. Annual. Includes best double large flowering varieties.

Postpaid price on each of above 3 varieties: Pkt., 5c.

1333 **Physalis (Chinese Lantern)**. Perennial. 1½ ft. Flowers yellow with dark center. Produces balloon-like husks the second year from seed. Turns bright red when ripe. Pkt., 10c.

1335 **Peas, Everlasting**. Perennial. Flowers similar to Sweet Peas, but lack their fragrance. Pkt., 10c.

1340 **Resurrection Plant**. A curious novelty. Requires no soil; place in lukewarm water; opens into a beautiful fernlike plant. Postpaid price: 10c each; 60c dozen.

*1345 **Salvia (Scarlet Sage)**. A very showy annual, to grow in front of foundations and shrubs, to edge canna beds, etc.

1346 **Salvia Bonfire**. Annual. Makes a compact bush about 2 feet high and 2 feet in diameter. Extra fine scarlet.

1348 **Salpiglossis**. One of the easiest annuals to grow, rich in color.

1349 **Shasta Daisy**. Perennial. Fine hardy border plant. Has large daisy-like flowers.

1350 **Berry's Half-dwarf Mixture Snapdragon**. Annual. Their beautiful colors and fragrance are wonderfully pleasing.

*1351 **Berry's Tall Mixed Snapdragon**. Annual. Best for cut flowers.

Postpaid price on each of above 6 varieties: Pkt., 10c.

1352 **Statice (Sea Lavender)**. Perennial. Fine flower clusters on graceful stems. Can be used for winter bouquets. Pkt., 5c.

MISCELLANEOUS BULBS

High Quality Stock

- 1425 **Cinnamon Vine.** Grows 30 feet in a single season. Glossy, heart-shaped leaves. Delicate white fragrant flowers. Dies down in winter, but comes up again in the spring. Strong, healthy roots.

- 1445 **Madeira Vine.** One of the best and most popular climbers for foliage effect. A rapid grower with light green, heart-shaped leaves. White, feathery fragrant flowers. Strong roots.

- 1480 **Tuberose—Giant Flowering.** Annual excelsior Dwarf Pearl-Mammoth. This Mammoth Strain is the highest type of Tuberose. The beautiful fragrant flower spikes are borne on long stems, making them desirable for cut flowers. Large size bulbs. Postpaid price on each of above 3 varieties: 10 for 35c; 100, \$2.50.

- 1485 **Caladium—Elephant's Ear.** Annual. Most effective as single plants on the lawn, massed in beds, or for margins of water. Leaves often attain a length of 3 feet by 20 inches wide. Bulbs can be stored in dry sand over winter. Postpaid: 25c each; 4 for 60c.

BARGAIN PRICES SEED POTATOES

Northern Grown Seed Stock

Every experienced potato grower knows that he gets his heaviest yields and finest quality by using northern grown seed. Most of them get new seed every year. Many experiments have proved this profitable. Minnesota seed has done the best of all.

We handle only Minnesota Seed stock. It is all graded and inspected seed. All shipments are guaranteed to arrive safely and to show up to your satisfaction. Mail your orders early. Shipment will be made as soon as weather conditions make it safe.

This is a year when you will find it vitally to your interest to select quality seed. Improved seed stock will prove a very wise investment.

EARLY RED RIVER OHIO

Our seed of this variety is fine. They mature extra early. They are good keepers and money makers. Our stock comes direct from the Red River Valley. It is real seed. Planting such seed gives increases of 25% to 100% over most home grown potatoes. The quality is distinctly superior. There is a better demand for such potatoes, and much better profit in growing them.

Our Early Red River Ohios have a light pink skin. Flesh is pure white. Produces good sized uniform tubers. Eyes are near the surface. Very little waste in peeling. Vines grow upright. Potatoes grow in a clump. Easy to dig. Our northern grown seed matures about two weeks earlier than southern stock, giving you the advantage of earlier markets and better prices.

BERRY'S GENUINE IRISH COBBLER

Our Cobblers are one of the finest potatoes you can grow. They are in a class by themselves. Enormous yielder. Well formed. Finely flavored. Skin and flesh white. Cooks dry and mealy. Greatly superior to the mushy kind. A splendid keeper. Tubers are large, rather round with some oblong. Smooth skin with deep set eyes. Vigorous, thrifty growers. Medium early.

You may have grown Cobblers before but we feel sure you have never raised any equal to these. They are wonderfully popular. You don't have to pay long prices for some fancy variety to get an extra quality potato. Grow some of Berry's Genuine Cobblers and you'll have something to brag about.

LATE VARIETIES

Banner

A superior variety of the later type. Roots deeply in dry season. Thrifty grower and a remarkable drought resister. Produces smooth plump handsome tubers. Beautiful creamy white. Eyes strong and on the surface. Skin slightly netted. Cooks quickly, dry and mealy. Shape a little oblong and slightly flattened. As nearly blight and rustproof as can be. A splendid keeper and enormous yielder. Medium late in maturity. Very popular. We know you'll like them.

BERRY'S IMPROVED BONANZA

Greatly improved in hardiness and yield. A very high quality potato. Reddish skin, very white flesh. Firm grained, very dry and mealy. We consider this the most desirable main crop variety. Best yielder, keeper and shipper. Vigorous dark green vines. Withstands lots of heat and drought. We sell many carloads of this variety and recommend it highly. Excellent for market or home use. Medium early maturity. It sure is a dandy variety. Be sure to include it in your order.

CARMEN No. 3

A very heavy producer. Practically every potato of marketable size. Both skin and flesh are white. Eyes few and shallow. Excellent table qualities. No hollow hearts, and no dark or hard spots. If you wish a white skinned potato of the late type you will find this a very profitable variety. It sure is a money maker.

RURAL NEW YORKER No. 2

Another wonderful late kind. One of the best keepers. Smooth, shallow eyed and prettily shaped. Exceptional drought resister. A great yielder. Chosen by many as the best of main crop varieties. A sure producer of excellent quality potatoes. If you want some potatoes that will keep in fine shape until the new crop is ready. Plant some of our Rural New Yorkers. They will satisfy you.

SPAULDING ROSE

Between early and late in maturity. Color slightly red. Shape long and very large. Flesh white and mealy. Wonderful yielder. A great potato for locality of a short season. Strong vines. If you want a variety that is not too late and yet not an early potato this will make a fine selection.

SIR WALTER RALEIGH

Pure white in color. Round to oblong in shape. Finely grained. This is a newer variety than some, but well established as one of the leading main crop potatoes. It is steadily becoming more popular because its many high points of fine quality and big yields are proving it an exceptional money maker. Our seed wins friends everywhere it goes. It is in great demand and we urge you to try it.

Price in small lots, any variety. Postpaid, 1 lb., 20c; 5 lbs., 65c.

Penna.

Dear Sirs:

I have
been using
your seeds
for thirteen
years which
in itself means

quite a lot. I have found
your seeds satisfactory and
always saved money by
buying from your Com-
pany. My Sudan was won-
derful and your Dakota
No. 12 Alfalfa was the only
field in the neighborhood
that did not show bare
spots after the first winter.

Yours,

P. G. Lichtenwalner.

RED CLOVER

See
Sample Enclosed

Beautiful, Hardy, New Crop

Attention Red Clover buyer. Here is a bargain that's a real one. Look at the enclosed sample. See those big bold high colored berries. Note that bright, vigorous shine on the seed. That means strong germination and vitality. See how clean and uniform it is. This seed has real quality. Here is value that will please our critical customers. Now see the price. It's a bargain—while it lasts. Quality considered it is under priced from \$1.50 to \$2.50 per bu. Compare with any other. See for yourself.

PRACTICALLY WORLD BRAND QUALITY

Such beautiful, hardy new crop seed is hard to find this year. There is a very small percent of Alfalfa in it. Otherwise it would grade World Brand and our price would be about \$1.25 per bu. higher. Most prices run \$2.50 a bushel higher.

Mixing a little alfalfa with Red Clover is becoming common practice. Many farmers have found in this way that their land would grow Alfalfa. Lot Leader will do everything that the finest straight clover will do.

ORDER THIS SEED EARLY

We are proud of being able to offer you such seed at so low a figure. But we can't duplicate it later. Place your order now and assure yourself a share in this sensational bargain. You can return it and get your money back if you are not perfectly satisfied that you have saved at least \$1.50 per bu.

OTHER RED CLOVER VALUES

See page two of this book for descriptions of our regular grades of Red Clover and see page 32 for prices. Our World Brand grade has satisfied our critical customers for forty years. Every grade is a money saving value. Samples sent free on request. Early buyers will make the biggest savings.

THE FINEST
QUALITY at a
BARGAIN PRICE

MAMMOTH RED CLOVER

Priced to save you money

Critical and thrifty buyers are served alike in our World Brand grade. The quality meets all demands of exacting farmers. Our low price satisfies the sense of thrift. There is always true economy in such a superior value.

Here is extra fancy, northern grown Mammoth. It is re-cleaned and tested. The plump, high colored, seed is packed with strength and vitality. It contains no noxious weeds. Such seed goes farther. It is far cheaper and infinitely more satisfactory than the average seed you can buy.

Our World Brand seed gives you every possible assurance of clean, heavy, healthy stands. That means larger and more profitable crops. This is a matchless value. Short crops and advancing markets make it advisable to order what you need early. See page 2 for description and price list for quotations on other grades of dependable character.

Mammoth Clover is a large variety of Red Clover. It lives longer. It is also known as Sapling and Big English Clover. Superior for soil building. Extensively grown when seasons are too short for two cuttings and wherever an extra heavy crop is desired. Genuine Mammoth always sells at a premium. Buy early. Seed crop very short this year.

F.O.B. CLARINDA OR
CHICAGO

A
SENSATIONAL
VALUE

Auburn, Mich.

Gentlemen: I find you always live up to your advertisement, "Quality seeds at lowest prices." Your clover is putting my soil back to profitable land and at your low prices we can plant more of it.

Yours truly,

August Krieger.

ALSIKE CLOVER

LOT ECONOMY

\$ **14⁴⁰** Bu.

A Fine Seeding at Low Cost

A special lot. A most remarkable value and a real bargain. One of the surest seedings to make a stand. A bushel sows 6 to 8 acres. Seeding cost is low and production heavy. Our price is drastically low. Alsike production was very short last year. General price range is higher. Only early quantity buying and selling direct makes such a surpassing value possible.

Alsike is a perennial clover. One seeding lasts several years. Grows on all soils except very dry ones. Seed is very small and goes a long ways. Almost sure to make a stand. Best clover for wet or sour land. Fine in hay or pasture mixtures. Higher in feeding value than Red Clover.

Description

Lot Economy makes a cheap seeding yet a very good one. We secured this seed at a most attractive price because it contains some Timothy. That makes a wonderfully productive seeding but can be purchased for less because it is mixed. Runs over half pure fine Alsike. When sown at 10 lbs. per acre gives 80 Alsike seeds per square foot. At 8 lbs. per acre, 60 Alsike.

Do not confuse this with the ordinary mixture of Alsike and Timothy. It is a far different article. Sells at 60 lbs. per bushel. You can cut your seed bill 20% to 30% by using Lot Economy. It's guaranteed to satisfy you. Your money back if you can duplicate it anywhere. It's nice, clean, high germinating seed.

ALSIKE CLOVER

Highest Quality—Bargain Prices

Our finest, cleanest, plumpest and brightest colored grade. Distinctly superior to much that is sold as the best. Expect something extra fine when you order this grade. You'll get it. This seed will give you complete satisfaction.

Alsike clover seed production is very short this year. Crop reduced about 40%. Only early buying makes our present prices possible. See page 32 for prices on the grades. Check our quality and prices. We will save you money at all times but the biggest savings this year go to early buyers.

Valuable Crop—Low Seeding Cost

Use Alsike for hay and pasture. It is higher in feeding value than Red Clover. Stands a more acid soil. Easier to get a stand. It lives for several years. A bushel sows 10 acres. Less is used when sown in mixtures. This fine, smooth stemmed clover makes a very valuable crop.

See page 2 for description and price list for quotations on other dependable grades. All seed is re-cleaned, tested and guaranteed. Send us your Alsike order this year. We'll save you money or give your money back. See price list other grades.

1 lb. postpaid, 50c; 5 lbs., \$2.00.

Dorset, Ohio.
Dear Sirs: I have been using your seeds for years back and I find them the best seeds I can buy. I have saved money on the seed orders I purchased from you. I gladly recommend you as reliable company to deal with.

Yours respectfully,
LAWRENCE S. GIDDINGS.

\$ **18⁶⁰** PER BU.

LOT ALSIKE MERIT

Extra Value at Low Cost

Again our customers share in an exceptional purchase. This low price on this fine seed is possible only because we had ready cash to snap up two cars on a quick deal.

It is a fine lot of Alsike containing a small percent of White Dutch Clover, and Timothy. For all practical purposes it is just as good as pure Alsike. In fact, we prefer a little mixture to help hold up the Alsike. Runs over 90% pure Clovers. Lot Merit is one of the most nutritious seedlings. It's well re-cleaned. No harmful weed seeds in it. Strong growing power.

One bushel sows 8 to 10 acres. It is a wonderful value and guaranteed to satisfy.

See page 2 for description of our regular grades of clovers and page 32 for prices.

\$ **16⁵⁰** PER BU.

LOT SURE-GROW COMBINATION

Alsike and Red Clover

This fine lot of Alsike has a little Red Clover in it. Preferred by many farmers to straight Alsike.

The stronger stemmed Red helps the Alsike grow erect. Produces a heavier yield. Makes excellent hay. Fine quality re-cleaned seed guaranteed to satisfy.

Our direct-to-farmer price makes this an unbeatable bargain. It is a wonderful value for the money. Very economical to sow. Only takes about six pounds per acre. Makes a great clover seeding at only a dollar and a half per acre. Values such as this are most convincing proof that it pays to trade with Berry's.

White Dutch Clover

The clover for pastures and lawns. Very small seeded. Four pounds sows an acre. See page 32 for prices, also see page 64.

\$ **15⁶⁰** Bu.

TIMOTHY WORLD BRAND

10.50
PER BU.
99½% PURE

Highest Grade—Iowa Grown Supplies Shortest in History

Last year Timothy was only 1/3 of a seed crop. This year it almost "aint." No carryover from last year and now production almost a total failure. Naturally prices are high but at that there will not be enough to take care of the orders. We most urgently advise every customer wanting Timothy to buy at once if possible.

In spite of the shortage we have secured a few cars of dandy new crop, Iowa Grown seed. We can supply you with our famous World Brand quality. This has been the choice of our most critical customers for a period of forty years. This is always seed of beautiful quality and our price for such a grade is always low.

See page two for description of other grades and page 32 for prices. We will save you money on Timothy so long as our supply holds out. Timothy is one of the surest grasses to make a stand. A seeding lasts several years. The acre cost is not extremely high. If you want Timothy seed be sure to order early.

DOMESTIC RYE GRASS

A Quick Growing Grass For Early Seeding

Many farmers do not know this grass yet the United States government recognizes it as one of the Nation's important cultivated or tame grasses. In Europe it is very extensively grown and makes the phenomenal yields of 12 to 20 tons per acre. It will not produce like that in this country but it is the heaviest producing grass for early seeding.

Domestic Rye Grass is light green in color. Leaves are a little broader than Blue Grass and grows much taller. Requires no nurse crop. In fact it grows so fast that it is often used as a nurse crop for other grasses. Do not confuse this with the Rye that is grown for grain. It is entirely different. Seed resembles blue grass only quite a bit larger.

If you need a grass for early pasture or hay, something to sow early, you will find this grass to answer your purpose exceptionally well. For a full seeding use about 25 lbs. per acre. Lighter seedings may be made. Buy early for present prices. See page 32 for prices. Postpaid, 1 lb., 25c; 5 lbs., \$1.00.

PHALARIS OR REEDS CANARY GRASS

A Most Remarkable Grass at New Low Prices

The most valuable grass that has been brought to farmers in many years. It is not a new grass, but it is only in the past few years that its adaptation to various conditions and its great value have become well known.

Characteristics

It is a long lived perennial. Stands of it have been known to be established for 45 years. It makes a very dense sod, yet can be easily eradicated. Phalaris is very winter hardy. It can be grown anywhere in the Northern half of the United States. The growth is very leafy. It will grow on land that is flooded with water for long periods of time. On the other hand, on average farm land it will outyield Timothy, Bromus, Orchard or Tall Meadow Oat Grass. Even under drought conditions in Iowa it yielded over 3 tons of hay per acre. It is higher in feed value than most grasses.

Seed prices are much lower than last year. Write for free circular on Phalaris and learn all about this wonderful grass. Good money in seed crop.

Postpaid Prices: 1 lb., \$1.40; 5 lbs., \$6.25; 10 lbs., \$12.00.
Not Prepaid: 10 lbs., \$11.50; 25 lbs., \$25.00; 50 lbs., \$47.50; 100 lbs., \$90.00.

Stoddard, Wisconsin.
Dear Sirs: In the spring of 1931 I purchased some of your Lot More-Hardy Alfalfa at \$10.50 per bushel. I also used some high priced seed from another firm. All sowed on the same ground. Your seed made a good stand, the other failed. You saved me money and I got better results.
Yours truly, ALBERT J. JONAS.

GARDEN
FLOWERS
BULBS
NURSERY
STOCK

We thank you for writing us. Our catalog is being sent to you herewith. Please study it carefully. You will find we carry a complete line of garden and flower seeds. These are all very carefully selected and tested and they are guaranteed to grow. See our guarantee on page 4. You will also find a fine assortment of flower seeds. See pages 19 to 22.

OUR
GUARANTEE
PROTECTS
EVERY
CUSTOMER

Flower and Garden seeds are too expensive to sample free but our guarantee gives you full protection as to quality. Considering the selected character of our seeds you will find these prices very low. A trial will convince you.

You will find it to your interest also to read our money saving prices on bulbs on page 23. If you are a buyer of nursery stock be sure to study pages 53 to 62 of our catalog. There you will find many items. Ornamental shrubbery, Vines, Peonies, Iris and Perennial plants. There are Roses too and Small fruits, Fruit trees, Shade trees, Evergreens, etc. There is some valuable information as well as extremely low prices to be found on these pages. For lawn grasses see page 64.

We know that the quality of our seeds and nursery stock will please you. You can check prices and see that you can save money by trading with us. Our aim is to so take care of your order that you'll be glad to come back again. It is to your interest to get that kind of stock and that kind of service.

Let us have your order soon because in many lines supplies are short. You can get the best of service and values by acting now. An envelope and order blank are enclosed for your convenience. May we hear from you soon?

CROP**

SWEET CLOVER

Varieties

The **Common** or **Big White** is the kind most generally grown. Lives two years. Grows 6 to 8 ft. high if not cut. For pasture and soil building this variety ranks highest. Has big powerful roots that go down deep. They decay quickly when crop is plowed under.

Grundy County White lives two years. Does not grow so large, generally not exceeding 3½ ft. It is about 3 weeks earlier than Common. Seed is smaller.

Yellow Biennial lives two years. Larger than Grundy but not as large as Common. Matures in between the two. Finer stemmed and more leafy.

Hubam. An annual or one year variety. Makes complete growth in one year. In big demand when it is desired to plow under the crop in the fall of the same year it is sown. Resembles common white when growing.

Banner Sweet Clover Year

This year is going to witness the most extensive sowing of Sweet Clover that has ever taken place. Our November and December sales of this seed broke all records. Every pound of this seed that can be scraped together will be needed to fill the demand. We are giving you sound advice when we suggest that you buy your requirements just as early as possible. Seed crop is shortest in history.

Farming conditions during the past few years have been ruinous to many farms. Rotations have been sadly disrupted. Fertility has decreased. Erosion has increased. Soils have become slow to respond and harder to work.

Rebuild Your Land Now

Now is the time to restore and reclaim. Farm prices are better. Improvement should continue with certainty. Every acre should be put in shape to give a maximum of production at the lowest cost for labor. Expanded acreage is not necessary but the acres farmed should be made to produce grain crops profitably.

Sweet Clover is an ideal crop to use under these conditions. It surpasses all other crops in its quick soil building powers. It stores large quantities of Nitrogen in the soil, increasing fertility. It adds vast quantities of humus. That helps to stop erosion, makes ground easier to work and less apt to dry out hard. The bacterial life in the soil is increased so that plants will thrive better. Heavy soils drain better and sandy soils hold more water. A crop of Sweet Clover plowed under is equal to 25 big loads of manure.

A Very Valuable Pasture

Then again it is a wonderful pasture crop. Can be pastured the first fall with one to two head of cattle per acre. Three to four head the second year is no exception and you put on hogs besides. Even then you may have to clip it to keep it down. Less danger of bloat and with a straw stack accessible to stock practically no danger at all.

Sweet Clover generally makes a hay crop the first year and two the second. Its greatest value is as pasture or fertilizing crop. Further its drought resisting properties make it a life saver in many years.

Seeding Suggestions

Sow sweet clover in the early spring just like Red Clover. Use about 15 lbs. of seed per acre. Your seed bed should be as firm as possible. Generally a light covering is advisable. If at all possible roll the land after seeding.

A fine way to handle sweet clover is to take pasture or hay the first year and plow under in the spring of the second year and plant to corn. This generally makes an increase of 20 to 25 bushels of corn per acre. It is an ideal crop under present conditions. Use it liberally.

BLUE RIBBON BARGAINS

**UNHULLED
SWEET CLOVER**

ALL RECLEANED SEED

\$2.20 at CLARINDA

PER BU.

30 LBS. to BU.

\$2.35 at CHICAGO

PER BU.

BAGS FREE

White Blossom

Thoroughly re-cleaned unhulled seed is the best to use for early winter seeding. It is better than hulled seed either scarified or unscarified. Germination is slower. Will not start to grow during a warm spell in winter. Becomes firmly embedded in the soil. Waits until spring, then grows rapidly. Many customers report that the sowing of our unhulled seed early in the winter gave them the finest stands they ever had. Sow about 20 lbs. per acre. Just broadcast it. No seed bed preparation necessary. If convenient cover it a little before growing season starts. Otherwise let nature take care of it.

Our seed is all fancy new crop very carefully cleaned seed. It is a high grade product and our prices the lowest ever made since the crop was as scarce as it is this year.

Buy Now—Save Money—Sow Early

Blackstone, Va.

Gentlemen: I have used your seeds for many years with satisfaction. The quality has never disappointed me. The price, excellency of the seed considered, has been much lower than I could secure elsewhere.

Very sincerely,
BENJ. R. MORSE.

3 WORLD BEATERS

SWEET CLOVER

BLUE RIBBON BARGAINS

LOT GROW-MORE

**EXTREMELY
LOW
PRICES
IN SPITE
OF SHORT
CROPS**

Extremely Low Price—Extra Good Values

This lot stretches your money over more acres than any other. You receive a dependable seeding too. That is why it is such an exceptional bargain.

This is the Big White or Common Sweet Clover. It has been scarified by the famous Eddy process, which is far superior to any other method. All our scarified Sweet Clover is handled over this machine. It gives higher and stronger germination. Very few seedsmen use this method. Some do not scarify at all.

4.80
PER BU.

Very Carefully Prepared

Lot Grow-More is a product of the modern efficient Ferrell cleaning and grading machines. Carefully cleaned and scientifically graded, it is a reliable value. Its appearance isn't quite as nice as our best grades, but it will give entirely satisfactory results. The purity and germination tests are good. Some of the berries are a little smaller. The color is a little below our high standard. There are more seeds per pound. It performs right along with better grades.

This Grade in Big Demand

We have many customers who demand this kind of seed and have sold it for many years. These farmers judge by results only. The price this year is so sensationally low that everyone can afford to sow it. No other clover seedling is as cheap. A most remarkable value for so little money. Such a bargain will go fast. Place your orders early.

We guarantee complete satisfaction. Return it if you are not thoroughly pleased with your purchase.

**LOT
WONDERFUL**

\$5.40
PER BU.

An Astonishing Bargain

You will find further proof of our leadership in the Sweet Clover industry in this attractive bargain. Not quite so fine as Lot Premium. Somewhat larger berries and a little better color than Lot Grow-More. It is the straight common or big White Sweet Clover. This is the grade that a good many dealers sell. It is nice clean stock. Our seed is scarified by the Eddy process, making it a superior product.

Saves You Money

This lot, like every other in this book, is guaranteed to save you money. Return the seed and get your money back if you don't consider it an exceptional bargain. This seed is absolutely reliable. With good seed so cheap you will find it good business to sow a large acreage to Sweet Clover. Your land needs such a crop. Good farming demands clover. Start this money-making crop. Use it for pasture and hay. Cash in on its great soil building power.

Your cash outlay is small when you use such seed. You will be getting something thoroughly reliable and you'll make some money. This bargain will "Beat-'em-All."

**WORLD BRAND
WHITE SWEET CLOVER**

See Sample Enclosed

Consider what it means to you always to get the finest seed by simply placing two words "World Brand" on your order. We have customers who have been doing that for over 25 years. They have never failed to be perfectly satisfied with their purchase. There is no seed that could give you better assurance of success. Many dealers do not handle such extra quality.

Lowest Prices Now

Note our price. Compare it with prices on the best you can buy anywhere. You secure through us the direct benefits of early buying in large quantities. Now seed markets have advanced. Seed Production was very short and in many sections a failure. Prices will advance further because the need for new seedings will create an enormous demand for this seed. Now, while we have those early stocks on hand, is the time to buy. Why pay more money now, than our direct to farmer policy makes possible?

A Saving Guaranteed

Our beautiful World Brand grade is a magnificent value at our price. The other grades described on page 2 and priced on price list are also attractive values. Every grade thoroughly cleaned, scarified and tested. No guess work—no gamble. If you don't agree that you have saved money your money plus freight will be refunded. Order our World Brand if you wish all big plump berries, high bright color and extra high purity and germination. We are specialists in sweet clover and we want your business. That's why our prices are so low.

\$5.90
PER BU.

Binghamton, N. Y.

Dear Sirs: I have used your seeds for some time and I have had good results. I have used other seeds, but they are too high. I save about a third in buying from you and get better results.

Yours truly,
MIKE ZOPP.

WORLD BRAND YELLOW SWEET CLOVER

\$6.00
PER BU.

An Extra Value

See the low price. Consider the extra fancy quality. This is another proof of Berry's leadership in Sweet Clover. Bueller-Ferrell, cleaned and Eddy scarified. There is no finer seed on the general commercial market. We guarantee this equal to the best obtainable. Then why pay more money?

Yellow Sweet Clover is in great demand. It is finer stemmed than the white and more leafy. Does not get so rank. Matures about 10 days earlier. Many say it is easier to grow. Provides pasture in abundance. Makes hay superior to white. Works wonders in soil improvement.

Brings Better Profits

Farmers generally are in dire need of clovers. They will restore humus, fertility and profits. Land will be easier to work. It will drain better yet hold the proper moisture at the surface for growing crops. Make your soil perform better. Use Sweet Clover to do the job. It will improve land quicker and at lower cost.

Our prices are guaranteed to save you money. See price list for price on our Planet Brand. Let us take care of your Sweet Clover needs. We can serve you far better than the average.

Lakefield,
Minn.

Dear Friends:
I like your seeds and recommend them to others. Your seeds do well in this section. I save money by buying from you. I am well satisfied and am sure other farmers will, too.

Yours truly,
JOHN GREIN.]

MORE SWEET CLOVER BARGAINS

GRUNDY COUNTY LOT WORLD BRAND QUALITY

A Smaller White Sweet Clover

Not small compared with other clovers. Grows about 3½ feet tall as compared to 5 to 6 feet for common white. It blooms about three weeks earlier. Matures its seed more evenly. It is easier to handle. In big demand when the common grows too rank. Its use is rapidly spreading throughout the corn belt and up into Canada. It is cheaper to sow because the seed is smaller. Only takes 12 pounds per acre compared to 15 of common white.

\$6.00
PER BU.

Superior Quality at Lowest Price

We secured some beautiful genuine Grundy County seed early. It can't be replaced today at anywhere near so low a figure. Our price reflects the saving. Every buyer will share in it until the original stock is sold. Then it will have to be higher prices.

This is World Brand seed. It is always economical. Remember that when you compare prices. Quality is the only true basis of value. Check only with the finest. Get samples to show quality. We know our prices are low. There is no guess work as to grade. This seed is recleaned, scarified, tested and guaranteed a superior value.

Assure yourself of
sharing this
bargain by
placing
your
order
early

**HIGH
GRADE
WHITE
SWEET
CLOVER**

**LOT
PREMIUM**

A Very Fancy Quality

A magnificent value for quality buyers. Just a shade under our World Brand in color. Has dandy nice berries. High purity and germination. Thoroughly cleaned and scarified. Better than much of the so-called best grades. Such seed at this price is a bargain that cannot be duplicated later. Our present prices can be made only for prompt buyers. Short crops and big demand is forcing markets steadily higher.

Thoroughly Dependable Seed

You can rely on such seed to produce as satisfactory stand as any. Sold subject to your approval. If you do not consider it an outstanding bargain and a great value send it back and get your money refunded promptly. This is one of those special lots that is full proof of our leadership in the Sweet Clover line. Buy direct from specialists. Secure scientifically prepared seed. It costs you no more. Compare and you will find our prices lower and decidedly so.

\$5.70
PER BU.

HUBAM

Annual White Sweet Clover

The drouth played havoc with Hubam Clover production. This is a one year crop and therefore the seed crop comes from the new seeding each year. New seedings failed. Therefore the seed crop is very short. There should be good money in raising Hubam seed this year.

Hubam is so popular because it does its full work in one year. Sow like other clovers in the spring. Plow it under in the fall or cut it for hay or seed. Practically equal to alfalfa in feeding value. Excellent bee pasture. Wonderful soil builder.

Our seed is fine recleaned scarified stock. Supplies, however, are very, very short, so buy early if you wish some of it.

KOREAN CLOVER

\$2.50 PER BU.

**Grows on the poorest land
Wonderful pasture — Excellent Soil Builder.**

A VERY VALUABLE CROP

This clover came into use a comparatively few years ago. It is no longer an experiment but a crop of proven value. Its merits and its limitations should, however, be understood so it may be used in the most profitable manner. You should know where, how and when it will grow and how it compares with other crops for hay, pasture and soil building.

Korean is a Nitrogen gatherer and will improve the poorest land where other clovers cannot even get started. It will resist more heat and drouth than any other clover. It will stop soil washing and will grow in ditches and gullies.

CHARACTERISTICS

Korean is an annual. It grows only one year from a seeding. It reseeds itself very readily and matures seed even after plants have been killed by frost. Thus it is proving itself adapted farther north than was at first thought possible. It is steadily and surely working its way north into Iowa, Illinois, Ohio, Indiana and even into Wisconsin. If it does not reseed itself it will not come up the next year. When it does reseed the stands get heavier from year to year. Korean Clover is not a good competitor of Red and Sweet Clover and Alfalfa. That is those crops are more profitable if they can be grown successfully. But on poor land where those crops do not grow readily, Korean is a very valuable crop.

PASTURE VALUE

Korean shows its greatest worth in pasture. It does not afford much feed early but produces its best during the latter part of June and in July and August up to killing frosts. Therefore Korean gives pasture when most other grasses are dormant because of heat or drouth. No matter how close it may be pastured the crop will reseed if heavy frosts do not come too early. We therefore recommend Korean as a mixture for all pastures, new and old. You can thicken up old pastures by just broadcasting the seed during the winter or when the ground is checked by freezing and thawing.

VALUE AS A HAY CROP

Korean does not grow very tall. To get a good hay crop the stand should be heavy. While it is not tall the stems are very leafy and a surprisingly large yield can be secured from a stand that seems fairly short. One of our customers reports a yield of three tons per acre and a seed crop afterwards. This was in central Missouri.

SEEDING SUGGESTIONS

The firmer your seed bed the better your success. Just broadcast seeding during winter or early spring. If sown with spring grain just scatter on top and then roll the land. Be sure to avoid covering it much. Sow 12 to 15 lbs. per acre. Land should have fair drainage.

SEED QUALITY AND PRICES

All Korean Clover looks very much the same to inexperienced eyes. There is, however, a lot of difference in quality both in purity and germination. Off quality seed looks all right and can be purchased for less money. Insist on the best if you want to succeed.

Our stocks are new crop and of the very best qualities obtainable. Considering quality we guarantee our prices lowest. We have quality stocks that are really bargains. Such values make it very much to your interest to trade with us. Let us take care of your order and we will do our utmost to satisfy you. Present prices are for prompt orders as the seed supplies are considerably shorter than last year. Write for free circular on these Lespedezas.

SERICEA LESPEDEZA

SOUR LAND

Also called sour land alfalfa

A perennial. Comes up from the roots in the spring. Has survived winters as far north as in New York state. First year's growth rather light. Throws out more shoots every year. A 5 or 6 year old plant has been known to produce 100 stems. The plant is extremely leafy. Leaves are about half the size of alfalfa leaves and extend to the base of stems.

At Tennessee Experiment Station second year Sericea produced 3.17 tons of hay per acre as compared to 1.98 tons for second year alfalfa. Yields of 3.90 tons are reported. Plants grow to 3 and 4 feet. Superior to Alfalfa and Red Clover on poor sour soils. Exceptionally good on land with heavy, tight and poorly drained subsoils. Has a powerful tap root that branches extensively. A great soil builder.

This crop is highly resistant to drouth. Seed crop matures in October. Seed yields range up to 900 lbs. per acre.

This crop demands a very firm seed bed and a light covering. Do not sow too early. About the middle of April in southern Iowa is suggested.

Sow 2 lbs. per acre in rows 30 inches apart if you wish to keep it cultivated. 10 to 12 lbs. per acre are used for a broadcast seeding. Sow two times as much if unhulled seed is used. Broadcasting and then rolling is excellent practice. Deep covering will result in failure, $\frac{1}{8}$ to $\frac{1}{4}$ inches is plenty and have your seed bed as firm and solid as possible. May be used in permanent pasture mixture. See page 32 for prices. We handle only scarified seed but base our weight on unhulled (25 lb. bu.) so as to avoid confusion with other Lespedeza. Small lots postpaid, 1 lb., 60c; 5 lbs., \$2.50; 10 lbs., \$4.50.

HARBIN LESPEDEZA

This crop has received much publicity during the past few years. This is really not a distinctly different variety but an early strain of Korean Lespedeza. The reason so much has been written about Harbin because it makes it possible to move Lespedeza further north. Korean does not make seed in the northern tier of states and therefore has to be reseeded there every year. Harbin, however, matures seed and re-seeds itself as far north as Canada.

Harbin is not a tall growing clover and is therefore not recommended for hay. It is a great clover to have in pasture mixtures. Harbin makes its best growth in mid-summer when other grasses and clovers are low in production. It is also a good drouth resister so it can be depended upon to furnish the finest kind of pasturage during a season when it is most urgently needed.

This year and perhaps for several years there should be good money in seed production as the demand for this seed promises to become very large. See Korean Clover for seeding suggestions. For seed production drill in rows about 20 inches apart, using 3 lbs. per acre. Cut and thresh like red clover.

We have a very fine quality of seed, although supplies are still very limited. Our prices are much lower than the average as we are not trying to make a "killing" on this seed. It is all high quality new crop seed.

Postpaid prices, 1 lb., \$1.10; 5 lbs., \$5.00; 10 lbs., \$9.00. Not prepaid, 1 bushel or 25 lbs., \$20.00.

Watson, Missouri.

Dear Sirs: I have used your seeds for fifteen years and have found them the best for the money. The Berry Seed Co. has saved farmers thousands of dollars by selling good seeds at popular prices. They are reliable.

Yours, M. A. McNEAL.

INOCULATE ALL LEGUMES

Showing difference in yield between crop from inoculated and not inoculated seed.

The cost per acre is small. The extra returns are large. Bigger yields and better soil building.

Inoculation Necessary

No legume can flourish without proper inoculation. Often the lack of inoculation means a failure. This applies to all clovers, alfalfa, peas, beans and vetches. The same inoculation does not answer for all. There are several distinct species. Therefore land may be inoculated for one legume and be utterly lacking for another variety.

You may have inoculating bacteria in your soil. If a certain legume has been growing successfully on your land in the past few years, then it is reasonable to assume that you do not have to inoculate the seed of that crop when you reseed. If such a crop has not been grown recently on your land, there is no way of telling if it is inoculated.

Don't take chances. The acre cost of inoculation is a minor item. If you neglect to inoculate you may lose your seedling because of it. Inoculation puts live bacteria on your seed. They go into the roots after the seed sprouts. Then and then only can your legume plant take nitrogen from the air for its own growth and for soil building. Without inoculation the plant uses up the nitrogen in the soil and then generally turns yellow and dies.

We sell inoculants that are guaranteed satisfactory. Your money back if they fail to do their work properly. See column on opposite page.

NEW IMPROVED CERESAN

Disinfects small Grain for two cents a bushel

A dry treatment. Easy to apply. Controls stinking smut of wheat, covered smut and stripe of barley and loose and covered smuts of oats. Does not cause seed to clog in drill nor cause excessive wear or drill breakage. Measuring spoon in each can. Easy to apply. Half an ounce treats a bushel. Makes better stands and larger yields of grain. Prepaid: 1 lb., 75c; 5 lbs., \$3.00.

See page 47 for Corn treatment, and page 24 for Potatoes.

CLIPPER SEED CLEANER

Farmers who have purchased one of these cleaners from us consider them a very profitable investment. They are sturdily built and operate on the same principle as our standard machines. They greatly improve the quality of grains and other seeds. Your products bring much better prices. Machine often pays for itself in one year. Write for circular. Two sizes. Price: 1-B, \$34.00; 2-B, \$42.00.

CYCLONE SEED SOWER

The most satisfactory low priced grass and grain seeder we know of. We have sold thousands of them. Quickly adjusted to different kinds of seeds. Easy to operate. Turning geared crank gives nice even distribution. Saves seed, helps get better stands. Complete instructions on each machine.

See illustration on page 63. Price \$2.00 f.o.b. Clarinda or \$2.25 postpaid.

INOCULATING LEGUMES PAYS

A Wise Investment

In the opposite column we have explained the absolute necessity of proper inoculation. Below we describe two varieties of inoculating material. Both are easy to apply and guaranteed to produce nodules if used as directed. Simple directions on each can.

All you need to do is to add some water to the inoculating material. Sprinkle this on the seed, mixing thoroughly. Dry in shade and seed is ready to sow. We can place the can in the bag of seed or send it to you postpaid. You can apply it about the time you are ready to sow.

When ordering be sure to specify what crop you plan to use it on.

Berry's Nodule Germ

We have reduced our prices on this standard guaranteed inoculant. It is a high quality product. Comes to you fresh and teeming with strong virile bacteria. Your money back if it fails to make nodules. Scientifically prepared and easy to apply.

Postpaid Prices

Alfalfa and all Clovers

1/2 bu., 30c; 1 bu. size, 50c;

CORN-BELT ALFALFA

The most economical alfalfa seed for the great Corn Belt section

HARDY and HEAVILY PRODUCTIVE

AUTHENTIC REPORTS from STATE EXPERIMENTS

We have verified the reports of our customers on Corn-Belt Alfalfa by checking reports from various state authorities. The information gained from these sources shows the performance of Corn-Belt seed in a convincing manner.

From Nebraska eastward through Iowa, Illinois, Indiana, Ohio, Pennsylvania and New Jersey. Northward through New York, Michigan, Wisconsin, Minnesota and South Dakota we find excellent reports on the yielding qualities of this seed. Wisconsin specifically reports that Nebraska common has done as well as any common. It is recommended that if winter killing is severe that Grimm be selected but if common Alfalfa is used this stock is equal to any.

Southern states show the same superior qualities for this Corn-Belt Alfalfa. Its adaptability is even more wide spread than indicated by the map on this page. We have simply shown on this map the section to which we consider our Corn-Belt Alfalfa especially adapted. To every customer in this section we say, "You can save money and get dependable seed by specifying Corn-Belt Alfalfa in your order."

Be sure you get genuine Corn-Belt by looking on the test tag for the trade-mark as shown above. This service is for your protection and to save you money. Get started with Corn-Belt Alfalfa this year and learn what wonderful crops it produces.

This page heralds the beginning of a new service to buyers of Alfalfa seed. Now there is established by registered trade-mark name a type of alfalfa that will always be suited to corn belt farmers. And—this is important—it will be available to you at lower prices than other seed which will do no more for you. Now and in the future years you can be assured of saving with safety by specifying Corn-Belt Alfalfa on your order.

Why It Is so Dependable

Heretofore many have thought that to get hardy common Alfalfa one must specify Montana or Dakota seed. Experiments by experts and by practical farmers have shown this is not true. Common Alfalfa from Nebraska has done just as well as common from Montana in our northern states. Kansas Alfalfa has shown up fine. In other words seed grown in the corn belt will do well any place in the corn belt as well as any grown in the extreme north. Since such seed is equally hardy and equally or more productive why pay premium prices for other seed?

GRADES of CORN BELT ALFALFA

In order to assure you of getting always dependable quality when you order Corn-Belt Alfalfa this name has been trade-marked and registered. The use of this mark is closely restricted. Watch for it. It is designed for your protection.

This Corn-Belt Alfalfa seed comes in different grades. These grades are separated largely according to color and size of berries. Read page 2. Our World Brand is the finest. See page 32 or our latest price list for quotations. We guarantee to save you money on any grade that you may select. We also carry Grimm in the Corn-Belt and consider the quality as hardy as any Grimm from any state. See back cover of our catalog for special offer on World Brand Corn-Belt Grimm.

We have found Corn-Belt Alfalfa heavier in production. Our customers are especially enthusiastic about the heavy yields. Let us help you save money on Alfalfa seed that is thoroughly adapted to the corn belt.

North Liberty, Indiana.

Dear Sirs: Your seeds are the best I ever used. The Yellow Biennial Sweet Clover is certainly the best. Every seed came up. I am well satisfied and can recommend your seeds highly.

Yours truly,
ELDEN KANE.

ALFALFA

We guarantee our Alfalfa values to be the finest bargains obtainable anywhere.

LOT BED ROCK

Grimm Alfalfa

U. S. Verified Origin Seed

Priced even lower than last year

Grimm Alfalfa is placed within reach of every farmer who wants this super-hardy variety. This is a very low price on such quality U. S. Verified origin seed. This grade has given our customers highly satisfying results. Has good growing power. Produces exactly the same kind of Alfalfa as higher priced seed.

This drastically low price is possible because we obtained some Grimm seed that was somewhat discolored. It would not classify for fancy colored grades. Berries are a little smaller. While the germination per hundred seeds is a little lower there are so many more seeds per pound that this is fully compensated for. Actual tests per ounce show more sprouts than an ounce of larger berried kind.

A Heavy Producer

We sell this seed because we know that it has the ability to produce good, strong, vigorous stands. In appearance it isn't the best but from a practical standpoint it delivers the goods. Sow 15 pounds per acre. Seed is recleaned and guaranteed to satisfy. If you want to get a good start with Grimm at a low cost, order this lot. It is a genuine bargain and a big one.

U. S. Verified Origin

We are "Authorized" dealers in U. S. Verified Origin Alfalfa seed. All our records of sales and purchases are checked by government representatives. We must be able to show back to the original grower just where the seed was produced. This service is to protect buyers against any substitution of southern grown seed under a northern label or tag. Play safe on your Alfalfa seeds. Buy only U. S. Verified Origin Alfalfa and save money by buying direct from "Authorized" dealers.

Markets Very Strong

The production of Alfalfa seed is quite a lot smaller than last year. There was further, practically no carry over. Last fall's trade cleaned up stocks. This year's supply must take care of all spring and fall seedings. The call for Alfalfa seed at the time of preparing this catalog is unusually heavy. It is clear that enormous quantities of Alfalfa will be sown this spring. Already markets are advancing. We advise all our friends to buy their supplies early.

Sowing Alfalfa

Get your seed bed as fine and well packed as possible. Sow a little later than Red Clover with a very light nurse crop. Better still a little later seeding after some advance harrowing to kill weeds. In such case sow without a nurse crop. Fifteen pounds per acre is plenty. Do not cover over half an inch. Roll, if possible after seeding. Inoculate your seed.

Chippewa Falls, Wisconsin.

Gentlemen: My father used your seeds for 30 years and would never think of planting any other seeds than Berry's. I have been farming for 14 years and always bought my seeds from you. The seeds always come up, have strong hardy plants and bear excellent crops.

Yours truly,
WM. E. KLEMKE.

LOT

HONEST JOHN

\$8⁹⁰

An
PER BU. Extraor-
dinary Bargain

Good recleaned hardy seed priced extremely low. Absolutely the lowest figure at which you can buy dependable seed of this character. U. S. Verified Origin seed. Good purity and germination. Double recleaned seed. A little off-colored. Grows good. Produces beautiful stands of vigorous growing Alfalfa. If you do not object to a little lack of uniformity in looks so long as the seed is clean and will grow and produce a hardy stand, then this is your best buy. We sell thousands of bushels of this quality.

When these customers want more seed they call for Honest John. It gives them satisfactory results and saves them a lot of money. It's guaranteed to satisfy and will start you with the great money crop at small cost.

LOT

MORE HARDY

Half Grimm
Alfalfa
Balance Hardy
Northern
Common

\$10⁵⁰
Bu.

This lot really is more than 50% Grimm but since we cannot offer it as straight Grimm we designate it as a half Grimm lot. We have sold this same character of stock for several years. Its performance has been highly satisfactory. The seed has been well cleaned and it has the ability to produce fine heavy stands. Its hardness fits it to any condition save where they are so damaging that only the straight Grimm will do. It is fully adapted to 90% of the Alfalfa territory.

The seed is somewhat off colored being similar to Lot Bed Rock in appearance. We recommend it for dependable and satisfactory performance rather than for its looks.

EXTRA HARDY ALFALFA

ALL HARDY STOCK

An Extra Value

A true bargain in medium grade Grimm Alfalfa seed. Real, honest-to-goodness quality without the extra high color that means higher prices. It is seed of substantial character; clean, good growing power and extra hardy.

You will find Lot Bonafide fully equal in production to the higher priced lots. We consider it just as certain to produce a stand. This grade often sells as a fancy quality. It certainly is a serviceable lot. Yes, it is U. S. Verified origin seed.

We know that a lot of farmers have to watch their expenditures very carefully. That is why we made a special effort to secure seed of this type. We strive to supply the needs of every customer. It is typical of Berry Service to enable you to secure such sound good Grimm Seed at so low a price. Shipment is guaranteed to satisfy you. Every buyer of Lot Bonafide will make a worth while saving. You save with safety on this bargain.

Dakota No. 12 Corn-Belt Alfalfa Seed U. S. Verified Origin World Brand Quality

Dakota No. 12 has long enjoyed a wide popularity. This seed we have this year should please you very much. To say that it is World Brand quality is almost enough. For forty years it has been the choice of our most particular customers. This strictly extra fancy grade is always satisfactory and economical.

Corn-Belt Dakota No. 12 is, in our opinion, the heaviest in yielding power. We will match its production against any other seed, bar none. Then there is the matter of its winter hardiness too which is a quality worth money.

Considering quality this seed is priced to save you \$2.50 to \$3.00 a bushel. High color, large berries, excellent purity and germination. You'll receive seed of extra high quality. Compare it with the finest. Then compare prices. Samples free on request. Order early for present prices.

Asheville, N. Y.

Dear Sirs: I have always found your seeds to be very satisfactory and have gotten good results from them. I recommend your seeds highly at every opportunity.

CARL A. C. JOHNSON.

IDAHO VARIEGATED

\$16.80
PER
BU.

Equal to Grimm in Hardiness

The fields producing this seed had the variegated blossoms. That is one of the best earmarks of superhardiness. In every way it resembles Grimm. In fact we consider that it is Grimm and that the true origin has been lost somewhere along the line. While the papers on it cannot be found it certainly has lost nothing in its producing power or hardiness.

This seed is strictly Idaho grown from whence came the famous Blackfoot Grimm. Heat and cold and drouth resistant, it stays right on the job, producing the finest of feed in great abundance.

A Wonderful Value

Our Idaho Variegated is new crop seed. Strictly World Brand quality. Beautiful large berries, high in color. Excellent both in purity and germination. This seed will please the most discriminating customer. U. S. Verified Origin. It is all Idaho grown. We have yet to hear from a customer who was not thoroughly satisfied with genuine Idaho Variegated Seed.

LOT COSSACK

Considered by Many The Hardest of All

Cossack Alfalfa is in wide demand by those having unusually much trouble with winter killing. We really doubt if it is really superior to our Grimm in this respect but have a nice stock of beautiful seed.

\$17.50
Bu.

Anyone wishing Cossack Alfalfa can certainly save money on this extra value lot.

This seed we carry only in the World Brand grade. It is truly an extra fancy lot. You can expect something very fine when you order this. This variety produces hay of a fine character. Sample sent free. Compare our quality; then compare prices. You will find a saving that will surprise you. Bargains like this move fast.

GRIMM ALFALFA

At STRIKINGLY LOW MONEY SAVING PRICES

BLUE TAG
FINEST QUALITY
STATE SEALED AND CERTIFIED
GRIMM ALFALFA

The Highest Quality Obtainable

State Sealed and Certified Grimm alfalfa seed is grown, harvested, cleaned and sacked under state supervision. After it is cleaned it is graded. The color, purity, size of berries, etc., determine the grade. Only the very best of the entire crop is good enough to grade "Blue Tag." Whenever you see the State Blue Tag and Seal on a bag you can be certain that there is nothing better.

New Crop Seed

It is naturally advisable to know when it was grown. Our Idaho Blue Tag is all 1934 crop seed. This is much nicer than two-year-old seed and of course worth more money. We have in this seed the very top notch in quality yet at a price that means a good saving to you. Our stocks are ample too so that we can take good care of early orders at this price. See page 32 for prices.

Idaho Seed Very Popular

This state has made an enviable name for itself in the production of alfalfa seed. It is distributed through various dealers and the Blackfoot Association. To say Idaho State Sealed and Certified is enough to open the door to orders from jobbers, dealers and farmers. Many insist on this stock. If you want the best that money will buy you will get it when you order our Idaho Blue Tag Grimm.

Blackfoot Grimm

State Sealed and Certified

This like our Blue Tag is Idaho seed. It gets the name Blackfoot from an organization that controls the selling of most of the seed produced in the section around Blackfoot, Idaho.

So great is the demand for this seed that they sell their entire years supply in two days time.

Prices for Prompt Orders

Since the supplies of this seed are so definitely limited orders can be filled only so long as stocks last. We have a nice stock on hand and believe we will be able to supply all of our trade wanting Blackfoot Grimm. To be safe, however, it is best to order early.

Blackfoot always sells at a premium over other Alfalfa yet our prices are down to money saving figures. See page 32 or our latest price list for quotations.

Postpaid 1 lb., 60c; 5 lbs., \$2.50

WORLD BRAND IDAHO GRIMM

Big Bold Beautiful Seed Extra Fancy Quality

Our World Brand Idaho Grimm is similar to the Blue Tag described above. It comes shipped to you in sealed bags and is thoroughly dependable seed.

Every year there are quite a number of Grimm fields that are not certified. This may be due to failure to pay certain fees, lack of compliance on some technicality, etc. The fields remain Grimm Alfalfa but for reasons mentioned they are not state sealed.

Our Buyers Know Production

We do not depend on hit or miss methods in securing such seed but have reliable resident buyers in several sections of this state. These men have lived there for years and know most of the growers personally. Therefore we can assemble these stocks with the assurance of their genuineness. And we can sell you such seeds at genuine savings.

Save \$2.00 to \$3.50 bu.

You can check up on these savings very closely. First find Idaho Grimm purchased with the same care that our stocks are. Second make sure it is U. S. Verified origin so you will know it is genuine Idaho grown. Third compare quality. Insist that it be as fine as Berry's World Brand. If you find all these factors equal we will guarantee our price to save you at least \$2.00 per bu. over retail prices.

\$16.80
PER BU.

What Grimm Does

The growth of Grimm is somewhat finer than most common. It is leafier. It will not produce a heavier tonnage but it has a higher feeding value per ton. Then unquestionably it is more winter hardy. In some sections this is not such a vital point but when winter killing is common it is certainly the only kind to select. At our low price the cost is brought within reach of all.

Postpaid, 1 lb., 45c;
5 lbs., \$2.25.

Myerstown,
Pa.

Dear Sirs: I have been getting my seeds from you for twelve years. I get the kind of seeds I want and save money. The Grimm Alfalfa I sowed in 1930 gave me three cuttings of fine hay this year.

Yours truly,
MILES L. RISSER

MARVELOUS MIXTURE

A very low price on a Great Seeding Prepared Especially for 1935 conditions

This year our Marvelous Mixture has been built to give a crop in 1935 as well as for permanent meadow or pasture use. We have done this because we felt sure that many farmers would be needing quick returns from their seeding. At the same time the cost has been held down. In spite of seed scarcity and higher prices you can secure our famous Marvelous Mixture at a most reasonable cost.

This seed is clean, smooth and uniform. It is desirable, serviceable and practical. It fits your needs and your pocketbook. It is a sound investment.

Rich in Clovers

Fifty percent clovers. That gives the hay a high protein analysis. That makes it a soil building mixture. Clovers blended with Timothy and Domestic Rye Grass to produce heavy yields. Red Clover, Alsike Clover, Alfalfa and Sweet Clover. All re-cleaned, tested and guaranteed satisfactory.

Your land needs clover. Good farming demands it. You secure them in this mixture at low cost. You need quick growth. The Domestic Rye Grass gives it. In the fall the growth of the Alfalfa and Sweet Clover combine with it to make a good hay crop. It may be pastured much earlier.

May Be Sown without Nurse Crop

The Rye Grass takes the place of a nurse crop of grain. It grows almost as fast. That enables the clovers and Timothy to grow faster too. When there is no heavy grain crop to remove in midsummer there is less danger of the clovers dying out due to sudden exposure to a hot dry sun and hot dry stubble.

This mixture may be pastured lightly early in the summer. The Domestic Rye Grass affords the feed. The trampling of livestock, if not too severe, helps rather than harms the clovers.

Acre Cost Reasonable

Considering what this seeding will do, the cost is low. Sow 12 to 15 lbs. per acre. It is easy to start. Just disc your land lightly, harrow, sow the seed and then if possible roll it. May be broadcast on winter grain like any other mixture.

Marvelous Mixture gives you clover in abundance. It helps start Alfalfa on your land. You not only get a quick growth but you have the Timothy and clovers left for more permanent returns. It is a good producer. Helps your feeding problems and is a money maker.

Berry's Marvelous Mixture for 1935 is distinctly in a class by itself. The shipment is guaranteed to satisfy you in every way. You will find it a matchless value for the money.

Clinton, Iowa.

Gentlemen: We buy seeds from you. Some years the bill runs over \$1,000.00. The quality of the seed holds us as a customer. Then, too, the price is always less.

Yours truly,
RAYMOND C. LANGAN.

PERMANENT PASTURE and MEADOW MIXTURES

Fine Seedings at Low Cost

These mixtures are specially prepared to produce maximum yields and highest quality feed. The different blends are for various types of soil. These are permanent seedings. The pasture mixtures give a succession of growth throughout the season. These seedings have won the hearty approval of our customers.

The new low price we have on this seed is unusually attractive. You can secure our carefully blended seed for less money than you can make your own mixture. Our private formulas are used. We use the following crops in varying proportions. Red and Mammoth Clover, Alsike, Alfalfa, White Dutch Clover, Blue Grasses, Red Top, Orchard Grass, Timothy, Rye Grass, Bromus, etc. All choice re-cleaned seed. Samples on request.

Quality Stocks

All seed used in these mixtures is re-cleaned high testing stock. Such seed gives satisfaction and is the most economical in the end. We recommend sowing 20 pounds per acre.

\$8.50
PER 50 LB. BU.

3 POPULAR MIXTURES

Our ready mixed seedings have always been popular. They give a blend of clovers and grasses that produce heavily. They yield more when grown mixed than separately. The cost of seeding is reasonable. All the seed is recleaned and shipment is guaranteed to satisfy you in every respect.

GROW-QUICK PASTURE MIXTURE

The Best Producer for Early Seeding

Quality seedlings at low cost. High grade mixtures at real money saving prices. Combinations that provide pasture from early summer until killing frosts. This seed has fine bright live color and high purity. It is first class stock. Not only is this seed a real bargain but a seeding that answers your needs for 1935 pasture.

\$2.50
PER 25 LB. BU.

Heavy Producer—High Food Value

These mixtures Nos. 1, 2 and 3 described below are based on Domestic Rye Grass (not seed Rye, see page 27) combined with clovers, half and half. The Rye Grass gives the quick growth. The clovers come on in mid-summer to add to production. Your pasturage increases in spite of hot dry weather. It keeps on the job until winter sets in.

Sow Early—No Nurse Crop Needed

Old pastures may be thickened by discing land lightly with knives quite straight. Then sow seed and harrow or better still roll the ground. New seedlings may be made by discing land and harrowing. Then sow seed and roll if possible. Rolling both before and after sowing is better still. For a new seeding use 18 to 20 lbs. per acre.

The rapid growth of the Rye Grass serves as a nurse crop. The trampling of live stock, if not too severe, packs the ground and helps the stand of clover. Your seeding can be made as early in the spring as soil can be disc'd lightly.

If you need pasture early and late, select one of these mixtures. You will save money. Shipment is guaranteed to satisfy.

Important—Be sure to mention by number which of these mixtures you want. If no number is given in your order we will ship Mixture No. 3.

GROW QUICK No. 1

This contains half Korean Clover and half Domestic Rye Grass. All fine quality new crop seed. A wonderful value at our low price.

GROW QUICK No. 2

This contains half White Blossom Sweet Clover and half Domestic Rye Grass. This sweet clover will live over to 1936 for further production.

GROW QUICK No. 3

This contains a fourth Korean Clover, a fourth White Sweet Clover and balance Domestic Rye Grass. The reseed-ing of the Korean and the second year growth of the sweet clover will usually provide a full stand of clover for 1936.

ALSIKE and TIMOTHY Mixed
SUPER GRADE \$10.50 Bu.

Alsike and Timothy Mixed

SUPER GRADE

45 lb. per bu.

Contains 30% to 35% Clovers

A mixture that gives plenty of clover at a reasonable cost. Alsike seeds are small and a pound of it goes twice as far as a pound of Red Clover. Stands more acid. Matures with Timothy. The Timothy supports the Alsike thereby permitting it to grow taller and ranker. Yields are astonishingly heavy. Sowing 12 lbs. per acre places over 65 Alsike seeds on every square foot.

This seeding is one of the easiest to start. May be used for hay or pasture. One seeding lasts several years. The fine quality of our seed, the heavy yields it brings and the reasonable seeding costs make this mixture a highly popular one. Both Alsike and Timothy seed crops are extremely short. We urgently advise early buying.

ALSIKE and TIMOTHY REGULAR GRADE

\$9.90 per bu.—20-25% Clover Economical and Highly Satisfactory

The same fine quality stock as our Super Grade. Twelve pounds sows an acre and places 40 clover seeds on every square foot in addition to the Timothy. That makes a rich mixture that produces heavily. Alsike is superior to Red Clover in feeding value. Hay is less dusty. The seeding is easy to start. This seed is very scarce this year. Comparison will show you our prices are low, quality considered. We will save you money on this quality seeding but ask for your orders early as we can not replace stocks at these figures.

Dalton, Ohio

Dear Sirs: I have been using Berrys seeds for many years, especially Red Clover. I have often compared with others, but find none to equal Berrys' for quality and price. This year I have the best stand of Red Clover in the community.

As ever, your customer,
S. J. KULA

LOW
COST

RED CLOVER ALSIKE and TIMOTHY

**SUPER
GRADE**
\$10.50
PER
BU.

**SUPER
GRADE**

Contains 30% to
35% Clovers

There are several reasons for the big demand for this as well as our other clover and timothy mixtures. The seed is lower in price. The clovers and timothy grown together produce more than if the crops are grown separately on the same acreage. Many wish to pasture it and there is less danger of bloat with the timothy present. If one should fail due to some unfavorable condition the other crop still has a good chance of producing a stand.

This Triple Mixture a Dandy

Far richer in clovers than most mixtures on the market. A heavier producer. Hay has a higher feeding value. Builds up the land better. Gives an average of 50 clover seeds per square foot when sown at 12 lbs. per acre. The Red Clover and Alsike combine to make a heavy mat of clover. A stand of this mixture lasts several years.

This seed is high germinating, recleaned, good purity. We'll gladly send you samples to prove its worth. It is a high class value that we know will please you. Prices are made for early orders.

See page 32 for prices. Small lots, any mixture on this page. Postpaid 1 lb., 40c; 5 lbs., \$1.75

RED CLOVER, ALSIKE and TIMOTHY

REGULAR
GRADE

\$9.90
Bu.

Regular Grade—Contains 15% to 20% Clovers

The same fine quality seed that makes our Super Grade such an outstanding bargain. Contains less clover seed yet ample to make a good clover stand. This triple mixture is in big demand because it lowers seeding costs yet yields abundantly. If there should be spots in the field too wet or sour for Red Clover the Alsike is almost sure to catch. It is one of the surest seedings.

The better you understand the seriousness of the seed situation the more you will appreciate the values of our mixtures this year. It was hard enough to get seed of such quality and to be able to sell it at this price is rendering a real service to our customers. Your interests are our interests. Let us serve you and save you money on your seed bill.

RED CLOVER and TIMOTHY MIXED

Super Grade—30-35% Clovers

A great old favorite. Twice as heavy with clover as the average ready mixed seeding gives an average of 30 Red Clover seeds per square foot when sown at 12 lbs. per acre. Produces a dense mat of clover which grows all the taller because it is supported by the Timothy. Secure big yields at low seeding cost.

Good, live, cleaned seed. Thoroughly dependable for heavy healthy stands.

There is convenience and economy in using our prepared mixtures. Seed comes all ready to sow and seeding cost is lower. We can secure mixtures cheaper when grown in that way than to mix afterwards. You share these savings when buying these mixtures. Mail your orders early.

All the Mixtures on this page are sold at 45 lbs. per bu. Prices include bags free.

10.50
PER
BU.

ALFALFA, RED CLOVER ALSIKE and TIMOTHY

4 WAY MIXTURE

Contains 30% to 35% Clovers

This combination has certainly met with great favor among our customers. The addition of the alfalfa is just what thousands want. It gives you a fine opportunity to get some alfalfa on your land. Produces bumper hay crops. The feeding value is high. It's nice clean high testing seed.

Our customers are quick to judge exceptional values. That's why this 4 way mixture has been such a heavy seller. Here is just exactly the blend many want and at a price that is low. We urge you to compare values on a quality basis. Then you will know that the savings are real and worth while. Sample sent free. Our business is built on the policy of giving more for the money. Our buying power, improved cleaning facilities and large volume of sales make these superior values possible. Let us show you that it is to your interest to entrust your seed business to us.

\$9.90
PER
BU.

North Manchester, Ind.

Dear Sirs: After using Berry's seeds for five years I am fully convinced as to the quality of them. It is to my interest to buy from you. I always speak a good word for Berry's Seeds whenever the occasion arises. Yours truly,

A. F. STELLAR.

KENTUCKY BLUE GRASS

Quality Seed—Close Prices

A very short crop of Kentucky Blue Grass was threshed this year. We were fortunate in getting some exceptionally nice seed from sections favored by necessary rains at the proper time. Few if any other seedsmen knew of these isolated fields. We are therefore in much better position than the average seedsmen to offer you fine, heavy new crop seed.

You will find our seed far superior to the light chaffy stuff that is sometimes sold as Blue Grass. Our seed has the germinating power necessary to produce stands. Thicken up your old stands and make new seedings with good seed. Considering markets and the scarcity of good seed our prices are very attractive.

Small Lots, Postpaid, 1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.75. See page 32 for quantity prices.

RED TOP

Grows Most Anywhere

No land is too poor to grow Red Top. It does well where many other grasses fail. If you have trouble getting a stand of grass sow Red Top—it seldom fails. It grows on dry land, and is specially adapted to wet land. Some like it mixed with Alsike Clover. It matures along with Timothy.

Red Top grows on soils low in lime. It is a great drought resister. Stops washing of the soil. Makes a good hay crop. One seeding lasts several years. Begins early in Spring, and continues its sturdy growth throughout Summer and Fall. Sow about 10 lbs. to 12 lbs. per acre.

Our price on Red Top is comparatively low.

Our seed is very high quality. You get a real bargain in the kind of seed that will give you the best assurance of success. We guarantee to save you money.

Small lots, Postpaid, 1 lb., 35c; 5 lbs., \$1.50; 10 lbs., \$2.50. See page 32 for quantity prices.

ENGLISH BLUE GRASS OR MEADOW FESCUE

Our seed this year is of very nice quality. Considering short supplies and strong markets our prices are very low. Very hardy. Grows in all sections. Height, 2 to 3 feet. Highly nutritious. Good for hay and pasture, but used principally for pasture. Produces two tons of hay per acre on average good land. Stands last longer than Timothy. Begins growth very early in Spring. Keeps growing after frost kills native grasses in Fall. One of the very best for wet land. Seed quite a bit larger than Kentucky Blue, and much cheaper this year. Sow 20 to 25 lbs. per acre for full seeding. Sow spring or fall on well prepared seed bed. We have beautiful seed for you. Postpaid prices same as Red Top.

Small lots Postpaid, 1 lb., 25c; 5 lbs., \$1.00; 10 lbs., \$1.75. See page 32 for larger lots.

Italian Rye Grass

Quick Growing One Year Grass

A really remarkable grass crop that can be sown early in the spring. It is often used as a nurse crop for slower growing grasses and clover. Provides pasturing early in the season. May be used to thicken up old pastures giving the more permanent grasses a chance to get well re-established.

Italian Rye Grass also makes a good hay grass, under favorable conditions yielding over 8 tons per acre. This grass has a bright glossy leaf. Makes very good feed. Is generally sown at 30 to 40 lbs. per acre although some use considerably less.

Glenbeulah, Wisc.
Gentlemen:

I have been your customer for many years, and have always had satisfactory results. Your grass seed is so dependable, being so free of noxious weeds. One field of Alfalfa from your seed lasted nine yrs. Yours truly, OTTO H. HERRLING

BROMUS INERMUS

Also Known as Brome Grass

Excellent Drought Resister and Heavy Yields

Makes a splendid hay and pasture crop. Good feeding value. Livestock is very fond of Bromus. Produces heavily. Roots of Bromus go down 5 to 6 feet. It is a wonderful drought resister. Stays green when other grass becomes dormant. Starts a couple of weeks ahead of most grasses. Does well on clay loam and sandy soils. Usually makes some hay first year. Second and third years produce extra heavily. The most severe winters will not kill it. One seeding lasts many years, yet it is not difficult to eradicate.

Seed crop is exceedingly short this year anyone wishing Bromus should place their orders at once. We do not know where to get any more seed. Sow 20 lbs. per acre, spring or fall. May be sown with or without nurse crop. Seed is larger than the average grass and should have a light covering. Our seed is high quality free from quack.

The great increase we have had in the demand for Bromus during the past few years shows its growing popularity. It is a distinctive grass that increases production and profits.

Small lots. Postpaid, 1 lb., 50c; 5 lbs., \$2.00; 10 lbs., \$3.75. See page 33 for wholesale prices.

ORCHARD GRASS

Low Prices on New Crop Seed

A very productive perennial grass. Starts growing very early in the spring. Grown in every state in the Union. Makes good hay. Yields about same as Timothy. Best grass for shady places. Keeps creek banks from washing. It is a good drought resister. Makes a fine combination with Red Clover for hay. Gives heavy aftergrowth after hay crop.

We know that customers who start with Orchard Grass will seldom do without it. It is a grass of great value. It will pay you to get acquainted with it. Our seed is new crop and guaranteed to satisfy.

Sow 20 lbs. per acre.

See page 32.

Bermuda Grass

This grass is especially for southern states. It is used very extensively there for both lawns and pastures. It spreads to make a dense turf that withstands lots of heat. While it prefers clayey soils it may also be grown on soils quite sandy. Seeds only in a dry season. It is used also to keep soils from washing. The seeds of the grass are very small and therefore go a long way. Sow 8 to 10 lbs. per acre for pasture. Somewhat heavier for lawns.

Apple Grove, W. Va.

Dear Sirs: I have been using your seeds for the past five years. I find them perfect in every way. Good in purity, high in germination. They surely stand extreme cold weather. Your prices are much cheaper than I can find anywhere else. Yours respectfully, C. D. PUTNEY.

**New Crop
SEED**

GROW IT THIS YEAR A Most Profitable Crop

This valuable, quick growing, heavy producing grass should be grown on every farm. Produces enormous hay crops. Makes fine pasture during hot summer months. If you are needing a big hay or pasture crop this year be sure to sow Sudan. It is a sure crop and easy to grow. The cost of seeding is low and returns are very profitable. Last year Sudan prices advanced rapidly at seeding time. The crop is much shorter this year. By all means buy your seed early for lowest prices. If you delay in placing your order, write for latest prices. We guarantee to save you money at all times.

Description

Sudan belongs to the cane family but is finer stemmed and a free stoler. Grows 4 to 7 feet high and yields 4 to 10 tons of cured hay per acre. Livestock is very fond of Sudan. It has good feeding value. First hay crop can be cut in about 60 days after seeding and second and third crops 30 to 40 days apart.

Sudan is one of the best drought resisters known and supplies an abundance of fine pasture or hay during the hot dry months of the summer when feed is often scarce. That's why every farm should have some of it. It has been a life saver to thousands during the past few years.

How to Handle

Sudan is a warm weather crop. Do not sow until corn planting time or after. Prepare a good seed bed as you would for corn. Drill in close rows or broadcast. Cover seed about an inch deep. Sow 20 to 25 lbs. per acre. You can begin pasturing when 6 to 8 inches high. Cut for hay when in bloom, although you can cut earlier or later without damage or loss.

Our Seed a Great Bargain

This seed is the finest new crop seed. It is all bright, plump, recleaned, high germinating seed. You can be assured of strictly extra fancy world brand quality stock. Money will not buy any better grade. It is free of Johnson Grass. We guarantee to save you money on our Sudan Grass. If this seed fails to please you in every way let us know and prompt adjustment will be made in conformance with our guarantee.

It is easy to grow Sudan Grass when you use seed of such fine character. We urge you for the sake of better farm profits to grow some of it this year. It produces enormous quantities of feed in a short time. It keeps right on the job when heat and drought are damaging other crops severely. You get the best bargains by buying now.

Rockwell City, Iowa.

Gentlemen: I have been a customer of yours for several years. Your Red Clover seed is a wonderful producer. Your Dakota No. 12 Alfalfa, both in price and quality, has given me the best of satisfaction.

Yours respectfully,
S. G. FOWLIE.

BILLION DOLLAR GRASS

An Enormous Producer

The popularity of this grass is ever on the increase. It is a variety of Millet also known as Japanese Millet. It is without doubt the heaviest producer of all millets, especially on rich moist soil. Grows 6 to 8 feet high. Produces as high as 26,000 to 50,000 lbs. of green feed per acre with seed production of 1,000 to 2,000 lbs. per acre.

Should not be sown until weather is warm, but will stand somewhat cooler growing conditions than Sudan. For that reason it is especially popular in the north, although it is grown throughout the entire country. Sow during May, June or July, using 20 lbs. per acre. Makes hay in 6 to 10 weeks.

\$2.50
PER
BU
35 LBS.

Low Price for This Year

We are making this low price in face of a short seed crop this year. Have only a limited amount contracted to sell at this low price. Seed is all the best quality and guaranteed satisfactory. The fine feed value and heavy production of this crop make the crop in big demand. Order early to make sure of your supply.

It also can be used for pasture. May be mixed with Soy Beans or Cowpeas. If fed green start stock on it gradually. It is palatable and particularly valuable for dairy cattle, young stock and sheep.

1 lb. 20c; 5 lbs. 75c, postpaid.

Sudan same price
in small lots.

CROPS of SPECIAL VALUE MILLETS

BERRY'S ANNUAL PORK PRODUCER

A rapid growing mixture of legumes, forage and grass crops. Makes a wonderful pasture. Can be used a few weeks after seeding. Enormously productive. High in protein. Builds big body frames, reduces grain consumption. Makes hogs of marketable size in quicker time. Contains Peas, Vetch, Rape, Beans, Rye, Barley, Speltz, Oats, Sudan, Cane, etc. Sow 40 to 50 lbs. per acre after danger of frost. This is a great pasture combination at low cost. See price list.

VETCHES

SPRING VETCH

Spring. An annual variety having much the same characteristics as peas. Does well wherever Canada Field Peas are grown. Requires cool growing season. Should be sown early, using 50 lbs. per acre. Grows 3 to 5 feet high. Is quite finely stemmed. Generally sown with a bushel or two of oats and the two cut together for hay. Grows rapidly, yields heavily. Excellent feeding value; high in protein. Produces a wonderful early hay crop. Makes best hay if cut when in full bloom. Does not live over winter.

Scotia,
Nebr.

Dear Sirs:

My father started buying seeds from you in 1898 and I have used Berry's seeds for the past 15 years. Have never had a complaint. You have always satisfied me and saved me money.

Yours truly,
CHAS. KEOWN.

SAND OR HAIRY

Also called Winter Vetch. May be sown spring or fall. Lives over one winter. Use 20 to 25 lbs. per acre. Can be sown with spring grain and pastured some in fall. Remains green for a long time. Excellent cover crop. Fine soil builder. Good yielder. High feeding value. Inoculate all Vetch seed. See Pages 32-33.

GERMAN OR GOLDEN

This year we have for you some of the finest German Millet seed ever offered. This is the genuine Tennessee grown stock which, as experienced growers know, is the heaviest producing strain. With Millet seed scarce we are exceptionally proud of our ability to offer you such fine seed.

Makes a heavy hay crop. Has a leafy growth, 4 to 5 feet high. Yields 4 to 5 tons per acre. Produces 40 to 50 bushel of seed per acre. Can be sown as late as July 20. Sow 40 to 50 lbs. per acre for hay or 25 to 30 lbs. for a seed crop. Order early if you wish some of this stock. You will receive seed that you can be truly proud of and you can grow a real Millet crop. See page 33 for prices.

WHITE WONDER

Very popular. A wonder for production. Dense foliage, broad leaves. Long seed heads. Seed white in color. Matures early in spite of big size. A good seed producer and makes a good quality of hay. Seed scarce this year. Order your Millet seed early. See page 33 for prices.

SIBERIAN OR EARLY RUSSIAN

Two to three weeks earlier than German. Can be sown later but does not yield as much. Hay is of very fine quality. Grows 2 to 4 feet. Seeds reddish brown. Sow 35 to 50 lbs. per acre.

PROSO-MILLET

Also known as Hog Millet—Broom Corn Millet and Russian Wheat.

This Variety is grown almost exclusively for seed. A very prolific producer. Seeds are larger than other millets. Makes fine feed. It is used in some countries for human food. Equal to Barley in feeding value. Makes extra fine poultry feed.

Proso is a heavy seed producer, yielding up to 60 to 70 bushel per acre. It matures in sixty to seventy days. Makes a good cash crop. Needs warm weather and soil for quick germination. Sow 40 to 50 lbs. per acre. Drill in close rows or broadcast.

The demand for this seed has increased very rapidly in the past few years. Seed supplies short this year. Order as early as possible.

DWARF ESSEX RAPE

**Reduces Pork Production Costs
Enormous Producer—Grows Quick
Economical—Every Hog and Sheep
grower should have plenty of Rape
pasture**

Sow this liberally and cut pork production costs. Higher pork prices are in sight. That means better profits. Lower your production costs and make still more money. Every hog grower can produce pork at lower costs if he has a good rape pasture.

Rape is exceedingly rich in protein, analyzing as high as 37%. Think what this means when yields run as high as 24,000 pounds of green feed per acre. Young pigs especially need lots of protein if they are to make the most rapid and economical gains. It is far cheaper to grow protein in the form of rape pasture than to buy it in the form of tankage or other feeds.

The seed is cheap, see price list. It only requires 6 to 8 lbs. per acre. It can be pastured in six to eight weeks after seeding. Sow any time from oat seeding until early in July.

Experiment stations recommend Rape highly. It builds big, strong body frames. Cuts down on grain consumption. Gets stock ready for market earlier. Used chiefly for hogs and sheep, but is good for all kinds of young stock. Our seed is genuine Dwarf Essex. 5 lbs., postpaid, \$1.00. See price list for quantity prices.

Friends, if you really know the money-making features of this crop you would never be without it. We urge you to try at least a small patch of it.

CANE

A Leading Forage Crop

A crop that is rich in sugar and fat and very palatable. An enormous yielder producing from 10 to 15 tons of excellent green feed on rich land. A most remarkable drought resister. Especially valuable in dry hot seasons. Makes a wonderful hay crop when sown at the rate of 75 to 100 lbs. per acre.

Some farmers get cash out of their ordinary hay crops and use cane for their own feed supply. A few acres of cane will make as much hay as many acres of Timothy. Your live stock will relish cane hay and fatten on it. You can also pasture cane or cut it for green feed. Makes excellent summer and early fall feed. It is also used for ensilage. Cane is also a good seed producer, yielding 30 to as high as 60 bushels per acre.

How to Handle

Sow quite heavily for hay or pasture, 75 to 100 lbs. per acre. Heavy seeding makes a finer growth and therefore easier to cure. Do not sow until corn planting time or after. It is a warm weather crop. Drill in close rows, or broadcast. Cover about an inch. Can be cut and cured like ordinary hay. Takes a little longer to cure than ordinary grass hay.

Early Amber. The kind most generally grown and of great value because of its splendid growing qualities.

Early Orange. Heavier stalks more abundant leaves. Seed head more compact. Heavier yielder but a little coarser.

CANE for MOLASSES

To make good sorghum, seed must be pure and we take care in getting this seed direct from sorghum producers. We do not guarantee the crop, but we consider our seed equal to if not superior to any on the market.

Ames Special Sorghum. An improved type of the Amber. Makes excellent sorghum of fine flavor and color. Very juicy. We recommend it highly. We are sure you will be pleased with it.

Silver Tip. More after the orange type. Makes delicious mild, clear, light colored molasses. Ranks very high in favor with expert sorghum makers. Produces lots of syrup of a superior variety.

Price, 1 lb., 30c; 5 lbs., \$1.00, postpaid. Not prepaid, 5 lbs., 75c; 10 lbs. or more, 11c per lb.; 50 lbs. or more, 10c per lb.

ATLAS SORGO

A Cross Between Cane and Kaffir

Greatest drought resister. Very heavy producer. Cattle like it. Wonderful feed. Grows strong and erect. Most popular forage of recent introduction. Excellent pasture. Drill, double rowed using 18 to 20 lbs. per acre.

Price, postpaid, 1 lb., 20c; 5 lbs., 75c. See page 33 for prices in larger quantities.

BERRY'S Special GRAIN and HAY CROPS

KAFFIR CORN

A sorghum grain crop. Used to some extent for hay. Stalks less juicy than cane and not sweet. Stands lots of hot dry weather. Makes fine poultry feed and suitable for all kinds of live stock when ground. Produces up to 40 to 50 bushels of seed per acre. For grain drill in rows 30 to 40 inches apart using 6 to 8 lbs. of seed per acre. For hay drill close or broadcast 75 to 100 lbs. Cut off heads, cure 10 days to 2 weeks then thresh. Our seed is high germinating. Prices are very low on both Red and White Kaffir.

SEE
PAGE
33
for
SALE
PRICES

Feterita

A great drought resisting crop. Earlier than Kaffir. Has a higher protein content. A very heavy producer. Grains flat in shape, bluish white in color. The crop is a free stooler. Handle like Kaffir. Adapted to a large territory because of its earliness. Makes good hay if seeded 75 to 100 lbs. per acre. For grain about 6 lbs. A leader among grainsorghums. Postpaid, Feterita or Kaffir 1 lb., 20c; 5 lbs., 75c

BUCKWHEAT

A quick growing grain crop. Matures in 10 to 12 weeks. Excellent catch crop. Sometimes sown after small grain so as to get two crops from the land. Good cover crop for orchards. Makes land mellow. Good for bee pasture. Does well on all soils excepting wet land. We have two varieties. Both are excellent yielders. Our seed is thoroughly cleaned and guaranteed to be satisfactory in every way.

Japanese. Rich dark brown. Strong grower. Earlier than most varieties. In big demand.

Silver Hull. Thin shelled. Silver grey. Medium sized grain. Makes nice flour.

Postpaid, any of above five crops. 1 lb. 20c; 5 lbs., 75c.

HEGARI

This is a sweet sorghum somewhat similar to cane. Very nutritious. Valuable for grain, dry fodder, ensilage and pasture. Yields up to 5,000 lbs. of grain per acre and up to 18 tons of ensilage. Live stock especially cattle are very fond of it due to its sweet taste. It combines the grain production of Kaffir and Milo with the high forage value of cane. For grain production drill like Kaffir 6 to 8 lbs. per acre. May be double rowed using double the amount of seed. For hay drill in close rows at 75 to 100 lbs. per acre. Postpaid 5 lbs. for 75c. See page 33 for quantity prices.

MILO MAIZE

Similar to Kaffir. Earlier. Stalks more pithy. Requires less moisture. Fine feed. Handle like Kaffir. Color white. Excellent yielder. Our seed high testing stock. Prices low. See page 33.

Broom Corn

Grown for straw in the seed heads. 4 to 5 pounds plants an acre.

Improved Standard — Excellent straw of good strength and stiffness.

Dwarf Evergreen — Best for dry conditions. Price, 1 lb. 25c; 5 lbs. \$1.00, postpaid.

SOY BEANS

A Fine Money Making Crop

Here is another excellent crop to use on land thrown out of corn production. Can be used as a fertilizing crop of great value.

It is truly amazing how soy beans have swept the country. Comparatively a few years ago they were an experiment. Now you see them everywhere. The farmer who loses out on a crop of clover no longer does without hay. He plants Soy Beans and harvests a heavy crop of fine hay in the fall. If small grain doesn't pay him he plants soy beans for a seed crop and harvests 20 to 30 bushels of beans per acre. In our part of Iowa farmers plant soy beans after the small grain is off and take another hay crop or plow under the stand for soil building. It's no wonder the crop is popular.

Our Prices Low

See our price list for money saving quotations on quality seed. Mills are taking lots of beans and we may see a situation like we had last year. The country was simply cleaned up on Soy Beans by spring. Prices advanced. Finally, one could not get them at any price and we had to refund money on late orders.

Our advice to you is buy early. Our seed is all thoroughly cleaned and bright high germinating seed. Such superior seed goes farther and is the cheapest in the end. Satisfaction is guaranteed.

We can ship from central producing points. Ask for special delivered prices on large amounts.

How to Handle Soy Beans

Plant when weather and soil is warm, corn planting time or later. Prepare a fine clean seed bed. For hay broadcast or drill in close rows $1\frac{1}{2}$ to 2 bushels per acre. For seed in 18 to 20 inches apart 30 to 40 lbs. per acre. Cultivate with a harrow while beans are small and dry. Cut for hay when beans are fairly well formed, but before leaves fall. Harvest for seed when beans are practically ripe.

Varieties

Dunfield. Pure yellow. Heavy seed producer and an excellent hay type. Stands up well. Does not shatter easily. Matures in about 105 days. Medium sized leaves and stems. An extra good all purpose variety.

Manchu. An old standby. Widely grown both for hay and seed crop. Color light yellow with dark seed scar. Stands up well. Adapted to a wide range of conditions. Fine for hogging down. 105 days.

Illini. Very popular. Grown for hay north of Central Iowa and for hay and seed south. Medium in stems, leaves and maturity. Grows erect. Color yellow. One of the most profitable varieties.

Wilson Black. A hay bean. Medium late. Small black seeded. Fine stemmed. Very nutritious. Very much in demand as a hay bean. 120 days.

Black Ebony. Grows erect and bushy. Fine stems, holds leaves well. Matures seed 120 days. Very popular.

Virginia Hay bean. Makes large growth with enormous yields of hay. One of the best beans for poor land. Seed brownish and smaller than the average. Requires less seed per acre.

Prices on Pages 32-33

COWPEAS

This is a money making legume. A soil building and hog crop that is widely used.

Quick maturing crop. Requires more warmth than Soy Beans. Grow on poor soils. Very good for sandy or light loam. Makes rich feed. Also good soil builders. All our seed stock is fine. See quotations page 33. Write for prices on large amounts. State quantity desired. Can ship southern orders from St. Louis.

Varieties

Whippoorwill. Medium early in maturity, about 80 days. This is the most popular of all cowpea varieties and we have a big demand for them. They grow quite erect, which is a desirable characteristic and, no doubt, one of the reasons for its popularity. They are heavy producers and make a profitable kind to use. Seed is speckled brown in color. We recommend it highly.

New Era. If you wish the earliest of all varieties select this one. Good for northern states or where late planting is necessary. May be planted after small grain for plowing under. Good soil builder. Smaller seeded than Whippoorwill. Use $1\frac{1}{2}$ bu. per acre for broadcast seeding.

Mixed Cowpeas. Somewhat cheaper than unmixed yet many prefer a mixture. Fine for pasture, hay or soil building. Very desirable unless pure seed crop is desired. All good cleaned stock. We have a big call for mixed cowpeas.

CANADA FIELD PEAS

For early hay or green feed nothing equals Field Peas. Can be sown as early as land can be worked. Disc or harrow in 1 to $1\frac{1}{4}$ bushels Peas with 2 bushels Oats. Cut for hay when oats are in the dough stage. Production is very heavy and feeding value very high. Also fine to plow under for soil enrichment. Crop very fattening. Increases milk production. Excellent for hogs. Solves the problem for early green feed as no other early crop can do.

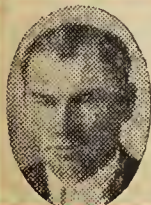

Our seed is high quality, genuine Canada Field Peas. Crop short but our prices low. See page 33. If you are going to be short on feed next spring we recommend this crop very highly.

Edwardsville, Ill.

Dear Sirs: I have bought seed from you for several years. I find them to be O. K. in every way. The quality and the germination is very satisfactory. Your seeds produce results. Also your prices are real money-saving quotations. I am well pleased.

Yours truly,

H. C. STRASEN.

LOWEST PRICES

SEED CORN

96% GERMINATION

Watch Your Seed Corn this Year

You will find seed corn offered this year from many sources. Nearly everyone holding a crib of old corn or who has a fair crop of new corn is wanting to blossom out in the seed corn business. As a result much that is unfit for seed purposes will be sold. Some buyers will be tempted by a price that means saving a few cents per acre.

Friend, you are taking big chances to buy from irresponsible parties on whom you have no comeback. We have been in the seed corn business for forty years and we can take good care of your needs this season. The acre cost is reasonable.

Why Our Seed Is Better

Our customers report increases in yields of 10 and 20 bushels per acre. That doesn't happen by chance. Our seed stock is of known heavy production under general farming conditions. The seed selection is from fully matured, well formed ears. It is quick high germinating stock. This seed is then shelled and graded and laboratory tested. Less than half the stock we gather for seed finally gets in the seed we ship. It is real seed stock.

We do not breed for show corn but we strive to get the largest number of bushels of good sound merchantable corn per acre. You'll find plenty of show ears in your field next fall, but what will please you most is the heavy yield per acre.

The description of the different varieties here given will show you that we have corn for all sections. Medium late, medium early and extra early. We have seed corn for you and when you consider the quality of seed stock we offer you will agree that our price is very reasonable. See page 33.

CLARINDA BIG PERFECTION

This is the largest eared and heaviest producer of all our open field pollinated yellow varieties. A splendid sort. Just a little later than Pride of Iowa. Ears not quite so uniform, but larger. Big thick ears with large kernels. Deep golden color. Broad thick deep grains. Large strong germ. Vigorous grower. Maturity around 110 to 115 days. We don't believe there is another variety to equal it. It is being grown well up into Iowa and all points east and south. It sure is a dandy corn. If you want to show your neighbors how to grow a real crop of corn plant some Big Perfection.

Fairfax, Mo.

Dear Sirs:

Each year for 25 years I have bought seeds from the Berry Seed Company. I have found the quality of your seeds equal or superior and the price always lower than any I could obtain elsewhere. I also know you have some extra good seed corn.

Your customer,
FLOOD L. FELLOWS.

SEED CORN GUARANTEE

30 Days to test it—Your money back if not satisfied. 96% or better germination

We take great care in the selection and preparation of our seed corn. It is all tested and labeled when shipped. You have the privilege of examining it and retesting it in any way you wish. If you do not find it as represented, or if for any reason you are not satisfied you may return it, and your money plus transportation charges will be promptly refunded. We abide by your decision. There are no strings to this guarantee. We say what we mean and mean what we say. You must be satisfied.

BERRY SEED CO., CLARINDA, IOWA

PRIDE OF IOWA

One of our heaviest producing yellow. A cross between Reids Dent and Legal Tender. Gives a larger ear than Reids without the tendency to become flinty. Grains deeper and wider than Reids but not quite so smooth. Rather a small cob. Has a heavy shelling percentage. Average maturity around 110 days. Small shank, easy to husk. Ears are well filled.

We have reason to be proud of our Pride of Iowa and you'll be proud of a field of it on your farm. Our shelled stock is A No. 1. If you want some ear corn in this kind we can supply something extra nice. See page 48.

Shelled Page 33

BERRY'S IMPROVED REID'S DENT

A superior strain of a well known variety. Solid compact ears 9 to 13 inches long. Grains quite deep and set close. Straight rows well filled. A great improvement over the old Reids. Rich golden color. A small cob and shank. High feeding quality. Maturity around 100 to 110 days.

IMPROVED LEAMING

A good producer on all soils. A tried and tested variety for over a century. Well filled ears. Deep broad grains. Medium sized red cob. Shells out well. Often used for ensilage in northern states. Quite early. Matures in 110 to 120 days.

LEGAL TENDER

A pure yellow corn with deep grains and small red cob. Ears extra sized. Has yielded 90 bushels per acre for John Hess in Central Iowa. Produces exceptionally well. Abundant foliage. Excellent for forage. Easy to shuck. A variety that will please you. Around 110 days' maturity. See Page 33 for Prices.

LARGER YIELDS MAKE BERRY'S SEED CORN A WISE INVESTMENT

Berry's Golden Dent

We consider this a leader in its class. An early yellow dent 90 to 100 days. Large ears for such an early variety. Similar to Reed's Dent but earlier. Fairly smooth kernels. Sixteen to twenty rows. This is a heavy producer and we recommend it highly. Our seed stock is fine and can take excellent care of your order.

Iowa Gold Mine. Another fine medium early variety. About a 100 day corn. Deep yellow grain, small cob. Always gives satisfactory results. Sold under various names by different seedsmen. Those wishing a medium early heavy yielding corn will make no mistake in selecting this variety.

EARLY YELLOW DENTS

Pride of the North. Especially recommended for northern customers and those wanting early feeding corn. Maturity about 90 days. One of the finest pure yellow early dents. Medium sized solid ears. Stands up well and yields surprisingly well.

Minnesota No. 13. Also in the 90-day class. Very popular; eight-inch ears, often two on a stalk. Stalks quite leafy. Does well even under unfavorable conditions. One of the best producers in its class. We always have a big demand for this.

Other Excellent Early Types

Yellow White Cap Dent. We recommend this highly. A 90 day type. Nice deep kernels. Sides medium yellow. Caps or tops of grains white. One of the finest early feeding varieties in existence. The kind you get enthusiastic about. Heavy producer of fine solid corn. You will be exceptionally well pleased with this one.

White Cap Red Dent. Grains cherry red color with white or light colored top or cap. Yields heavily. Grains softer than average. Matures 90 to 95 days. An excellent feeding corn. Adapted most anywhere in the corn belt.

Up-to-Date Calico. This is the famous "speckled" corn that has been popular for so many years. A fine feeding variety. Various strains of Calico on the market. We consider this the best. Excellent yielder, good sized ears, medium deep grains. Matures in 100 days. We seldom have enough of this variety to fill demand.

One lb. shelled corn
any variety 20c;
5 lbs. 75c.

CORN TREATMENT

Merko

Costs only 3c per acre

This dry treatment can be applied to seed corn any time before planting. Controls seedling blight and root and stalk rots. Increases germination, permits earlier planting and reduces seed decay. Makes heavier yields. A pound treats 6 bushel. Easy to apply. Full directions furnished.

Price 1 lb. \$1.50;

4 oz. tin 50c

Prepaid.

KRUG'S DENT

Ranks along with our Big Perfection and Pride of Iowa in yield, but is 10 to 15 days earlier. A four-year test in Illinois proved it the best yielder of 118 varieties. It is a cross of a smooth Reids Dent with Gold Mine. Ears somewhat smaller than Reids, but lots of them. Exceptionally firm and solid. Rich yellow color. Combines early maturity with heavy production. We recommend it highly. We do not believe there is another variety of equal earliness that will yield like our Krugs Dent. Our Hybrid is the only exception.

This scientific development in Corn is bringing heavy increases in yield. Tests in Iowa show increases of 25 bushels per acre. 10 to 15 bushels per acre increase can be readily expected under average conditions. Yielded 127 bushels in one test compared to 100 bushels for the best open field pollinated. Compared with the kind of corn that many farmers plant it should increase yields 20 to 30 bushels per acre. Supplies very short this year; be sure to order early.

HOW IT IS DEVELOPED

First many different strains are inbred by self fertilization. This inbreeding is all done by hand labor and continues from 4 to 6 years. The best inbreds are then crossed. The next year the best crosses are crossed, giving a double cross inbred Hybrid. In crossing, one kind is detassled so it is fertilized from the other inbred in adjoining rows. The seed is gathered only from the detassled rows. This is good for seed only one year, but with increases such as this gives, it pays to get new seed each year.

There is a great difference in Hybrids. Any Hybrid is only as good as the inbreds that are used. Practically every breeder of Hybrid Corn uses different kinds of inbreds. Therefore these various Hybrids have distinct difference.

Our XX Hybrid has a deep yellow color. The stalks are very erect. That is an outstanding characteristic of our Hybrid. You find practically no barren stalks in the field. Many have two ears on them. Our customers report as high as 5 ears on a stalk.

Another important feature is the adaptability of our Hybrid to such a large range of country. It can be planted much further north or south and east or west, than ordinary corn. Matures in 105 to 110 days.

Second Year Hybrid

At first thought the cost of Hybrid may seem high. Figure it down to the cost per acre and compare that with increases in yields that can be reasonably expected. It proves to be money wisely spent.

Our XX Hybrid seed corn comes to you treated in advance with Merko. The seed is not as nice in appearance as ordinary corn. The crop is different from the seed.

First Quality graded stock

1/8 bu., \$1.20; 1/4 bu., \$2.20; 1/2 bu., \$4.30; 1 bu., \$8.50; 5 bu., \$41.25.

Second Grade seed stock

1/4 bu., \$1.60; 1/2 bu., \$3.10; 1 bu., \$6.00; 5 bu., \$28.75.

MONEY MAKING WHITE VARIETIES

**SEE PAGE
33 for
LOW
PRICES**

St. Charles White

This is the famous white ensilage corn that produces such enormous crops. Clear white deep grains of large size, medium rough type. Red cob. Large ears. Stalk growth is quite tall. Has broad succulent leaves. Used extensively for ensilage, even in the northern states. Will yield 40 to 50 tons of green feed per acre. Makes a good milling corn on account of its clear color. It is a phenomenal producer in great demand. Place your orders early for St. Charles. Our seed stock is excellent high-testing and well graded.

BOONE COUNTY WHITE

A large white variety that has exceptional merit. Meets with immediate favor wherever it is introduced. The ears are a little larger around than the White Wonder, but not quite so long. The pearly white kernels are large and deep. Pure white cob. Strong germs and a vigorous grower. Matures in 115 to 125 days. We recommend this for southern Iowa and all points south or wherever a corn of this maturity can be grown. The big ears of Boone County White fill a wagon box quickly. It is an excellent variety and our seed is of fine quality.

SILVER KING

A very early white also known as Wisconsin No. 7. Resembles Silver Mine, but the ears, of course, are somewhat smaller and grains not quite so deep. Matures at least ten days earlier. Although earlier, it is a very good yielder and ranks foremost among the early white types. Will outyield yellow on poor soil. It's just the kind of corn many farmers are needing.

EXTRA EARLY VARIETIES

Rainbow Flint

A heavy producer. Many different colors in kernels from dark red to shades of yellow. Withstands very unfavorable conditions. Can be planted quite thick. One of the later flints. This flint variety is in big demand.

LONGFELLOW FLINT

Fine 8-rowed yellow flint. Long, straight, slender ears. Large, wide kernels. Small cob. Very prolific.

SILVER TRIUMPH

An excellent white flint. One of the best. Long ears, often two on a stalk. Grows good sized stalk. Can be planted close and produces a lot of corn per acre. Fine for those who want real early yield. Can be planted quite late.

\$ilver Mine

The most popular white variety in the corn belt. A splendid yielder. Does well on all soils. Best variety for thin land. Maturity about 110 days. Will stand thick planting. Many stalks produce two ears. Pure white grain and cob. Medium rough type. Good shelling percentage. Makes good solid corn. For all around merit it is hard to excel. One of the best varieties for general use in the corn belt. A safe, sure and profitable kind to grow. It makes friends everywhere it goes.

WHITE WONDER

Some ears are 12 inches long and over and proportionately large in circumference. They are big fellows. Makes good solid ears, well filled and not flinty. Good sized grains, fairly rough. Strong vigorous stalks many having one large ear and one small one. Out-yields any white corn we know of. Maturity 115 to 120 days. We have seen it outyield Reids Dent 31 bushels going to 92 bushels per acre. Usually exceeds the expectations of the grower. It sure is a wonder for production.

SANFORD'S WHITE FLINT

Very similar
to Silver Tri-
umph.

HOW WE SELECT OUR FAMOUS EAR CORN

Mr. A. R. Gorton, who has been chief of our corn division for many years, personally superintends the selection of our ear corn. Only the finest well formed, fully developed true to type ears are selected. He picks the cream of the crop. When you get a crate of ear corn you have something to be proud of. Each crate contains 70 lbs. of fine ear corn. Our shelled corn, of course, comes from the same fields and should produce equally well. Those who want to see it in the ear and know exactly the type they are planting will be delighted with this seed. We sell thousands of bushels of our seed corn in the ear.

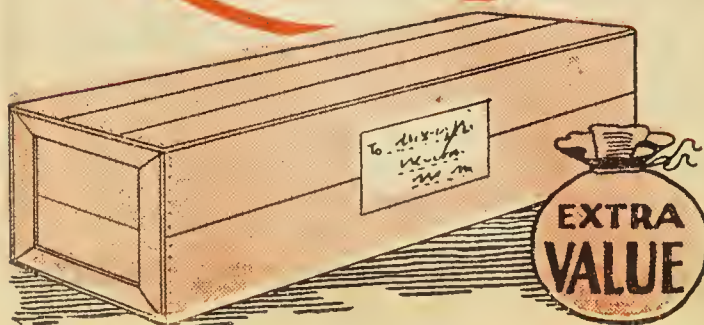

The low prices we have on it this year makes the acre cost very low and certainly makes it a wise and profitable investment.

Extra Fine Ear Corn This Year

Our supply of extra select ear corn is the finest we have had for many years. Beautiful, well formed, full kernalled ears that are a delight to every judge of good seed corn. Bushel crate, \$3.50; 5 crates, \$16.00; Single ears, 25c each, postpaid.

Shipment is guaranteed to reach you in good condition. It is sold subject to any test you want to put it to. You can return it and get your money, plus freight, refunded if you are not completely satisfied and fully pleased.

We can supply our extra select ear corn only in the following varieties: Big Perfection, Pride of Iowa, Krugs Dent, Reids Dent, Improved Leaming, Legal Tender, Iowa Gold Mine, Silver Mine, Boone County White and White Wonder. All other varieties are available only in shelled corn.

BARLEY

Big Increase in Demand

Barley, the heaviest producer of small grain crops, has again stepped to the front. It is back on the Board of Trade and at prices sharply advanced. There is especially a demand for malting barley. Our Velvet is one of the finest malting kinds and is in big demand.

Barley is as fine a grain as you can feed. It is rich in bone and muscle building elements. It develops large, strong, healthy animals in quick time and at reduced costs. Records of forty years have proven it the heaviest yielder of all grain crops, corn alone excepted. Barley is one of the best nurse crops for grass and clover. Stands up on rich ground. It is ready for harvest the latter part of June or early in July.

**LOWEST
PRICES
ON
HEAVIEST
PRODUCING
VARIETIES**

**WHITE
HULLESS**

Has no Beards and no Hulls

A remarkable grain. Kernels resemble wheat in size and shape but lighter in color. Weighs out around 60 lbs. to bushel. It is sold however on basis of other varieties, 48 lbs. Straw is more leafy than other varieties. It is frequently cut for hay. Stands up well. It is particularly drought resistant. Heavy producer, yielding up to 40 to 70 bushels per acre. It is entirely free from beards.

We consider it fully equal to corn in feeding value. Exceptionally good for hogs and poultry. A fine plan is to feed both barley and corn. That gives a combination of nutrients superior to either crop fed alone.

The crop is easy to grow. Sow around 2 to 2½ bushels per acre. Handle like any small grain crop. The first crop in a neighborhood can often be sold at a premium for seed. Get acquainted with this remarkable profitable grain crop.

VELVET

The KIND With SILKY BEARDS

Our Velvet Barley is a revelation. It looks like ordinary barley but is distinctly different. The beards are there but those bothersome sticky barbs are gone. The beards are as smooth as silk. It's just as pleasant to handle as a beardless variety and you get the protection of the beards.

This Barley is of the best malting type. Decidedly superior to the average because its resistance to disease assures a better quality grain. For feeding or malting it is extra fine.

In yield it ranks at the top. Most farmers reporting on it say it is the heaviest yielder they have ever grown. The straw is even stiffer than the average. It is very resistant against spot blotch disease. Barley ranks next to corn in the number of pounds of grain produced per acre.

Our Velvet is adapted to a wide area. With the introduction of this variety many farmers are changing from oats to barley. It is proving a better nurse crop, a heavier yielder and an earlier maturing crop.

You will receive a very high grade shipment of seed when you order our Velvet and you will be starting a more profitable variety of grain.

A VERY POPULAR VARIETY

BERRY'S Improved Wilt Resistant FLAX

Berry's Wilt Resistant Flax

The Best Paying Small Grain Crop.

The United States grows only half its flax seed requirements. Farmers really get tariff protection on it. It has held up in price better than other crops. The wise farmer will put part of his acres in flax this year.

Flax is not exclusively a new land crop. The reason flax has not done so well on old land was because of a disease known as Wilt. Now we have a Wilt Resistant Flax and the crop can be grown with greater profit than other grain crops on old or new land.

How to Handle

Sow as early as possible or about when you sow other spring grains. Flax prefers clean land. On foul land delay seeding and harrow to kill weeds. Requires a firm seed bed. Sow 25 to 35 lbs. per acre.

Flax makes the finest nurse crop obtainable for grass and clover seedings. Yields from 10 to 15 bushels per acre may be reasonably expected. Thresh with ordinary grain separator.

Do not sow ordinary Flax. Your chances are too great. Our Wilt Resistant Flax assures you of the highest degree of protection. It is a heavier yielder and more profitable than any small grain crop.

ODERBRUCKER

Also known as Wisconsin 55. A standard malting barley. This, in our opinion, is the heaviest producer of its type by 5 to 10 bushels per acre. Plumper kernels. Great disease resistance. Higher protein test. Better feed. A bearded variety that gives greater returns. Our strain of Oderbrucker will please you. You can't afford to go on with low yields on small grain. Better seed will help you out. This fine variety of this profitable grain produces more wealth. Discard poor seed. Invest wisely in better stock. Our seed is fine quality, bright and clean. We have kept this old standard variety up to a high state of production by proper seed selection. You will find it to your interest to use seed of this character.

Danese, W. Va.

Dear Friends:
I have found you an honest and reliable house. Your seeds are certainly good and reliable in every respect. I am well satisfied with your service.

Yours truly,
WATSON COLE.

LOW PRICES on SELECTED, TESTED

SEED OATS

Sow Better Seed

This year seed oats are really scarce and the need for them is great. Many must start with new seed. Don't make the mistake of sowing anything that looks like oats just because the price is low. Spend a little more and get started with varieties that really can produce satisfactory yields.

Oats are unprofitable on some farms because of run down seed stock used. Hundreds have increased production greatly by using our improved strains. We have worked hard on seed oats this year because we wanted to be able to give you real service when you needed it most. Some seed stock has been shipped in from the Northwest to get something extra fine. In all varieties we have on hand we can give you plump, meaty, heavy re-cleaned stock. Supplies are quite short so order early.

NEW VICTORY

Certified Seed

A Magnificent Heavy Oat
See Sample Enclosed

These oats are simply so beautiful that words fail to give an adequate description. That is why we are enclosing a sample. Just see how big and plump and bright they are. This stock weight averages 44 lbs. per measured bushel. We paid a premium for this stock and brought the seed in from the Northwest at a heavy expense. This is a year when many farmers will need seed oats. This, then is also a time to get started with something better. Get started with these oats that are finer in appearance, better in yield and superior in feeding value.

These New Victory Oats are recognized as an outstanding variety. They grow straw of good length yet have the strength to resist lodging. Its sprangled heads, heavily laden with these oversize grains surely makes a wonderful sight in a field and a profitable harvest to gather. Introduce this new oat blood to your farm. Sell your first crop at a premium for seed. Show your neighbors what can be done with better seed.

The first cost naturally is higher. We have other oats and good ones too at considerably lower price. See page 32. But the extra cost of these is readily absorbed by increased production. Think of such seed stock, not as an expense but as an investment upon which good earnings may be secured.

Our seed is "Certified" stock. It is the very best we can secure for you. Shipment is guaranteed to be identical to sample.

Hall, W. Va.
Dear Sirs: I have been buying seeds from you for a number of years for my own use and for the Boulder Farm Club. The seeds have always given entire satisfaction, and we have saved over one hundred dollars by ordering from you.
Very truly yours,
Ira L. Dadisman

BIGGER YIELDS

LOW PRICES on
PAGE 33

GREAT NORTHERN

Big Heavy White Oats

One of our customers wrote, "I never saw such wonderful oats before in my life." You, too, will probably be amazed at their size and quality. They are truly magnificent. Big plump meaty kernels that have both length and thickness. They are beauties that weigh out heavily. Strong prolific stooling plants. Good stiff straw. Fairly tall growing, depending on soil and season. Superior to cut for hay. Quite early for so large a variety. This ranks right along with our Swedish Select having produced up to 137 bushels per acre. Customers who have grown both say they prefer our Great Northern.

Our northern grown seed is strictly A No. 1 Extra Fancy seed quality. Thoroughly re-cleaned, containing only the choicest grains. For seed purposes it certainly is worth the premium it costs to secure such extra selected seed. With such stock you can really show your neighbors something about growing oats. Generally the first crop grown in a neighborhood can be sold at a premium for seed purposes.

Good seed stock should not be considered as an extravagance. It is a wise investment that truly thrifty buyers will cash in on.

FULGHUM

Heavy Yelder—Disease Resistant

This is the heaviest producer of the early varieties. It outyielded other varieties by 12% to 17% in a seven-year test. Kernels are medium sized and golden yellow in color. The straw is short and spreading at the lower joints. It is one of the best to stand up on rich land and outyield others on thin soil.

Our Fulghums are especially resistant against smut. Where the Khersons showed 25% to 40% smut on a smut inoculated field hardly a trace could be found on the Fulghums. Its hardiness and vigor give it a marked resistance against disease. They sure can take a lot of punishment.

This oat can be sown extremely early. It is hardier than other varieties. In fact it gives its best results when sown early. For late seeding the Logold or Iowar is a little better. Friends, we are so thoroughly sold on the superior qualities of our Fulghums that we give them a special recommendation. For early sowing and early maturity we do not believe there is any other that will equal it in production.

BETTER SEED OATS

LARGER YIELDS

LOGOLD

This is a yellow oat like the Fulghum yet a distinctly different type. Stands somewhat later seeding yet matures remarkably early. It is remarkably rust resistant. Our Logold is a very heavy producer. Has outyielded Khersons by as high as 70%.

The straw is remarkably stiff. It is one of the best for rich land. On thin land it is one of the best you could select. This oat has a thin hull. Has a high percentage of meat and therefore an excellent feeding oat.

The kernels have a yellow cast in the color with a greenish tip at the end. Medium size grain. This soon clicks out the bushels at harvest in an amazing way. It's those extra bushels where you get your profit.

Our seed is selected and graded with great care. Such stock is far superior to the average run. All Logold stock will not produce like this seed.

That's why the seed is cheap at our prices. See Price List.

GOLDEN RUST PROOF

This is a big seller with us. It is unquestionably one of the best to sow where rust and other unfavorable conditions prevail. It is always a heavy producer and under unfavorable conditions is far in the lead in production. Berries are plump and heavy. They contain lots of meat. Color a rich golden yellow. Stiff narrow leafed straw.

These oats are quite early. Many of our customers think it is the only kind to sow reporting yields up to 100 bushels per acre. Our Golden Rust Proof has been a boon to thousands. They pile up the proof that better seed oats pay.

SILVER MINE

Our strain of this variety deserves the wide popularity it enjoys. A beautiful white oat with a soft hull. Nice meaty kernels. It is medium early and grows a medium length straw.

This is a select strain of the Silver Mine that should astonish a grower of the rundown stock he may be still using. Our seed is northern grown which is distinctly superior. Our cleaning and grading alone makes a big difference in results to be obtained.

You will bring back this variety in all its glory. It's like striking a new vein of pay dirt to get this improved Silver Mine for your acres. These oats are adapted to a wide area. Profit by their heavy production this year.

SWEDISH SELECT

New Regenerated Stock

These are those big heavy white oats that you may have seen in pictures or at grain shows. Here is your opportunity to grow them on your own farm.

They are a revelation in production. Yields up to 100 and 140 bushels per acre are reported. Kernels are large and meaty. Straw fairly tall, stands up well. Medium early maturity, large sprangled heads, heavily laden with rich grain.

Our seed stock is northern grown and thoroughly cleaned. You will be just as proud of your purchase as we are of the seed we are selling. In this northern seed you get finer looking and heavier producing stock than is possible with southern seed. It costs more but it certainly is worth every extra cent of it. Every pound shows the care that has been used in preparing the seed and all that counts a lot in piling up yields and profits. Use some of our better seed grain this year.

NEW HULLESS

Big Yields—No Waste—Fine Feed

Ordinary oats are 28 to 40% hulls. This variety has no hulls. It's all meat. Grains similar to rye but softer and lighter in color. They are also excellent producers in several cases, having outyielded the ordinary hulled oat. Even should it fall a little below in yield the increased feeding value of the Hulless makes it very profitable to grow.

Straw is of medium length and strong. Equally as hardy and drought resisting as ordinary oats. These oats can be fed without grinding. They certainly are fine feed. One grower reported his Hulless oat smut free while common oats were badly affected. In order to assure full protection against smut we treat all our Hulless oats with copper carbonate to destroy any smut spores. This treatment is effective only on Hulless.

Our seed is fine quality, carefully cleaned, and graded. It is a real seed stock. We have new low prices on these oats this year.

IOWAR

A wonderful early white oat. It was originated at the Iowa State Experiment Station from a 60 day variety. It outyields both the old Iowa 105 and 103. Grows a longer straw than the old kinds. The grain is medium size and has a thin hull. A wonderful feeding oat. Each kernel has a small black awn.

Many are acquainted with this variety because its performance has made it a great favorite. However, due to improper seed selection and preparation some of its most desirable characteristics are not fully secured. Our seed stock comes from heavy producing fields and the seed is graded so as to give you the most select seed stock.

You will find it money well spent to use such seed. Let us supply you with a better yielding, earlier maturing oat, having a higher feeding value.

SPELTZ

NORTHERN GROWN

ALSO CALLED EMMER

Great Drouth Resister. Practically Rust and Smut Proof. A Heavy Producer. Extra Rich Feed

This remarkable grain crop is really a type of wheat. The kernels are smaller and the shuck clings to the grain instead of becoming separated in threshing. The grain is somewhat softer and there are generally two grains in a shuck. Both shuck and kernel make excellent feed.

The stems of a speltz plant are pithy instead of hollow. It is unusually strong. Heads are compact and heavily set with grain. Leaves are velvety. It is a wonderful drought resister and in dry sections will outyield oats and barley. Matures very early and is grown from Canada to Texas and east and west across the continent. Its freedom from rust and smut makes it especially valuable when these diseases cause heavy loss. Speltz is a bearded grain.

You will find speltz a fine nurse crop. Its heavy yields, earliness and high feed value combine to make it a very satisfactory grain crop. Our customers are introducing the grain into all parts of the nation. The first grower in a neighborhood generally has the advantage of selling his first crop for seed.

NORTHERN GROWN

for

Start Growing Speltz

Show your friends what this crop can do. Sow $2\frac{1}{2}$ bushels per acre. Set your drill about as for oats. Sow as early as possible. It stands considerable frost damage. Thresh as for oats but not too close. Cut before it is dead ripe. Cut earlier if you want it for hay. There is nothing difficult about growing speltz.

Consider these facts. Speltz is a hardy crop; a heavy producer; a rich nutritious feed, does not lodge, makes a fine nurse crop; is drought and disease resistant and is a most desirable crop. Our seed is fine and prices are at new low levels.

We have some very fine speltz seed this year at low prices. Now is a fine time to get started with this grain. Send orders as early as possible.

Northern Grown SPRING RYE

This is a distinct variety. Strictly a spring grain crop. It is grown for grain, pasture, and hay. No doubt this triple usage is why the crop is so popular. The grain is practically the same as winter rye. It is a good yielder of grain. Good length straw. Sometimes used with Canada Field Peas for hay. Wonderful producer on good land and the best small grain for thin soil. Early seeding gives best result but may be sown later than most grains if necessary. Sow around 2 bushels per acre.

Rye makes a very fine feed as pasture and grain. Helps out on the early spring feed problem. We try to figure out the seed demand so we will have enough for our trade without any to carry over. Nearly every year we underestimate the demand so we ask you to order your spring rye early. It is a crop that we are sure will please you. It is a money maker and our prices on this northern grown high quality seed are very reasonable. See page 33.

Winter Wheat

We have some extraordinary varieties of winter wheat for fall seeding. Some of them are guaranteed to outyield your own stock. Along in July we publish a smaller bargain catalog describing and pricing winter wheat and also Alfalfa and other seeds for fall sowing. If you fail to get a copy of it be sure to write us for it. It will save you money.

Palmyra, Mo.
Dear Sirs:

The two cars of Seed Wheat we bought of you last year to which you gave the Copper-Carbonate treatment, proved very satisfactory and we had a wonderful yield from same. We were specially pleased with your usual prompt service. Having used your seeds for past 15 years makes me feel very kindly to the Berry Seed Co.

Yours very truly,
W. A. Rinehart.

SALE of ORNAMENTAL SHRUBS

**THE MORE YOU BUY
THE MORE YOU SAVE**

WE DO NOT SHIP NURSERY STOCK C.O.D.

Shrubs are to a house and lawn what a frame is to a picture. They dress it up. A property that is planted shows up better and therefore is worth more money. Besides it's more like some one who really cared is living there.

Our shrubs are all transplanted bushy and well developed stock. That grows quicker and takes in better form. Unless otherwise stated below the stock is 18 to 24 inch. All prices are postpaid unless otherwise stated.

If you cannot plant your stock when you receive it, dig a shallow trench or hole. Lay the plants in this, covering the roots with earth. Do not keep them in a hot or dry place. When planting be sure the holes are plenty large to allow for full spread of the roots. Sprinkle fine top soil around the roots. Water thoroughly, then rake some dry soil over the top. Keep moist but not waterlogged until growing.

ALMOND

3100 Flowering. Graceful, spreading shrub with attractive foliage, blooms profusely before leaves appear. PINK or WHITE. Postpaid price: 50c each; 2 for 90c.

ALTHEA

3103 Rose of Sharon. Provides color spots for fall. Blooms August-September. RED, WHITE or PURPLE. Postpaid price: 30c each; 4 for \$1.10.

BARBERRY

3104 Red Leaved, Japanese. The foliage is a rich, lustrous, bronze-red, becoming more and more brilliant until it changes to a vivid orange in the fall. See also HEDGING, Page 55. Postpaid price: 12-18 in., 30c each; 4 for \$1.10; 18-24 in., 40c each.

3202 (Japanese) Thunbergi. Has glossy green foliage, changing to coppery red in the fall. Attractive yellow blossoms and little red berries which hang on all winter. See also HEDGING, Page 55. Postpaid price: 30c each; 10 for \$1.70.

Cut Leaved Elder

BUDDLEIA

3000 Butterfly Bush. Rapid grower with very green foliage and attractive lilac flowers. Blooms June-October.

CORNUS, DOGWOOD

3121 Sibirica, Red Barked. This shrub has a real bright red bark. Foliage is dark green, flowers creamy white.

3123 Yellow Barked. Distinct yellow bark. Has fine winter effect.

CYDONIA

3106 Japonica (Flowering Quince). Grows about 6 feet tall. Like a blaze of fire when in bloom. Produces showy scarlet flowers in April.

DEUTZIA

3113 Pride of Rochester. Tall grower, free bloomer, double white flowers tinged pink. Blooms in May. Grows about 6 ft. tall.

ELAEGNUS ANGUSTIFOLIA

Purple Lilac

3300 Russian Olive. Attractive silvery gray leaves, white berries. Used frequently for hedge and windbreaks. Very hardy. See also HEDGING, Page 55.

ELDER

3131 Cut Leaved. Leaves are deeply cut, which gives it a beautiful fern-like appearance. Grows about 8 ft. tall. Has white flowers in May and June. Postpaid price on each of above 7 varieties: 30c each; 4 for \$1.10.

Barberry

ELDER (Continued)

3130 Golden. It is one of the very finest of golden-leaved shrubs, hardy, rapid grower. Shows up best with a green background.

EUONYMUS

3301 Wahoo or Firebush. Native, hardy, vigorous shrub or small tree producing an abundance of scarlet berries. Attractive colored foliage in autumn.

FORSYTHIA

3302 Fortunei. Upright, arching branches, with bright yellow flowers early in April.

3303 Suspensa Weeping. Slender pendulous branches. Golden yellow flowers early in April.

HONEYSUCKLE

3150 Tartarian. Old favorite Bush Honeysuckle. Blooms in June, producing bright red berries. PINK, RED or WHITE. See also HEDGING, Page 55.

HYDRANGEA

3141 Arborescens Grandiflora. Snowball. Large, double white flowers blooming in June and July. Thrives in shady places.

Hydrangea

3140 Paniculata Grandiflora. A very hardy shrub with large trusses of showy double white flowers, blending into pink and bronze shades in autumn. Blooms from July to October. Postpaid price on each of above 7 varieties: 30c each; 4 for \$1.10.

KILKWITZIA AMABILIS

3304 Beauty Bush. A graceful shrub, growing 4 to 6 ft. high, covered with small pink flowers in May. Postpaid price: 40c each; 3 for \$1.10.

LILACS

French. Popular because of their attractive flowers of various colors and foliage. Order by name. Postpaid price: 40c each; 3 for \$1.10.

3305 Chas. Joly. Double, very dark reddish purple; striking.

3306 Chas. X. Single, reddish purple, fading to mauve.

3307 Ludwig Spaeth. Single, very dark crimson-purple.

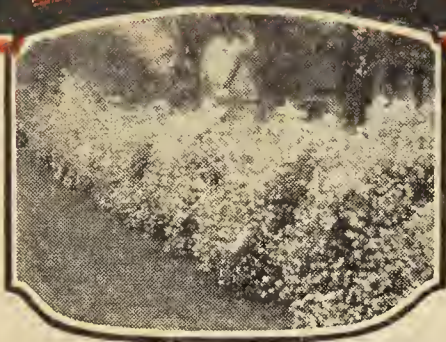

3308 Mme. Lemoine. Double, large white blossoms.

3160 Common or Old Purple. Blooms freely. Purplish, single lilac flowers in large panicles from April to May. Postpaid price: 30c each; 4 for \$1.10.

3161 Common White. Hardy, vigorous grower. Single white flowers. Postpaid price: 30c each; 4 for \$1.10.

3162 Persian Purple. Very stately. Slender arching branches with small leaves. Pale lilac flowers. Postpaid price: 30c each; 4 for \$1.10.

FRAME YOUR HOME WITH SHRUBS

clusters of small fragrant flowers.

3172 Virginal. Grows moderately tall in compact, bushy form, with beautiful fragrant semi-double flowers. This is a magnificent variety. We recommend it highly. Almost a perpetual bloomer. Postpaid price on each of above 3 varieties: 30c each; 4 for \$1.10.

PRIVET

3230 Amoor River. A hardy hedge plant with rich, attractive green foliage. Holds its leaves until late in the fall. Adapted to cold places. See also HEDGING, Page 55. 2 feet. Postpaid price: 10 for \$1.40.

3232 Regel. A low growing dense shrub with horizontal, spreading branches. A fine, hardy hedge plant. Postpaid price: 30c each; 4 for \$1.10; 10 for \$2.00.

RHODOTYPOS

3309 White Kerria. A distinct shrub with bright green foliage. Has single white flowers in April and May, and bears black shiny fruit in autumn and winter.

RHUS CANADENSIS, SUMAC

3236 Fern Leaved. Grows about 10 ft. high. A rapid grower with attractive long feather leaves, finely cut.

ROSE ACACIA

3310 Flowering Locust. Has a beautiful light green locust-like leaf. Branches are covered with rosy pink, attractive flowers in April and May.

SNOWBERRY

3190 Common or White. Has attractive green foliage, and pink flowers in June and July. Bears clusters of large white fruit in autumn.

3191 Coralberry or Red. Bears coral red berries through autumn and winter. Very hardy.

SPIREA

3200 Anthony Waterer. A valuable dwarf shrub, very compact and low growing. Flowers dark crimson pink, blooming from June to September.

3205 Billiardi. Grows about 4 ft. high. Blooms from July to September, with bright pink flowers in spikes.

3202 Froebeli. A vigorous, spreading grower. Very hardy. Bears bright pink flowers in May and June.

3203 Thunbergi. A low growing shrub with slender, spreading branches, and feathery bright green foliage. Blooms in April, showy white flowers.

3204 Van Houtte. So-called Bridal Wreath. Grows 5 to 6 feet high. Blooms profusely in April and May with pure white flowers, resembling a fountain. See also HEDGING, Page 55.

TAMARIX

3210 Africana. Bears pink flowers early in the spring before leafing out. Foliage feathery green.

3311 Hispida. One of the best, very hardy, with feathery silver foliage. Bears bright pink flowers in June and July, remaining in bloom longer than other varieties. Postpaid price on each of above 12 varieties: 30c each; 4 for \$1.10.

VIBURNUM, SNOWBALL

3180 Dentatum (Arrowhead). Bushy growth, attractive foliage. Single white flowers borne in April and May, followed by bluish-black fruit. Postpaid price: 30c each; 4 for \$1.10.

3181 Lantana (Wayfaring Tree). Upright grower with attractive green leaves. Blooms in May, single white flowers, followed by bright red fruit, changing to black. Postpaid price: 30c each; 4 for \$1.10.

3135 High Bush Cranberry. A well-known hardy shrub, bearing single white flowers in April and May, followed by scarlet fruit hanging on until spring. Postpaid price: 40c each; 3 for \$1.10.

3182 Common Snowball. Grows about 10 ft. high. Blooms profusely in April and May, bearing large double-white flowers. Postpaid price: 30c each; 4 for \$1.10.

WEIGELA

3220 Candida. A vigorous, upright grower, with large pure white flowers. Postpaid price: 40c each; 3 for \$1.10.

3221 Eva Rathke. Of dwarf habit. Most free blooming of all Weigelas, producing brilliant crimson flowers in May and June. Postpaid price: 30c each; 4 for \$1.10.

3222 Rosea. Hardest of all the Weigelas. Blooms freely. Beautiful showy pink flowers in May and June. Postpaid price: 30c each; 4 for \$1.10.

Philadelphus Virginal

Spirea Van Houtte

Snowberry

SHRUBS INCREASE HOME VALUES

HEDGES ARE NATURE'S FENCES

They combine the beautiful with the practical. They require no painting. There is no upkeep cost. You can change the design by trimming. A nice hedge gives distinction to any home. They always attract attention. Hedging plants may be used for foundations or in group plantings.

If a single row is desired, place plants 10 to 12 inches apart in the row. Double rows should be 18 inches apart, with the plants 18 inches apart in the row. Stagger the plants so they do not stand opposite each other. Tall growing hedge plants should be set 2 to 4 ft. apart.

The small to medium type of evergreens may be very effectively used for hedges. See page 62. That page also lists seedlings of various tree types that may be used for tall hedges and windbreaks.

3104 Red Leaved Japanese Barberry. Makes a dense, moderately low-growing, compact hedge. In autumn the leaves are a brilliant crimson, changing to a vivid orange. 6-9 inch. Postpaid price: 10 for \$1.75; 25 for \$3.50; 100 for \$12.50.

3102 Barberry Thunbergi (Japanese). As an ornamental fence or hedge, either trimmed or untrimmed, this Barberry has no superior. Grows 3 to 4 feet. Prickly branches, covered with luxurious foliage. 12-18 inch. Postpaid price: 10 for \$1.20; 25 for \$2.35; 100 for \$6.00.

3312 Buckthorn. Perfectly hardy and very ornamental. Makes a fine screen or hedge. Can be trimmed to any desired shape. 12-18 inch. Postpaid price: 10 for \$1.20; 25 for \$2.35; 100 for \$6.00.

3150 Honeysuckle, Tartarian. Perfectly hardy and very attractive for hedge. 12-18 inch. Postpaid price: 10 for \$1.75; 25 for \$3.50; 100 for \$12.50.

3313 Russian Mulberry. Stands hot, dry weather exceptionally well, and will stand severe pruning. Most attractive when trimmed. 12-18 inch. Postpaid price: 10 for 35c; 25 for 55c; 100 for \$1.85.

3300 Russian Olive. Tall growing. Can be used either trimmed or untrimmed. Its foliage of a remarkable silvery hue shows up in striking contrast to other shrubs and trees. 12-18 inch. Postpaid price: 10 for \$1.20; 25 for \$2.35; 100 for \$6.00.

Japanese Barberry

Amoor River Privet

2802 Bittersweet. A vigorous twining vine with broad pointed leaves of attractive color; very hardy, grows in sun or shade. Yellow flowers in June, followed by bright orange and scarlet berries in fall and winter. Good for low walls or rock piles. Postpaid price: 40c each; 3 for \$1.10.

2803 Boston Ivy. One of the finest hardy climbers. Clings firmly to smooth surfaces, does not have to be tied. Leaves glossy, three-lobed. Makes a wall of green that changes in fall to bright crimson and yellow. Postpaid price: 40c each; 3 for \$1.10.

2804 Dutchman's Pipe. This tall, twining vine is much admired for its large, broad leaves and purplish and yellow-green flowers which bear a striking resemblance to a Dutch tobacco pipe. Does best in deep, rich soil and sunny location. Hardy and long lived. Postpaid price: 60c each; 2 for \$1.10.

2805 Engelmann's Ivy. Clings to walls and trees by means of tendrils like the Boston Ivy. Foliage resembles the Virginia Creeper, but is smaller and denser. A very hardy vine and rarely winter-kills. Postpaid price: 35c each; 3 for \$1.00.

2812 Silver Lace Vine. A rapid growing climber producing throughout the summer and fall large, foamy sprays of creamy white flowers. A beautiful, showy vine. Postpaid price: 50c each; 2 for 90c.

2806 Trumpet Vine. A high climbing, vigorous vine. Light green leaves. Flowers are orange-scarlet trumpet shaped and grow in large clusters. Postpaid price: 40c each; 3 for \$1.10.

2807 Wisteria, Purple. A very handsome climber with attractive foliage. Flowers are borne in magnificent purple clusters during May and June and after August. Exceptionally desirable for porches, pergolas and trellises. Postpaid price: 35c each; 3 for \$1.00.

2808 Wisteria, White. A strong grower and very beautiful when in flower. Extra long clusters of white blossoms. Postpaid price: 40c each; 3 for \$1.10.

2813 Honeysuckle, Hall's Japan. Rapid growing vine with beautiful foliage. Delightfully fragrant, creamy white flowers, June till September. Makes a fine covering for caves or unsightly places. Postpaid price: 35c each; 3 for \$1.00.

CLEMATIS. The most beautiful of all climbing plants. Need good, rich, deep soil, good drainage. Plant crowns 3 inches below surface. 2-year plants.

2810 Large Flowering Jackman. Grows to about 10 ft. Large velvety violet-purple flowers July to September. Postpaid price: 75c each; 2 for \$1.40.

2811 Small Flowering Paniculata. Literally covered with alluringly fragrant white flowers in September. Grows 20 to 30 ft. in length. Postpaid price: 40c each; 3 for \$1.10.

3230 Amoor River Privet. No shrub is more popular than privet for neatly trimmed formal hedges. Withstands frequent shearing, grows dense, and has excellent foliage. Will grow as high as 10 feet if not trimmed. 12-18 inch. Postpaid price: 10 for \$1.20; 25 for \$2.35; 100 for \$6.00.

3204 Spirea Van Houtte. One of the grandest shrubs for a tall hedge grows up to 6 ft. Is most attractive when untrimmed. Very thrifty. 12-18 inch. Postpaid price: 10 for \$1.20; 25 for \$2.35; 100 for \$6.00.

Pruning Shears make quick neat work for hedge trimming. They are also indispensable for pruning grapes and small fruit. We have an excellent quality shears and the price is only 80c, Postpaid. **SPECIAL.**

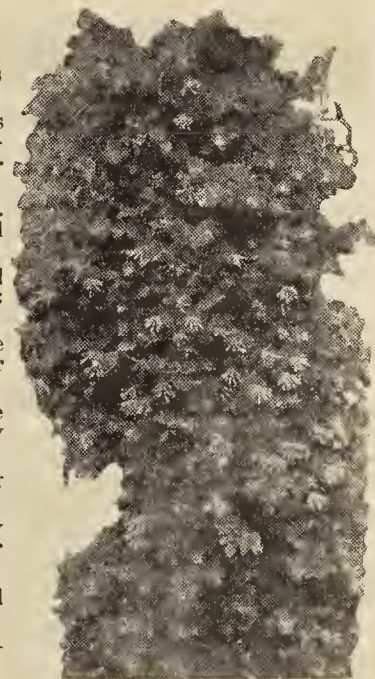

Vines Add Charm and Beauty

Vines give a charming natural beauty that cannot be equalled by any other plant. They have their practical value in giving luxurious shade. You can use them to cover or hide unsightly places or to break the monotony of large wall surfaces.

Often the soil near foundation walls is poor and vines do not do well under such circumstances. In such cases the vines may be set 2 or 3 ft. from the wall. When the shoots are long enough dig a shallow trench up to the wall, lay the shoots in this, letting the ends stick out in a fan-like shape.

The vines here listed are permanent. They are two year—medium grade. Most suitable for producing quick results. Quick growing vines produced from seed may be found listed on page 22 of this catalog.

2801 American Ivy or Virginia Creeper. This is a favorite with many. Its deeply cut green leaves turn to crimson in the fall. Perfectly hardy everywhere. Grows in practically every soil. Must be tied up, will not cling to walls. Postpaid price: 35c each; 3 for \$1.00.

Honeysuckle

For YOUR Flower Garden

BERRY'S *HARDY* PERENNIALS

LESS WORK - FINER BLOOM

POPULAR PERENNIALS

Perennials are the charming garden flowers that come up every spring without replanting. Our plants are field grown stock of such size as is most satisfactory for general planting. They will bloom the first year if properly cared for.

2485 Bleeding Heart, Spectabilis. Suited for shady spots, in loose soil.

2550 Bleeding Heart, Fern Leaved Everblooming. Good rock garden plant.

2487 Canterbury Bells (Campanula). Called cup and saucer. Can furnish blue, white or pink.

Postpaid price on each of above 3 varieties: 40c each; 3 for \$1.10.

2489 Carnations. Hardy garden type. Bloom from June to frost. Can furnish pink, white or red.

2551 Chrysanthemums, Hardy. Our selection. Bloom in September and October.

2490 Columbine, Long Spurred Hybrids. Grow in sun or shade. Blue, pink and yellow.

2491 Coreopsis Lanceolata. Large yellow daisy-like flowers, bloom June and July.

2492 Delphinium Belladonna. Large flowers on long spikes. Beautiful shade of light blue. 3-5 ft.

2552 Delphinium, English Hybrids. Flowers range from light to deep blue, blooming all summer.

2494 Gaillardia (Blanket Flower). Daisy shaped, flowers yellow and crimson.

2495 Gypsophila Paniculata (Baby Breath). Flowers pure white. 2 ft.

2553 Hibiscus (Mallow Marvel). Very large blooms. Pink, red or white.

2554 Live-for-ever (Sedum), Dwarf. One of the best plants for rock gardens, covering graves, etc.

2555 Lupines. Flowers borne on long spikes. Must be planted in moist soil.

Postpaid price on each of above 11 varieties: 30c each; 4 for \$1.10.

2496 Oriental Poppy. Brilliant scarlet flowers. Grow in sun or part shade. Postpaid price: 40c each; 3 for \$1.10.

2556 Perennial Sweet Pea. Can be used as a vine, excellent for covering trellises. More wax-like than Sweet Peas, and lack their fragrance. Postpaid price: 30c each; 4 for \$1.10.

2557 Pyrethrum, Atrosanguineum. (Painted Daisy). Hardy. Flowers deep red. Postpaid price: 40c each; 3 for \$1.10.

2481 Shasta Daisy. Large white flowers, small yellow center. Postpaid price: 30c each; 4 for \$1.10.

2482 Sweet William. Large flowers with brilliant colors. Hardy. Can furnish pink, red or white. Postpaid price: 30c each; 4 for \$1.10.

2558 Tritoma. (Red Hot Poker.) Foliage grass-like. Blooms range from orange to deep coral. August and September. Postpaid price: 40c each; 3 for \$1.10.

PHLOX—The most popular of all Perennials. Great trusses of bloom throughout the summer. Our stock very hardy.

2476 R. J. Struthers. Salmon red.

2477 Rijnstrom. Crimson-pink. Good, strong grower.

2478 F. W. Von Lassburg. A splendid tall, white variety.

2479 Richard Wallace. Peach-blossom. A very hardy grower.

2460 B. Compte. Rich purple.

2461 Champs Elysee. Purplish-red.

2462 Sublata Dwarf, Moss or Creeping Phlox. Pink and white.

All Phlox, Postpaid: 25c each; 5 or more, 20c each.

1342 Pansy Plants, Berry's Ruffled Beauties. A fine imported strain of Giant varieties. Well blended. Will bloom immediately after planting. Postpaid price: 50c dozen; 3 dozen \$1.20.

PEONIES

2501 Couronne D'Or. Color milk white, reflecting yellow.

2502 Edulis Superba. Early. Bright pink and violet shades.

2503 Felix Crousse. Big, beautiful, glorious red. Midseason.

2504 Festiva Maxima. Finest white, tinted crimson center.

2505 Francois Ortegat. Dark rich red, semi-double. Mid-season.

2506 Karl Rosenfield. Very large dark crimson.

2508 Mme. DeVerneville. Pure white petals, carmine tipped.

2509 Monsieur Jules Elie. Glossy flesh-pink with a silvery reflex.

2510 Augustin D'Hour. Deep red, with slight silvery reflex. Full bomb center.

2511 Duchesse DeNemours. Real early. Is sort of cup-shaped when the first bloom comes out. Sulphur-white color.

2512 Frangans. A late variety but a free bloomer. Red in color. Postpaid price on all peonies: 30c each; 4 for \$1.10.

Carnation—Dwarf Marguerite

GERMAN IRIS

A. E. Kunderd. Yellow-bronze. Good bloomer.

Alcazar. Light bluish violet.

Quaker Lady. Ageratum blue blended with yellow. Very attractive.

FRUITING
VARIETIES**

Start this high
grade delicious
fruit on your
place this year

If roots are dry when plants arrive place them in water a few hours before planting. When setting plants place as low as possible but do not cover the crown. Make sure the soil is pressed firmly around the roots. A mellow soil with plenty of humus is needed for best success. Cut off tops of plants after they have stopped fruiting for the season.

ALL STRAWBERRY PLANTS LISTED ARE SELF-POLLENIZING

MASTODON STRAWBERRY PLANTS

THE GENUINE GIANT EVERBEARING STRAIN

3430 Mastodon. If you want the finest strawberry plants for home or commercial use, try our Giant Everbearing Mastodons. Bears 10 months out of 18. The berries are uniform; large and firm, and the plants are large, vigorous, deep rooted, and produce enormous loads of fine fruit. Mastodons are real money-makers and are ready sellers at roadside markets. Postpaid: 50 plants, \$1.00; 100, \$1.75; 200, \$3.00; 500, \$6.75. Not Prepaid: 1000, \$11.95.

SPRING BEARING PLANTS

3400 Senator Dunlap. The best known and favorite variety for spring bearing, producing fine, large fruit, of a deep rich red color. The berries are firm and solid, uniform in shape, and hold their color and shape well after canning or preserving. Plant is highly productive, a great plant maker, and will withstand hardness. Postpaid: 100, \$1.00; 200, \$1.85; 500, \$3.75. Not Prepaid: 1000, \$6.50.

3431 Dorsett. A new variety which promises to be popular as a commercial berry. The berries are distinctive in appear-

ance, a brilliant light red, and hold color well. Excel in quality and are of superior flavor, firm and not easily bruised. Plants are free from disease; plant growth vigorous. Ripen early and have a long fruiting season. Postpaid: 100, \$2.25; 200, \$4.00.

3432 Fairfax. A dandy new variety, outstanding in firmness, high quality and appearance, and long fruiting season. Berries are attractive, bright red in color, rich in flavor, very firm and will stand long distance shipments. The plants are healthy and vigorous, heavy producers. Postpaid: 100, \$2.25; 200, \$4.00.

3416—The Blakemore. Developed by the U. S. Department of Agriculture. It is considered by far the best commercial variety. Berries are tarty, of a bright red color, ripen early, and are excellent for canning, preserves, etc. Plants are disease resistant. Postpaid: 100, \$1.00; 200, \$1.85; 500, \$3.75. Not Prepaid: 1000, \$6.50.

Senator Dunlap

FULL FLAVORED GRAPES

Concord

Grapes will grow on most any type of soil. For best results it should be of good depth and drainage. Too rich a soil is not advisable. Set vines 8 feet apart. Tie up runs the second year. Pruning may be done any time after leaves have fallen, until spring but do not prune when they are frozen. For Pruning Shears, see Page 63.

3775 Concord. The standard of excellence among black grapes. Berries jet black, sweet, juicy and of excellent flavor. Vines hardy and productive. Postpaid Price: 1-yr., 12c each; 10 for 90c; 100 for \$7.50. 2-yr., 17c each; 10 for \$1.25; 100 for \$10.00.

3776 Moore's Early. Black, similar to Concord, but berries larger, and bunches somewhat smaller and looser. Very fine for market purposes. Ripens a week ahead of Concord. Postpaid Price: 1-yr., 15c each; 10 for \$1.15; 100 for \$9.50. 2-yr., 20c each; 10 for \$1.50; 100 for \$13.00.

3880 Beta. One of the hardiest, surviving and producing in the colder parts of the Northwest. Fruit black, juicy. A vigorous grower. Excellent for covering arbors. Postpaid Price: 1-yr., 15c each; 10 for \$1.15; 100 for \$9.50. 2-yr., 20c each; 10 for \$1.50; 100 for \$13.00.

3881 Caco. One of the most delicious of all grapes. Berries wine-red, hanging in good-sized bunches. Very strong, vigorous growers, healthy and prolific. Postpaid Price: 1-yr., 29c each; 10 for \$2.40; 2-yr., 39c each; 10 for \$3.40.

3778 Agawam. Berries large, meaty; dark purplish-red. Ripens late and can be kept until mid-winter. Postpaid Price: 1-yr., 15c each; 10 for \$1.15; 100 for \$9.50. 2-yr., 20c each; 10 for \$1.50; 100 for \$13.00.

3779 Niagara. Greenish white. Bunches large and compact; heavy yielder. Most satisfactory of all white grapes. Postpaid Price: 1-yr., 15c each; 10 for \$1.15; 100 for \$9.50. 2-yr., 20c each; 10 for \$1.50; 100 for \$13.00.

BERRY'S SMALL FRUIT

CULTURE OF BUSH FRUITS

Planting on a slope with a northern exposure provides cooler conditions which is best for bush fruits. The ground should be well supplied with humus because such soils hold moisture better. That is also important. Plant bushes about two inches lower than they stood in the nursery. Some plant in shallow ditches and fill in ground later thus securing a deeper covering. Keep the soil well mulched by frequent shallow cultivations.

Our plants are sturdy well developed specimens. There is a big difference in the quality of plants and we ask you to consider the character of our stocks when comparing prices.

BLACKBERRIES

Postpaid: 25 or less, 8c each; 25 for \$1.50; 100, \$4.95.

3700 Eldorado. The plants are vigorous growers, very resistant to disease, and produce heavily. Excellent size, color and flavor. A variety of commercial importance and excellent for home use. Very hardy. Unexcelled for quality.

3702 Snyder. Hardest of all. Bears heavy crops. Berries are medium size and of splendid flavor; fine for home or market. Has a long bearing season.

CURRANTS

Postpaid: 25c each; 10, \$1.90; 100, \$12.00.

3765 Cherry. Fruit produced in short clusters; berries of large size, dark red color; good quality. Rather acid, but fine for jelly.

3766 Fay's Prolific. Is not so red. Long large bunches, big berries. It is very productive, and fruit hangs on well. Better flavored than Cherry.

3767 Improved Perfection. A cross between Fay's Prolific and White Grape. A beautiful bright red. An excellent variety.

DEWBERRIES

Postpaid: 25 or less, 12c each; 25 for \$2.50; 100, \$8.00.

3769 Lucretia. Strong grower, very productive. Fruit ripens ahead of the earliest blackberries, is glossy black and resembles the blackberry, but of milder richness in flavor. Grows low and trailing.

GOOSEBERRIES

Postpaid: 25c each; 10, \$1.90; 100, \$12.00.

3770 Downing. Is a compact grower, always dependable. Fruit large, of fine size and appearance. Fine for home use and canning. Rarely affected by mildew. A heavy producer.

3771 Houghton. A heavy producer. Fruit of fine quality either green or ripe. Berries turn red when ripe. Very widely grown because of big yields and delicious flavor.

MISCELLANEOUS ROOTS and PLANTS

629 Asparagus Roots. Washington Rust Proof. Developed by U. S. Department of Agriculture. Heavy bearing, produces large and tender shoots. If you are troubled by rust in your asparagus bed, by all means get started with this variety.

Postpaid: 1-year, 100 roots, \$1.25; 2-year, 100, \$2.10.

See page 5 for prices on seed.

630 Rhubarb Roots. No garden should be without this spring tonic. Can be grown from seed (see page 14), but much quicker results are secured from our strong healthy 1 or 2-year roots, your choice. We can supply either Victoria or Mammoth. Postpaid: 10 for 75c; 25 for \$1.25.

631 Horse Radish Roots. Crowns. These are the quickest to grow and are most generally used. The ground roots of the plant make an excellent relish. Postpaid: 10 for 75c; 100 for \$5.50.

632 Horse Radish Roots. Cuttings. Pieces of roots that will develop into plants. Postpaid: 10 for 60c; 100 for \$3.00.

633 Sage Plants. Broadleaf. Used for seasoning soups, dressing, etc. Strong 2-year-old. Postpaid: 10 for \$1.50; 100 for \$12.00.

Get your neighbors to join with you in making up your order. Take the advantage of quantity prices.

Eldorado

RASPBERRIES BLACK

Postpaid: Two-year Transplants, 25 or less, 12c each; 25 for \$2.50; 100, \$8.00. Tips, 100, \$4.95.

3750 Cumberland. Is the best known of all the black caps. The plants are tall, vigorous, hardy, and heavily productive. The berries are glossy black, sweet and excellent. They are large and firm. We consider this the most profitable kind to grow.

RASPBERRIES RED

Postpaid: 25 or less, 8c each; 25 for \$1.50; 100, \$4.95.

3723 Chief. A new Minnesota variety, earlier, harder, very productive. Fruits

Cumberland

smaller, but of delicious flavor. This new berry is becoming very popular and we urge you to get started with them.

3724 Early King. Very hardy and fine for cold climates. Ripens early. Fruit light red, soft. Fine for home growing.

3725 Latham (Minn. No. 4). A very fine fruit for home or market. Rich red color, large size. Canes vigorous and nearly thornless. Very hardy. Berries are firm. Has a long bearing season. We recommend this one highly.

3726 St. Regis or Everbearing Red. The berries begin to ripen early and usually continue to bear until well into October. Berries are good sized and colored brilliant crimson. Very prolific. A good canner.

OUR PRICES ARE LOWEST

ORCHARD and FRUIT TREE

SPECIALS

HIGHEST QUALITY
NORTHERN GROWN
STOCK

Jonathan

OUR FRUIT TREES are extra selected stock. Grown only 25 minutes' drive from our Seed House. Hundreds of acres of all kinds of nursery stock to select from and under Supervision of Horticulturists from the State Department, which makes the stock you buy free from disease; and another feature: your nursery stock does not make two or three trips before you get it.

GUARANTEE

We guarantee that our stock will reach the purchaser alive and in a growing condition. If not so, notify us on receipt of stock and we will replace free at once. If stock fails to grow when planted and we are notified by October 1, 1935, we will make replacement at half price.

SIZES We offer all our fruit trees in two sizes. The mail sizes are two-year trees, 2-4 foot. The express or freight sizes are three-year, 4-6 foot. Express size fruit trees can be sent by mail for 10c additional on each tree.

SUMMER APPLES

3500 Red June. The first red apple to ripen in summer. Early bearer, hardy. Solid red in color, flesh white, tinged with pink. High flavor.

3501 Yellow Transparent. Flesh white, juicy and fine grained. Very fragrant when fully ripe. Fine for eating or table use. Ripens in August. Bears young. Excellent commercial variety.

3502 Duchess. Early, very hardy. Fruit is of large size and heavily striped with red. Cooks splendidly.

3504 Early Harvest. Medium size, yellowish white. Splendid for eating or cooking, excellent for home or market.

3518 Tolman Sweet. Green skinned; flesh moderately juicy, sweet, good flavor. Valuable for baking. Will keep until April.

3519 Northwestern Greening. Tree hardy, vigorous, bears early. Fruit extremely large, crisp, juicy, keeps well.

3522 Red Rome Beauty. One of the best large round red apples. Flesh firm, of mild pleasant flavor, excellent for eating. Produces heavily. Good for home or market.

3523 Northern Spy. One of the largest red apples, excellent flavor and keeping quality. Tree is a strong grower and very productive.

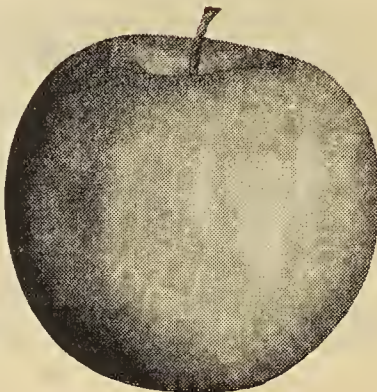

Apple Trees in Our Nursery Rows

FALL OR AUTUMN APPLES

3503 Maiden Blush. Fruit medium to large, yellow skinned, with a beautiful blush on side. Has a pleasant sub-acid flavor. Moderately large grower and a good cropper.

3505 Fameuse or Snow. Flesh snowy-white, crisp. Has an excellent flavor. Ripens in November and will keep up into January. An important commercial variety.

3506 Wealthy. Ripens in mid-September and suitable for use as late as Christmas. Light yellow heavily streaked with red. Flesh is white, tinged with pink; fine grained, very juicy, excellent flavor.

Yellow Transparent

CRAB APPLES

3520 Red Siberian. Fruit about an inch in diameter, brilliant yellow with an attractive red cheek. Very juicy and excellent for jellies and pickles. Tree grows to large size.

3521 Whitney Crab. A rapid grower, hardy. Fruit large, yellow, marked with red. Very juicy and fine grained; flavor rich, almost sweet.

PEACHES

3574 Champion. Very hardy, and heavy bearer. Creamy white skin, red cheeks. Freestone. Delicious flavor. Ripens about two weeks before the Elberta.

3575 Crawford's Early. Freestone. An early market variety. Fruit very large. Color yellow. Juicy and exceptionally fine flavored.

3576 Elberta. The great market peach of the Southwest. Very large. Rich, juicy, tender flesh.

3577 J. H. Hale. Freestone. Flesh fine grained, fine flavored. One of the best home orchard varieties.

3579 South Haven. Freestone. A new variety. Very hardy, heavy bearer. Fruit large yellow, with red blush. Exquisite flavor.

Bartlett

CHERRIES

3550 Early Richmond. The most popular and earliest real sour cherry. Large fruits are borne in clusters that are deep red in color. It is an excellent cherry for pies and canning. Stones are small and free. Tree grows large and produces abundantly.

3551 Large Montmorency. The best mid season variety. About 10 days later than Early Richmond. Fruits are large and very tender and juicy, color deep red. Very meaty and has a delicious rich flavor. The tree grows erect, is very hardy and starts bearing very young.

3552 English Morello. The tree has a somewhat dwarf habit but is enormously productive. The fruits are very large and almost black. Matures quite late. The meaty pulp is sharply but deliciously acid. This is one of the best late sour cherries.

3554 Black Tartarian. A sweet cherry. Fruits are very dark. Purplish red flesh, meaty, juicy and rich. Ripens early. Tree is long lived and grows to a very large size.

3555 Yellow Glass. A hardy sweet cherry. The flesh is solid, juicy and sweet. The distinctive golden yellow color makes it an unusually attractive variety. It is a cherry of high quality.

Large Montmorency

PLUMS

Sapa Plum

3625 Waneta. One of the new Hanson hybrids, and the best one of the list. Two inches in diameter, bright red color; wonderful quality. A long keeper. Early bearer and hardy anywhere. Tree is a fast grower.

3626 Terry. Fruits large, of high quality. Hardy anywhere and sure to bear. Thick yellow meat. Excellent for canning, cooking, jelly or preserves. A native variety.

3627 Sapa. A glossy dark purple skin, rich dark purple flesh. One of the best Hanson hybrid cherry varieties. Bears early, yields well. Extremely early. Good eating and preserving plum. Makes delicious, sweet, deep wine colored sauce.

3628—Underwood. A new variety. Large roundish oval shaped fruit; red color. Juicy flesh. Ripens early and continues over a long period. Small cling stone.

3629 Little Blue Damson. Ripens in early September. One of the best plums for canning. Fruits small, black. Unsurpassed for hardiness and productiveness.

3630 Golden Rod. A new Minnesota hybrid. Tree vigorous, upright. Fruit medium sized, clear yellow color; moderately juicy and sweet. Ripens last of August.

3631 Burbank. A Japanese plum. Tree is a tall, wide spreading grower and very heavy producer. Fruits large and of a delicate flavor. Flesh golden yellow, skin red over yellow with a heavy bloom. We consider this the best in its class.

PEARS

3600 Bartlett. The most extensively grown of all varieties. Fruit is distinctly pear shaped. Flesh is fine grained, sweet, juicy and tender. Flavor exquisite. Skin golden yellow with red cheek. Tree grows large and is consistently a heavy bearer. Matures quite early.

3601 Kieffer. Very popular. Fruit large in size. Color golden yellow with a red blush when kissed by the sun. Flesh white, juicy and rich. An excellent winter keeper. Matures late. Trees are very hardy and always bear well.

3604 Douglas. Fruit is of large size, golden yellow tinged with pink blush. Flesh white, fine grained, juicy and of good flavor. Remarkable because of the earliness with which trees begin to bear. Heavily productive, blight resistant.

3602 Duchess. Largest of all pears. Their size excites wonder and admiration. Greenish yellow color streaked with russet. Rich flavor. Trees are vigorous and productive.

3603 Seckel. Trees are very resistant to disease. Fruits are small but deliciously flavored. The excellent quality wins many friends. Splendid for home use or local market.

APRICOT

3641 Moorpark. The largest fruit of any apricot. Creamy yellow color with red cheek. Flesh thick, juicy, excellent flavor. Tree large, upright and heavy bearer. A free stone of superior quality. Mail Size—Postpaid: 45c each; 3 trees for \$1.20; 10 for \$3.50; 25 or more, 30c each.

Express Size—Not Prepaid: 55c each; 3 trees for \$1.50; 10 for \$4.50; 25 or more, 40c each.

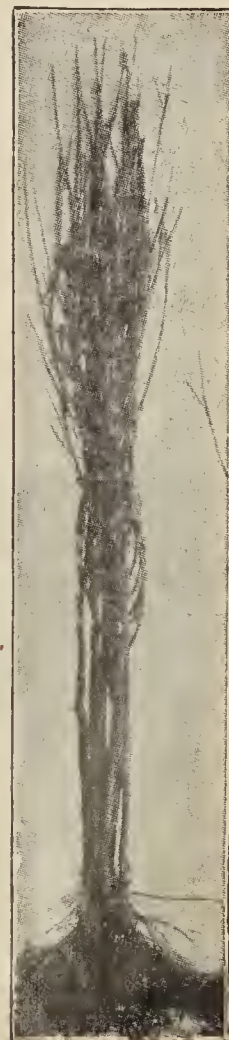

NAME YOUR NEAREST EXPRESS OFFICE. WE CANNOT SHIP NURSERY STOCK C. O. D.

PLANTING SUGGESTIONS

The top soil is not so important for fruit trees as a deep subsoil that will permit a full root development. If you cannot plant when you receive the stock prevent drying out by keeping wet burlap sacks around roots. For longer storage heel the trees in. Plant an inch or two deeper than nursery planting. Dig holes plenty large. Sprinkle fine soil around roots and tramp the soil firmly. This is most important.

Keep top soil cultivated and manured like a good garden soil.

Photograph to the right shows vigorous well rooted character of our fruit trees.

Fir, Douglas. Makes a large symmetrical tree. Foliage bluish-green. Drought resisting. Survives in dry soils where others will not. \$2.25 each; 2 for \$3.75.

Arbor Vitae, Pyramidal. Broad at the base, tapering to the top. Straight narrow columnar shape. Bright green the year around. \$2.75 each; 2 for \$1.50.

Evergreen

ORNAMENTAL and SHADE TREES

NOT PREPAID, UNLESS SO SPECIFIED

2827 Birch, Cut Leaf Weeping. A graceful, white barked tree with drooping limbs and cut leaved foliage. Highly recommended for lawn and park planting. 5-6 ft., \$1.50 each; 6-8 ft., \$2.00 each.

2825 Catalpa Bungei. Tree has large, heart-shaped leaves and an umbrella-like top. Used for formal planting. 2-yr. heads, 5-ft. stems, \$1.00 each.

2824 Crab, Bechtel's Flowering. A beautiful, double pink, flowering crab with fragrant flowers in May and June. 18-24 inch. Postpaid: 50c each; 2-3 ft. Postpaid: 60c each.

2826 Elm, American White. The most popular American tree for street and general planting. 5-6 ft., 45c each; 6-8 ft., 65c each.

2833 Elm, Chinese. A hardy, rapid grower. Slender branches, compact habit of growth with small attractive leaves. Highly recommended for dry climates. 4-6 ft., branched, 35c each; 6-8 ft., 60c each, not prepaid.

2834 Maple, Schwedler's Purple Leaf. Very popular because of its reddish purple leaves in the spring. 5-6 ft., \$1.50 each; 6-8 ft., \$2.00 each.

2829 Maple, Silver or Soft. Well known, rapid growing tree. Leaves silver underneath. 5-6 ft., 35c each; 6-8 ft., 60c each.

2828 Maple, Sugar or Hard Maple. Splendid hardy ornamental tree. Foliage turning bright orange, sometimes scarlet in Autumn. 5-6 ft., \$1.25 each; 6-8 ft., \$1.75 each.

2823 Mountain Ash, European. A valuable ornamental tree with scarlet berries. 5-6 ft., \$1.25 each; 6-8 ft., \$1.75 each.

2835 Mulberry, Tea's Weeping. The long, slender, drooping branches of this tree make it desirable for lawn planting. 2-yr. head, 5-6 ft., \$1.60 each.

3233 Plum, Purple Leaved Flowering. Hardy, upright grower. Foliage reddish purple with striking bright red tips. 18-24 inch. Postpaid: 50c each. 2-3 ft. Postpaid: 60c each.

Catalpa Bungei

2836 Poplar, Bolleana, Silver Leaved. A rapid growing, columnar tree. Foliage green above, white and cottony on the under side. 5-6 ft., 60c each; 6-8 ft., 75c each.

2831 Poplar, Carolina. A rapid grower, extensively planted. Columnar shape. 5-6 ft., 40c each; 6-8 ft., 55c each.

2830 Poplar, Lombardy. Tall grower, pyramidal. Valuable for landscape planting and used freely for screens. 5-6 ft., 40c each; 6-8 ft., 55c each.

2837 Red Bud. Very attractive, rosy pink almost red flowers in April. 3-4 ft. Postpaid: 65c each.

2838 Willow, Niobe Weeping. An exceptionally strong, hardy, graceful tree. Very attractive golden bark. 5-6 ft., 80c each; 6-8 ft., \$1.00 each.

Maple

Juniper, Irish. Foliage glaucous green. Slender, columnar form. Not hardy in extreme north. \$2.25 each; 2 for \$3.75.

Juniper, Pfitzeriana. One of the most valuable of the spreading Junipers. Forms a broad pyramid. Leaves pointed and spreading. Handsome brownish violet. \$2.25 each; 2 for \$3.75.

Pine, Austrlan. Deep rich green color. Growth close and compact. One of the most valuable evergreens for windbreaks. \$1.75 each; 2 for \$2.75.

Pine, Mugho. Deep green in summer and winter. Will grow almost anywhere. Dwarf in habit, producing a unique ball-like form. 18-24 inch. \$2.25 each; 2 for \$3.75.

Spruce, Black Hills. Hardest of all spruces. Symmetrical, compact and bushy in growth. Foliage varies from green to bluish tint. \$2.25 each; 2 for \$3.75.

Spruce, Colorado Blue. The aristocrat of evergreens. Foliage ranges from green to silvery white. Fine for lawn planting. \$4.25 each; 2 for \$7.75.

Spruce, Koster's Blue. One of the most handsome for specimen plantings. Retain their rich bluish color all year and are sometimes called "Shiners." Very compact in growth. 18-24 inch, \$4.75 each; 2 for \$8.50.

Spruce, Norway. Sharp, pointed leaves green in color. One of the most rapid growing and shapely of the tall, dark green spruces. \$1.50 each; 2 for \$2.50.

together. Finish
is very attractive. This is a
field-tested tool
which gives real
satisfaction,
used in any of
the four ways.

Standard Package. One

in wood box, handles bundled separately. Shipping weight, 56 lbs. Price, \$13.49, f. o. b. Clarinda.

HILL AND DRILL SEEDER No. 205

The No. 205 is a hill and drill seeder only. Otherwise like No. 201. Can be made into a cultivator by adding cultivator equipment. Price, \$11.25, f. o. b. Clarinda.

BERRY'S HIGH WHEEL PLOW No. 248

Adjustable Garden Plow. Seasoned hardwood handles reinforced at tip with steel straps to prevent splitting. Steel frame adjustable for pitch of tools. Double pointed shovel made of drop steel, five-tooth cultivator, and a high carbon steel clover leaf sweep. Shipping wt., about 20 lbs. Price, \$3.35, f. o. b. Clarinda.

LANDSLIDE PLOW

Fits our No. 248 plow. A high grade attachment. Price, 60c, f. o. b. Clarinda.

GARDEN CULTIVATOR No. 1

A light, strong, sturdy adjustable garden cultivator, sharpened cutter bar for cutting weeds and five pressed steel cultivator teeth for pulverizing. Adjustable to suit rows 6 to 12 inches. Shipping wt., 12 lbs. Price, complete with handles and attachments, \$2.95, f. o. b. Clarinda.

CYCLONE SEEDER

Sows grass and clover and small grains evenly. Rate of seeding easily regulated. Sturdily built. Sows 30 to 60 acres a day. Price, f. o. b. Clarinda, \$2.00 each. Postpaid, \$2.25.

HORN SEED SOWER

Special spouted bag holding about one-half bushel; straps over shoulder. Seed flows down spout through a split cap. All you have to do is walk along and move the tube back and forth. Price, 90c, postpaid.

HOTKAPS

Set your plants out early and protect them with Hotkaps. Makes a miniature Hothouse. By using Hotkaps you get hardier, quicker crops. Prices, f. o. b. Clarinda: 250 Package, including garden setter with tamper, \$3.75; shipping wt., 9 lbs. 100 Package, including garden setter with tamper, \$2.50; shipping wt., 5 lbs. Larger amounts, write for prices.

SPRAYERS

HUDSON PERFECTION SPRAYER

The Hudson Perfection high pressure compressed air sprayer, highest quality, most satisfactory. Tank 7½ inches diameter; 20 inches high; capacity approximately 4 gallons. All seams riveted and soldered.

The brass tank is recommended whenever a strongly corrosive solution is used. No. 110B Brass Tank, \$7.95, f. o. b. Clarinda. Shipping wt., 11½ lbs.

Copper-bearing galvanized sheet is used exclusively in the galvanized tank, as that is rust resisting and gives the sprayer a longer life. No. 110G Galvanized Tank, \$5.95, f. o. b. Clarinda. Shipping wt., 11 lbs.

HUDSON MODOC SPRAYER AND FORCE PUMP

It is double-acting, developing 150 lbs. nozzle-pressure. Makes a very convenient portable outfit because it can be used with a bucket or small tank. This is distinctly a superior pump and will give you lots of service. Price, \$3.35, f. o. b. Clarinda. Shipping wt., 6 lbs. Add postage if wanted by parcel post.

EXTENSION ROD

Can be used on either Perfection or Modoc. Two feet long. Each, postpaid, Brass, 65c; Iron, 45c.

HUDSON MAJOR DUSTER

Designed for the home gardener, small truck farmer or fruit grower. It will handle all dry powdered insecticides very satisfactorily. Length over all, 28 inches. Fitted with powder strainer and up-or-down-shoot-nozzle. Price, 98c.

INSECTICIDES

RED ARROW

The Non-Poisonous Spray

Red Arrow Insect Spray is highly concentrated; simply mix with water and spray. Kills all kinds of insects such as Aphids, Cut Worms, and many others. Will not injure or discolor tender foliage nor leave poisonous residue. Postpaid prices: 1 oz. bottle, 35c; ¼ pt. bottle, \$1.00; 1 pt. can, \$2.00.

HAMMOND'S SLUG-SHOT

Is the best insect destroyer ever offered for destruction of potato bugs, worms and insects that chew. Is simply dusted lightly on. Nothing superior for killing cabbage worms. Non-poisonous. Postpaid prices: 1 lb., 25c; 5 lbs., \$1.00. Not prepaid: 5 lbs., 75c; 10 lbs., \$1.25.

PRUNING SHEARS

For pruning grape vines, small fruit, trimming hedges, etc. We offer a high quality forged shear that will stand hard usage. **SPECIAL** at 80c, Postpaid.

BERRY'S LAWN MIXTURES

GENERAL CHOICE MIXTURE

This makes a fine smooth lawn in the northern half of the United States. Contains chiefly Blue Grass, Red Top, White Dutch Clover and Rye Grasses. The quicker growing grasses provide a nice green stand while the slower kinds are coming on. It is our most popular mixture, because it gives such wonderful satisfaction. Postpaid price: 1 lb., 35c; 3 lbs., \$1.00; 5 lbs., \$1.60; 10 lbs., \$3.00. A pound sows about 500 square feet.

See page 41 for straight Blue Grass.

TERRACE MIXTURE

This mixture contains deep rooted grasses. They hold the soil firmly and resist drought. Select this for terraces and sloping places. Soil on terraces is often filled in dirt of low fertility. It will pay you to fertilize your ground well. You cannot have a nice lawn on poor soil. Postpaid price: 1 lb., 50c; 3 lbs., \$1.35; 5 lbs., \$2.15; 10 lbs., \$4.00. All seed is thoroughly cleaned and tested.

SHADY-SPOT MIXTURE

This contains grasses naturally adapted to growing in shade. Fine for grounds shaded by trees or buildings. In heavy shade a light application of lime in addition to fertilizer will improve results. This is a dandy mixture. Postpaid price: 1 lb., 45c; 3 lbs., \$1.20; 5 lbs., \$1.90; 10 lbs., \$3.50.

WHITE DUTCH LAWN CLOVER

The small white clover so popular for lawns. This may be mixed with any lawn grass seed you have on hand or sown on an old lawn in the early spring. Very drought resistant. Helps soil fertility. Seed is very small. A pound sows 1,000 or more square feet, depending on how heavy percentage of clover is desired. Postpaid price: 1 lb., 55c; 3 lbs., \$1.50; 5 lbs., \$2.25; 10 lbs., \$4.25. See page 32 for larger quantities.

SOUTHLAND MIXTURE

Contains grasses adapted to the south, including Bermuda Grass and Southern Blue Grass. Makes a beautiful lawn for such sections. We do not consider this hardy enough for our northern trade. Like all our lawn mixtures the seed has been cleaned, tested and guaranteed to satisfy. Postpaid price: 1 lb., 50c; 3 lbs., \$1.35; 5 lbs., \$2.15; 10 lbs., \$4.00.

BERRY'S BLUE RIBBON COLLECTIONS

CHERRY COLLECTION.

This will bring you the finest quality and a delightful variety. These trees will give you a longer season of fresh cherries. They are standard varieties and widely popular. The stock is our best quality and guaranteed to please.

Collection consists of 2 Early Richmond, 2 Large Montmorency, 1 English Morello and 1 Yellow Glass Hardy Sweet. Trees start to bear early. The future years will commend your judgment in selecting and ordering this extra value bargain from Berry's.

Six fine 2 yr. stock, postpaid for \$2.00; Two collections \$3.75.

APPLE COLLECTION. A splendid bargain. Apple tree stock is scarce this year. Have only limited stocks contracted for early. It will be impossible to replace at this low price. This is a remarkable value composed of 1 Double Red Delicious, 1 Yellow Transparent, 2 Jonathan, 1 Grimes Golden, 1 Staymen Winesap. Here is an extra choice selection. All high grade stock, the quality that is increasing our nursery business so rapidly. Learn to know our values through this special bargain.

Six fine trees 2 yr. stock, \$2.40 Value, Postpaid for \$1.75. See Coupon on Enclosed Packet for Special Offer.

PEACH COLLECTION.

A selection of six of our finest peach trees. All standard varieties of sterling merit. Prices very low in face of a short supply of peach trees. Choice hardy stock. Plant better trees and harvest fine crops. Save money by buying collections. Get your friends to join with you. Buy several and divide to suit yourselves. Peaches are a delicious fruit. Nothing finer than tree ripened stock. Collection consists of 2 J. H. Hale, 2 Elberta, 1 Champion and 1 South Haven. All good ones.

Six fine trees 2 yr. stock, Postpaid \$1.85; Two collections for \$3.50.

PLUM COLLECTION.

A great combination in plums. Plums often bear two years after planting. These trees can be set where most trees would not thrive. Plums are wonderful for canning and jelly. Try this collection. It is an exceptional value. Perhaps you may have a neighbor who would join you in ordering some of these collections.

2 Waneta, 2 Golden Rod (Yellow), 1 Sapa and 1 Underwood, 6 Fine Trees 2 yr. stock, postpaid for \$1.95; Two collections for \$3.70.

GRAPE COLLECTION

No. 1. Ten 1-yr.

vines postpaid for \$1.00.

Collection No. 2. Ten 2-yr.

vines postpaid for \$1.50.

Both collections consist of 2 Moore's Early, 2 Niagara, 2 Agawam, and 4 Concord. The choicest stock is used in both. Either will give excellent satisfaction. Takes a year longer, of course, to get results from 1 year stock. We can make these extremely low prices by assembling these collections in advance. You save 25% to 30% in this way.

You get a pleasing variety of good hardy vines.

You'll be delighted with this quality.

Corn Belt World Brand Grimm

Strictly extra fancy quality Grimm. The price guaranteed the lowest obtainable on such beautiful seed. This unquestionably is our biggest dollars worth. U. S. Verified origin seed. Fine large berries. Excellent color. High purity. Strong Germination. New Crop Seed. Super Hardy Grimm. Genuine Corn-Belt stock. (See page 34.)

Highly Satisfactory

Expect a lot when you order this World Brand Corn-Belt Grimm. You will get beautiful seed. You will receive seed that is extra winter hardy, vigorously alive. It abounds with the energy that produces strong, sturdy plants. Such seed is most economical because it always satisfies. This seed is selected and purchased with care. U. S. Verified origin tag certifies as to place where grown. Growers furnish sworn affidavits as to its genuineness. The seed is cleaned, tested, graded, sacked and sealed under strict supervision. Here is real Grimm at the lowest price for such fine quality.

Save \$2.00 to \$3.00 per bu.

Comparisons will prove that in many cases the savings are greater. They may run to \$5.00 or more. Consider the quality. Cheek only with the best. There is no seed that can produce better stands than this World Brand. We want your business and have made this price so low that it is clearly to your interest to trade with us. Benefit from our early purchases and our direct selling policy. You can save with surety and satisfaction on this Corn Belt World Brand Grimm.

Grimm is in great demand. Its finer growth and super-hardiness are characteristics more and more farmers are demanding. Supplies of Grimm are going fast. There is practically no seed left in growers' hands. Buy early to share a matchless value like this.

LOT JUST-RITE RED CLOVER

Priced Very Low

Because it contains some Alfalfa Seed

Alfalfa cannot be separated from the clover. This cuts down percentage of pure red clover, thereby lowering the price materially. It does not, however, damage the seed. From a practical standpoint it serves just as well. In fact, many farmers are mixing a fourth to a third alfalfa with their red clover seedings. This generally produces much heavier yields and establishes alfalfa on the land. This lot contains around 25% hardy Alfalfa. Makes a very dependable seeding at a very low cost. We had a value like this last year that gave wonderful results.

Thoroughly Dependable Seed

This is re-cleaned new crop seed. All hardy stock, adapted throughout the nation. Good color, purity, size and germination. A very serviceable lot, guaranteed to please. This lot is not quite as smooth as the sample of Lot Leader enclosed but for practical and economical purposes it is very satisfactory.

With Red Clover seed production short and prices working steadily higher, this lot Just-Rite is truly a sensational value. A real bargain that thrifty buyers will be quick to appreciate. Share in the big savings by ordering just as early as you possibly can.
